POLYMER TIP

Dear Partner,

Your 2021 Workbook contains the entire range of our Browning, Winchester, Miroku and Kite Optics products. Each brand is colour-coded for ease of use.

The workbook includes a detailed table of contents showing the page number where you will find a picture and details of each product.

There is also a summary table at the end of the Browning and Winchester gun sections.

Thank you for your trust in us. We hope you enjoy excellent sales.

Prices applicable for orders with delivery between the 1st January and the 31st December 2021. Browning may modify its prices at any moment. Should it be the case, clients will receive the information and will have the opportunity to revise their orders accordingly. End user recommended prices are expressed including VAT, dealer prices are expressed VAT excluded. All prices are expressed in €.

BROWNING, THE BEST THERE IS.

BROWNING, THE BRAND

The Browning brand is about the genius of a man born 160 years ago in a small town in the American West. John Moses Browning began inventing at an early age. He had a prolific mind, and revolutionised firearms design time and time again.

From the Auto-5 and the B25 to the BAR and more, every one of his designs is a milestone; every work he created is a source of inspiration for future generations. Excellence has to follow a legacy like this.

Now, as always, every shotgun, rifle, ammunition and item of equipment made by Browning undergoes a mandatory series of stringent tests so that you can be confident in the knowledge that they are reliable, high-performing and built to withstand the ravages of time.

THE PERFORMANCE

The quality of a firearm, of ammunition and the effectiveness of an item of clothing are down to observation, talent and hard work; three creative cornerstones that mean as much to Browning as its early legacy.

The confidence that the Buckmark brand inspires can be traced directly to the people behind the name, and their attentiveness and desire to deliver the right solutions – our deeply held values.

Hunters and sports shooters alike are sure to find a Browning product that will take their passion to a new level.

The only thing that matters out shooting, in a hide, woodland or upland stalking, at the clay pigeon stand or in front of the target is the excitement that grips us when all the conditions are just right for turning great times into unforgettable memories.

So let us help you give it your best shot...

OUR VALUES

There is one devastatingly simple target that never leaves our sights: to bring you the best. Our teams are relentless in applying their technical expertise and aesthetic acumen to find new ways of making our current guns, ammunition and other equipment even better.

Because our engineers have a passion for our sport and a deep understanding of the challenges that face you while shooting or stalking, they bring all their personal experience to the solutions they devise and develop.

This continual fine-tuning, this increasingly meticulous scrutiny to detail ultimately makes all the difference – these are Browning's signature touches, its distinctive hallmark among other manufacturers, the proof of its commitment to delivering ever-higher performance.

OUR PLEDGE

Every shooter should be able to purchase the equipment they need and which is right for them, whatever their budget and goals, regardless of whether they follow the latest technological innovations or succumb to the charms of the eternal classics, are or would like to be discerning amateurs, recent converts or old hands.

This is our belief. This is our pledge.

Browning has always adhered to this mindset when developing its product lines.

The quality of our products is a true reflection of the exacting demands that drive us. What unites us is our pride.

The guns that leave our factory come with a ten-year warranty and a blend of reliability, sturdiness and effectiveness. From manufacturing to fitting and testing, and on to finishing, they each underline the uniqueness of a brand devoted to shooters who are driven by passion.

John M. Browning

JOHN M. BROWNING COLLECTION

B15 BEAUCHAMP GRADE E 12M

B15 - THE LEGEND REINVENTED

The B15, the shotgun the Browning faithful have been waiting for, was developed in 2015, 90 years after the B25 changed the gun world forever. Like its illustrious predecessor, the hand-finished B15 was developed and refined by the gunsmiths at the Fabrique Nationale in Herstal. That means you can expect balance and reliability. You can also expect precision engineering and the finest of aesthetic finishes. The B15 is available in four grades with a choice of exceptional engravings and wood quality.

HAND FINISHED **B15** IN BELGIUM

Four years after it was developed, the B15 is now available in 20-gauge models. The engravings feature slight variations from the 12-gauge models, but the same DNA can be seen in the hunting scenes on grades B and D and the chimæra on grades C and E. And the philosophy is unchanged: sophisticated efficiency. True shotgun connoisseurs will be won over by the B15, appreciating its style for sure, but enjoying the technical quality even more.

John Moses Browning devoted his entire life to guns. That story continues today in the John M. Browning Collection, which duly bears the two hallmarks of his talent: groundbreaking mechanical systems and the handmade custom finish you want. He left a huge impression on the world of gunmaking, and on the gunmaker to which he gave his name. You will find the same devoted spirit lives on today in Belgium.

OVER-AND-UNDER SHOTGUNS - B725 HUNTER

B725 HUNTER G5 12M INV DS

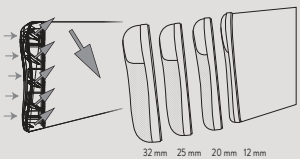

'LEGENDARY RELIABILITY' AND 'INNOVATION' ARE THE B725'S WATCHWORDS

The Browning B725 is an aesthetic and technical revolution in over-and-under shotguns. Based on the legendary B25, it is innovative whilst retaining the many existing design features of the B525, which – we are proud to repeat – makes it the most outstanding over-and-under shotgun on the market.

1

INFLEX™ II RECOIL PAD

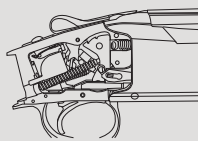

This ultra flexible recoil pad provides the best recoil absorption possible on a shotgun. The exclusive design and material used promote a downward deviation of the direction of the recoil forces, thus pulling the stock slightly away from your face in order to reduce the recoil and upward motion of the gun. Two other pads, 20mm, 25mm or 32 mm thick (available as an option), make it easy to adjust the length of your stock.

2

HIGH-PERFORMANCE MECHANICAL TRIGGER SYSTEM

This firing system is shorter, faster and lighter giving more control over your shooting. Browning's innovative mechanical firing system provides great ease of use for hunters and shooters, guaranteeing that a second shot can be fired whatever the circumstance.

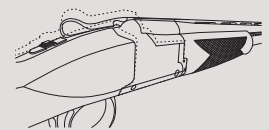

3

LOW ACTION FRAME

The low action frame provides the following benefits when shooting. It enables faster aiming and therefore more instinctive shooting. Thanks to the frame's inline recoil providing a more comfortable shooting position, it reduces muzzle flip and makes for good manoeuvrability and effectiveness when shooting.

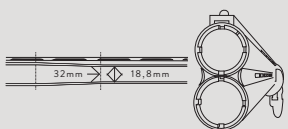

ACTION FRAME GUARANTEED FOR TEN YEARS.

4

BACK-BORED™ VECTOR PRO™ BARREL

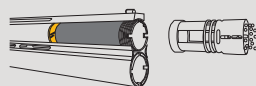

The Back-bored™ Vector Pro™ barrel has an increased internal bore diameter and longer forcing cone. One barrel, two features, three benefits: greater velocity and better penetration / shot grouping and reduced recoil.

5

INVECTOR DS™ CHOKES

The Invector DS™ chokes provide unrivalled performance by providing an optimal length of 80mm, an exclusive internal shape and a patented gas seal segment.

FLAWLESS MECHANICS FOR OUTSTANDING RELIABILITY.

HUNTING SHOTGUNS – B525 GAME LAMINATED 12M

STEEL SHOT PROVED

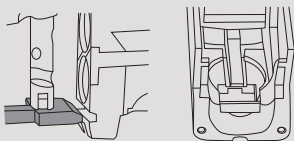

SHOOTER AND GUN AS ONE

This B525 GAME LAMINATED adds another distinguishing feature to its hallmark sporty and aggressive style, with uniformly compact laminated wood that provides superior rigidity for a perfectly stable shot.

2

FLAWLESS MECHANICS FOR OUTSTANDING RELIABILITY

- Action frame made from indestructible forged steel
- Extra-wide flat bolt and hinge pin
- Impact wheel ejectors for cleaner ejection
- Chrome-plated barrels and chambers

3

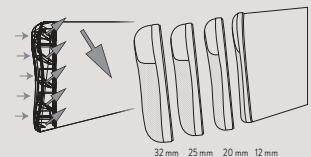

BACK-BORED™ BARREL

The Back-bored™ barrel has an increased internal bore diameter and longer forcing cone. One barrel, two features, three benefit: greater velocity and better penetration / shot grouping and reduced recoil.

4

INFLEX™ II RECOIL PAD

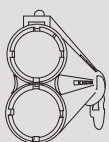

This ultra flexible recoil pad provides the best recoil absorption possible on a shotgun. The exclusive design and material used promote a downward deviation of the direction of the recoil forces, thus pulling the stock slightly away from your face in order to reduce the recoil and upward motion of the gun. Two other pads, 20mm, 25mm or 32 mm thick (available as an option), make it easy to adjust the length of your stock.

5

INVECTOR-PLUS™ CHOKES

Adjustable Invector-Plus™ chokes have been specially developed for our Back-bored™ barrel system. They have been designed to obtain 'a perfect target' at different shooting distances. Depending on the Browning choke you use, you can adapt your gun perfectly for the distances at which you shoot and the game you are hunting (Cyl = 15m, 1/4 Choke = 20m, 1/2 Choke = 25m, 3/4 Choke = 30m).

1

WHY CHOOSE A LAMINATED/GLUED WOOD STOCK ?

- The first and foremost advantage of a laminated/glued wood stock is the high density of the material that makes it extremely robust.
- Laminated/glued stocks are far more resistant to abrasion and humidity.
- The glue that we use to bond our birch stocks can also withstand water.
- Whether you're on the range or on a hunt, you don't have to worry about getting your gun out. This is where this stock really excels.
- The stability of a laminated/glued stock improves the gun's accuracy slightly, and above all its service life.
- The birch wood is dyed in the mass, so you can make it look as good as new just by sanding, without having to re-apply colour.
- We do not use any substances that are toxic to the environment or the gun user

STOCK OF THE B525 LIBERTY LIGHT 12M INV+

This is a new stock developed for ladies, young people and shooters who are not completely satisfied with standard measure stocks.

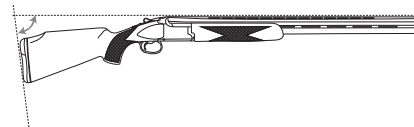

DROP

The drop is the height of the back of the stock in relation to the top rib. The drop of the B525 Liberty Light 12M Inv+ is higher than standard stocks. This feature allows the shooter improved cheek contact on the back of the stock and thus limits recoil impact.

PITCH: TOTAL COMFORT

The 80° tilt limits the toe-to-chest contact for optimum comfort and lower recoil.

SHOOTING SHOTGUNS - B725 PRO

B725 PRO MASTER ADJUSTABLE

SHOOTER AND GUN AS ONE

The B725 Pro range has been designed to provide a perfect gun fit whether you're shooting Sporting or Compak. The advanced engineering of its adjustable comb, cutting-edge recoil pad and Invector DS™ Extended chokes are further enhanced by the groundbreaking Pro Balance System that lets you redistribute the weight of the stock and barrels to fine-tune the gun's balance just the way you want it.

1

STOCK COUNTERWEIGHT

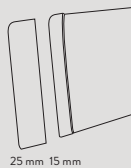

The Pro Balance System allows shooters to fine-tune the balance points for a perfect mount and swing. Adding counterweight to the stock helps balance the shotgun, aids follow-up shots and the additional mass reduces felt recoil.

2

INTERCHANGEABLE RECOIL PADS

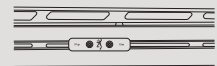

The B725 Pro range is supplied with interchangeable 15mm or 25mm recoil pads. They will enable you to adjust the length of your stock without the slightest difficulty.

3

BARREL COUNTERWEIGHT

The barrel's counterweight is comprised of tungsten plates which enable the gun's centre of gravity to be moved up to 20mm forwards.

THE ART OF BREAKING THINGS.

SHOOTING SHOTGUNS - B725 SPORTER

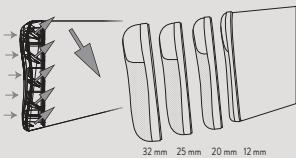

STYLE AND TECHNIQUE IN PERFECT BALANCE

The Browning B725 is an aesthetic and technical revolution in over-and-under shotguns. Based on the legendary B25, it is innovative whilst retaining the many existing design features of the B525, which make it the most outstanding over-and-under shotgun on the market.

1

INFLEX™ II RECOIL PAD

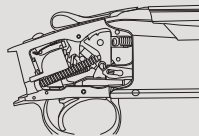

This ultra flexible recoil pad provides the best recoil absorption possible on a shotgun. The exclusive design and material used promote a downward deviation of the direction of the recoil forces, thus pulling the stock slightly away from your face in order to reduce the recoil and upward motion of the gun. Two other pads, 20mm, 25mm or 32mm thick (available as an option), make it easy to adjust the length of your stock.

2

HIGH-PERFORMANCE MECHANICAL TRIGGER SYSTEM

This firing system is shorter, faster and lighter giving more control over your shooting. Browning's innovative mechanical firing system provides great ease of use for hunters and shooters, guaranteeing that a second shot can be fired whatever the circumstance.

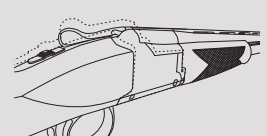

3

LOW ACTION FRAME

The low action frame provides the following benefits when shooting. It enables faster aiming and therefore more instinctive shooting. Thanks to the frame's inline recoil providing a more comfortable shooting position, it reduces muzzle flip and makes for good manoeuvrability and effectiveness when shooting.

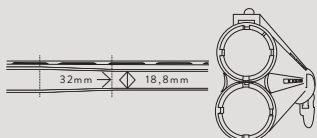

ACTION FRAME GUARANTEED FOR TEN YEARS.

4

BACK-BORED™ VECTOR PRO™ BARREL

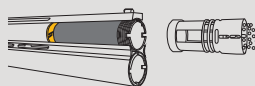

The Back-bored™ Vector Pro™ barrel has an increased internal bore diameter and longer forcing cone. One barrel, two features, three benefits: greater velocity and better penetration / shot grouping and reduced recoil.

5

INVECTOR DS™ CHOKES

The Invector DS™ chokes provide unrivalled performance by providing an optimal length of 80mm, an exclusive internal shape and a patented gas seal segment.

**SAM GREEN, 2019 FITASC
WORLD SPORTING CLAYS
CHAMPION**

OVER-AND-UNDER SHOTGUNS - ULTRA XS PRO

ULTRA XS PRO ADJUSTABLE COMB 12M INV+ TITANIUM

THE MOST RELIABLE AND BEST PERFORMING LINE

In July 2019, Sam Green and his Ultra XS became FITASC World Sporting Clays Champion.

It is supplied with eight Invector Titanium extended chokes, two spacers, three Inflex™ recoil pads and three trigger shoes.

The Ultra XS Pro Adjustable Comb can thus be balanced on demand thanks to a clever weight and counterweight system (gunstock and barrel).

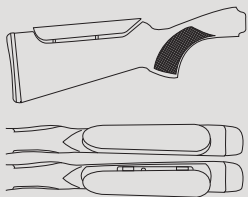

The Ultra XS Pro Adjustable Comb is equipped with an adjustable cheek-piece and a trap fore-end.

Its technical innovation in no way impairs its elegance, as can be seen in the new engraving decorating its action frame and the grade 4 wood with oiled finish.

1

ADJUSTABLE COMB

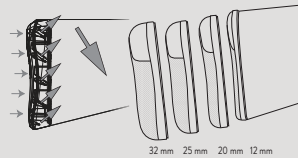

The Pro Fit adjustment system lets you position the comb just where you need it and use the adjustment screw to trim the drop and cast. Easily visible markings take the guesswork out of adjusting or refitting the comb after removal.

2

INFLEX™ II RECOIL PAD

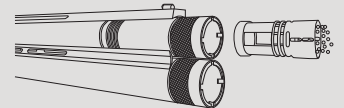

This ultra flexible recoil pad provides the best recoil absorption possible on a shotgun. The exclusive design and material used promote a downward deviation of the direction of the recoil forces, thus pulling the stock slightly away from your face in order to reduce the recoil and upward motion of the gun. Two other pads, 20mm, 25mm or 32mm thick (available as an option), make it easy to adjust the length of your stock.

3

INVECTOR-PLUS™ EXTENDED CHOKES MIDAS

Adjustable Invector-Plus™ Extended chokes Midas have been specially developed for our Back-bored™ barrel system. They have been designed to obtain 'a perfect target' at different shooting distances. Depending on the Browning choke you use, you can adapt your gun perfectly for the distances at which you shoot and the game you are hunting (Cyl = 15m, 1/4 Choke = 20m, 1/2 Choke = 25m, 3/4 Choke = 30m).

MAKE YOUR GUN CORRESPOND TO YOUR PHYSIQUE.

BROWNING® PROPOSES THE VERY ULTIMATE TO YOU BY OFFERING TO ADAPT YOUR GUN TO YOUR PERSONAL SIZE.

This service is for persons who are tall, short, with broadshoulders, beginners or just demanding users, as BROWNING® has made a gun that is the perfect tool for your passion.

The stock can be adjusted by altering 3 important criteria: Its length, its pitch or even a version for left-handers.

See the 3 pictograms summarizing the options available for stocks, all the way through the catalogue.

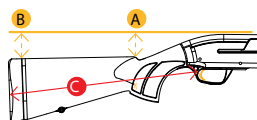

LEFTHAND

BROWNING® guarantees optimal service by offering you the possibility of purchasing your gun directly in a left-handed version. In this way the stock is ready and prepared for left-handed shooters.

STAY AHEAD OF THE GAME!

OVER-AND-UNDER SHOTGUNS - CYNERGY

CYNERGY COMPOSITE BLACK

STAY AHEAD OF THE GAME!

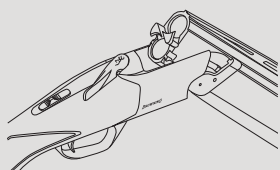

Cynergy gives you the lowest action frame on the market (60mm) and the fastest firing system (0.0019 seconds). Cynergy is also aesthetically modern and attractive, an innovative design carried by trim, fine contours and a slender outline. The composite stock and fore-end make the Cynergy shotgun significantly light and rugged. Finally, the Cynergy's Back-bored™ barrels are also suited to high-performance steel shot shells.

1

ACTION FRAME: 60MM, THE LOWEST ON THE MARKET

The exclusive integrated hinge system gives an ultra-low action frame, which has the advantage of making it a natural extension of the shooter.

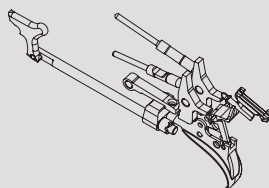

10-YEAR ACTION FRAME WARRANTY.

2

FAST FIRING SYSTEM: 0.0019 SECONDS

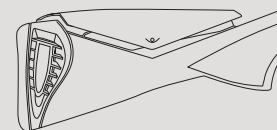

The specific striker mechanism on this shotgun cuts the time between the first and second shots to just 0.0019 seconds, compared to 0.0031 seconds for its nearest rivals.

3

INNOVATIVE DESIGN

The exclusive structure of this pad absorbs 1.5 to 2 times more recoil than a conventional pad. The stock length can be adjusted easily and efficiently by 32mm with three recoil pads and an insert.

EASY HANDLING, FAST AIMING AND COMFORTABLE SHOOTING.

SEMI-AUTOMATIC SHOTGUNS - MAXUS 2

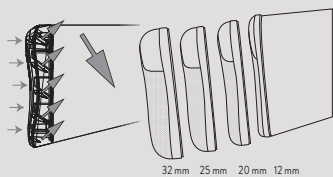

THE MAXUS II - MEETING HUNTERS' EXPECTATIONS

The Maxus is a reference for hunters around the globe. Its particularly gentle recoil and the speed loading system make it a one-of-a-kind that offers comfort and high performance in equal measure. The Maxus II builds on the benefits of its predecessor with new technical features to give hunters a unique shooting experience.

1

INFLEX™ TECHNOLOGY

Much more than a recoil pad in a recoil-absorbing material, the Inflex™ II has been designed with an internal structure that lowers the gunstock and pushes it away from the shooter's face after each discharge, which allows a second shot that is even more comfortable and faster.

2

SPEED LOADING AND UNLOADING SYSTEM

Rapid loading systems have been used on Browning semi-automatic shotguns for decades. Our patented Speed Load Plus system chambers the first round straight from the magazine, and unloads quickly without having to run the bolt to chamber each shell.

3

BARREL ASSEMBLY

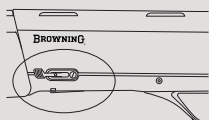

The new geometry of the extended Vector Pro™ forcing cone together with the Back-bored™ barrel eliminates the deformation of shot, making it possible to improve the shot pattern and reduce recoil sensation.

4

MAGAZINE CUT-OFF

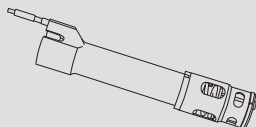

All our Maxus guns, with the exception of the Sporting models, are fitted with a magazine cut-off for unloading and replacing the chambered shell with a new load without having to cycle the new shell from the magazine.

5

POWER DRIVE GAS SYSTEM

The Power Drive Gas System uses larger escape valves to remove gas more quickly with heavy loads. A brand new patented design for an integrated valve keeps residue outside the mechanism for cleaner functioning. A 20% increase in the piston run increased makes it even more reliable with light charges. The system works with loads of 24g to 64g.

INFLEX II TECHNOLOGY

STEEL SHOT PROVED

NEW

MAXUS II

Before we developed this virtuoso gun for waterfowling and hunting in open country, we conducted an extensive survey to find out exactly what hunters want. The results show that they are looking for a semi-auto shotgun that offers exceptional performance, especially when it comes to handling, comfort, versatility and ergonomics.

1

EASY HANDLING, FAST AIMING AND COMFORTABLE SHOOTING

- **Fully adjustable stock.** The drop and cast of the Maxus II can be altered using the six spacers included in the box, as well as the 7 mm stock insert and 32 mm Inflex II recoil pad. A 12 mm insert and 12, 20 and 25 mm recoil pads are also available to buy.
- **Full comfort stock.** The Inflex II is one of the best performing recoil pads on the market, directing the force of the recoil downwards and away from the shooter's cheek. The stock also features a Reactar gel cheek piece for even better face protection, especially when firing high-gram cartridges.
- **Fully balanced gun.** The perfect balance of the Maxus II will give you an even more natural swing!

2

ERGONOMIC

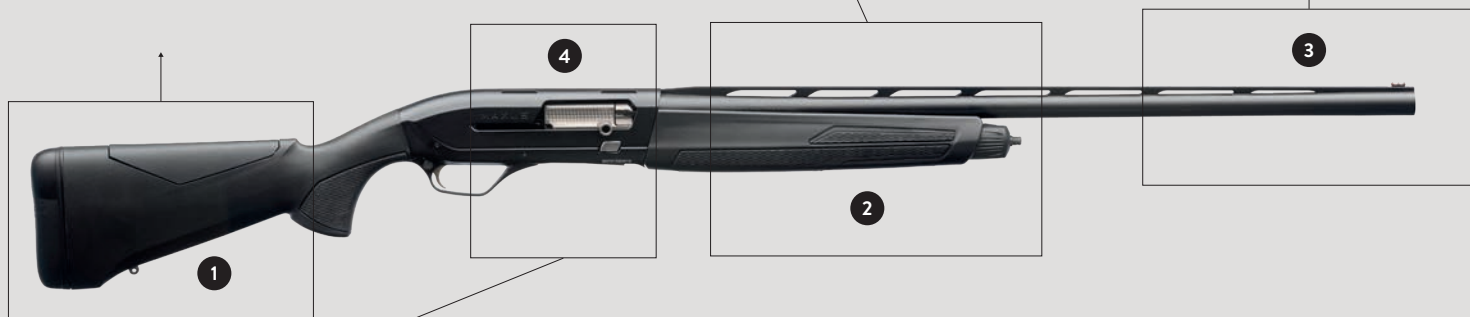

- **Everything's in hand.** Overmoulded forearm and pistol grips keep the gun securely in your hand even when it's raining. The oversized bolt handle and trigger guard make the Maxus II easy to handle, even with gloves on.

3

VERSATILE

- **All-terrain gun.** If you're a wildfowler who shoots from long range, or you like to shoot sporting clays with friends, the Maxus II delivers outstanding performance in any setting. This new reference in semi-automatic shotguns comes with 5 Invector+ chokes for your every need.

The Maxus II is also capable of firing a wide selection of hunting cartridges, from 28 grams to the largest loads available in gun stores.

4

THE VALUE-ADDED EXTRA YOU ONLY GET FROM BROWNING

- **Speedloading.** Every second counts when you're hunting small game in open country and wetlands. While your Maxus II has just sent out its own special warm welcome to that flight of mallards, you need to reload fast to greet the next lot. **Speedloading** is a Browning proprietary technology that saves you precious time. When you insert the first cartridge into the magazine with the breech open, it is chambered straight away and the bolt springs shut, giving you vital extra seconds to concentrate on what really matters: your quarry.

THE MAXUS II AT A GLANCE

· **Barrel :** 66, 71 or 76cm

THE KINEMATIC DRIVE™ SYSTEM : 100,000-ROUND WARRANTY*

SEMI-AUTOMATIC SHOTGUNS - A5

A5 ULTIMATE PARTRIDGES 12M 3" INV DS

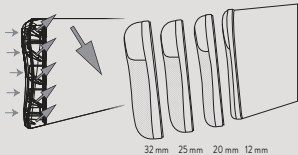

BUILT TO LAST: 100,000-ROUND WARRANTY*

The A5 was developed to be the most reliable, fastest and gentlest inertia-driven semi-automatic shotgun on the market. The new, indefatigable Kinematic Drive™ system is what makes it so unfailingly reliable, while further innovative features such as the Invector DS™ chokes, Inflex™ II recoil pad and Speed Load Plus load/unload system add to the A5's technological punch.

1

INFLEX™ II RECOIL PAD

This ultra flexible recoil pad provides the best recoil absorption possible on a shotgun. The exclusive design and material used promote a downward deviation of the direction of the recoil forces, thus pulling the stock slightly away from your face in order to reduce the recoil and upward motion of the gun. Two other pads, 20mm, 25mm or 32mm thick (available as an option), make it easy to adjust the length of your stock.

2

HUMPBACK

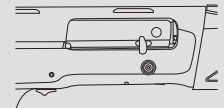

Made from lightweight, aeronautic quality aluminium alloy, the A5's receiver is sturdy and its characteristic shape is much more than just a nostalgic return to the past. The receiver's familiar humpback shape fits perfectly with the rib for lengthening your line of sight, which helps you to aim naturally with faster targeting.

3

SPEED LOADING AND UNLOADING SYSTEM

Rapid loading systems have been used on Browning semi-automatic shotguns for decades. Our patented Speed Load Plus system chambers the first round straight from the magazine, and unloads quickly without having to run the bolt to chamber each shell.

4

KINEMATIC DRIVE™ SYSTEM

The system accumulates recoil energy and converts it into a mechanical movement for actuating moving parts. It's the simplicity of its design that makes the Kinematic Drive™ system work so efficiently, smoothly and reliably with any type of load and in any type of extreme weather, temperature, damp and dirt.

5

BACK-BORED™ VECTOR PRO™ BARREL

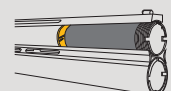

The Back-bored™ barrel has an increased internal bore diameter and longer forcing cone. One barrel, two features, three benefits: greater velocity and better penetration / shot grouping and reduced recoil.

6

INVECTOR DS™ CHOKES

The Invector DS™ chokes offer unrivalled performance by providing an optimal length of 80mm, an exclusive internal shape and a patented gas seal segment.

SPEED UP YOUR REFLEXES.

SEMI-AUTOMATIC RIFLES - BAR REFLEX

BAR MK3 REFLEX COMPOSITE

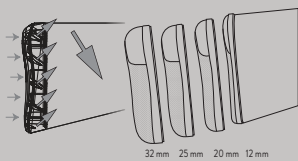

"REFLEX": THE REVOLUTIONARY AIMING SYSTEM

Thoroughly modern styling, natural handling, excellent ergonomics: the new BAR Reflex in a nutshell. With the new K1 red-dot sight from Kite Optics fitted, this rifle is a revolution: low and forward position, natural handling and easy adjustment.

1

INTERCHANGEABLE BUTT-PLATE

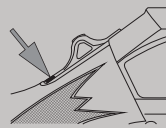

BAR rifles are fitted with interchangeable Inflex™ II recoil pads on their butt-plates. Different thicknesses are available: 12mm, 20mm, 25mm or 32mm. These butt-plates enable you to adjust the length of your stock without difficulty.

2

HAND COCKING SYSTEM SAFETY GUARANTEED

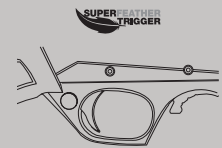

The manual cocking system lets you literally cock your rifle, by moving the arming plunger forwards, which puts the hammer springs under load. Your gun is now ready to fire. You can disarm your gun just as easily by pushing the button.

3

TRIGGER SYSTEM IS A GLASS-BREAKER

When you want absolute precision, this trigger system is short and incredibly direct. The trigger system offers you that rewarding sense of breaking a glass bar as you squeeze into a shot.

4

THE LOWEST MOUNTED RED DOT ON THE MARKET

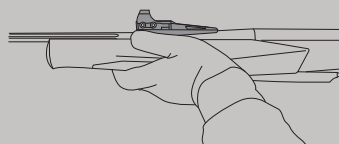

- The red dot is mounted low and forwards for a fast and instinctive aim.
- Perfect alignment with the stock, without a comb.

5

OPTIMUM ERGONOMICS

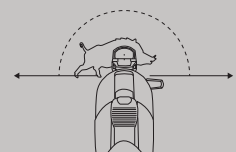

- Handles naturally.
- Easily adjustable red-dot brightness.
- Integrates elegantly with the gun.

6

K1: MAXIMUM FIELD OF VIEW

Add a scope with Nomad removable mount system while keeping the red-dot.

| WHY CHOOSE A LAMINATED/GLUED WOOD STOCK ?

- The first and foremost advantage of a laminated/glued wood stock is the high density of the material that makes it extremely robust.
- Laminated/glued stocks are far more resistant to abrasion and humidity.
- The glue that we use to bond our birch stocks can also withstand water.
- Whether you're on the range or on a hunt, you don't have to worry about getting your gun out. This is where this stock really excels.
- The stability of a laminated/glued stock improves the gun's accuracy slightly, and above all its service life.
- The birch wood is dyed in the mass, so you can make it look as good as new just by sanding, without having to re-apply colour.
- We do not use any substances that are toxic to the environment or the gun user

SPEED UP YOUR REFLEXES.

STRAIGHT-PULL RIFLES - MARAL REFLEX

NEW MARAL REFLEX NORDIC COMPOSITE

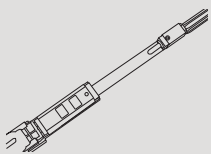

THE MOST EFFECTIVE STRAIGHT-PULL ACTION RIFLE: SURER, MORE ERGONOMIC, FASTER

The new Maral Reflex handles naturally, and with its near-perfect ergonomics, it has much to offer. It features a point of aim 6mm lower than the lowest red dot on the market. An adjustable stock is unnecessary. Its perfect field of view on and around the moving target offer guaranteed shot capability.

1

QUICK RELOADING SYSTEM

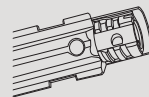

The servo bolt return system combines maximum safety, speed and efficiency. Thanks to the time gained in the reloading phase, shooters can concentrate on their shooting.

2

SAFETY GUARANTEED

- Hand cocking system.
- Breech contained inside its casing: no inconvenience when reloading.
- Seven-lug bolt: a bolt renowned for its sturdiness, which guarantees exceptional safety and accuracy.

3

THE LOWEST MOUNTED SIGHT ON THE MARKET

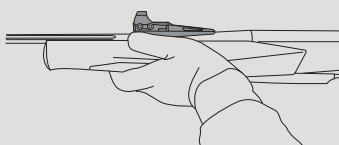

- Low and forward mounted for a fast and instinctive aim.
- Perfect alignment without a comb.

4

OPTIMUM ERGONOMICS

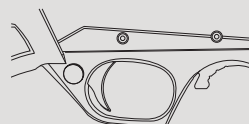

- Handles naturally.
- Easily adjustable red-dot brightness.
- Integrates elegantly with the gun.

5

TRIGGER SYSTEM IS CRISPER, SHORTER AND INCREDIBLY DIRECT

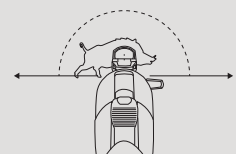

When you want absolute precision the trigger system is crisper, shorter and incredibly direct. The trigger system offers you that rewarding sense of breaking a glass bar as you squeeze into a shot.

6

K1: MAXIMUM FIELD OF VIEW

The Kite K1 was developed to render the edge of the sight practically invisible, to make fast target acquisition easier and provide maximum field of view.

INTERCHANGEABLE BUTT-PLATE

BAR rifles are fitted with interchangeable Inflex™ II recoil pads on their butt-plates. Different thicknesses are available: 12mm, 20mm, 25mm or 32mm. These butt-plates enable you to adjust the length of your stock without difficulty.

TRIGGER SYSTEM IS A GLASS-BREAKER

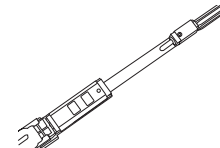

When you want absolute precision, this trigger system is short and incredibly direct. The trigger system offers you that rewarding sense of breaking a glass bar as you squeeze into a shot.

QUICK RELOADING SYSTEM

The servo bolt return system combines maximum safety, speed and efficiency.

Thanks to the time gained in the reloading phase, shooters can concentrate on their shooting.

BOLT-ACTION RIFLES - X-BOLT COMPOSITE BLACK

NEW X-BOLT COMPOSITE BLACK

The X-Bolt Composite comes with an over sized hexagonal bolt knob (changeable in option). The fluted barrel is also threaded (M14x1) ready for an easy mounting of a sound moderator or muzzle brake. An extra 7mm insert is included for perfect shoulder mounting and reduced recoil effect.

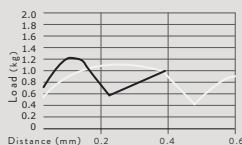

1

THE X-BOLT SF RANGE FEATURES A SHORT, CRISP AND DIRECT TRIGGER PULL

- Zero take-up.
- Minimum break.
- Limited overtravel.

The Super Feather Trigger pull, short, crisp and direct.

- Typical curve of departure.
- Trigger pull in action.

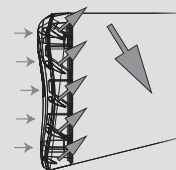

□ Competitor's pull curve
■ Browning's pull curve

2

INFLEX™ ANTI-RECOIL BUTT-PLATE

This extra-soft pad offers the best recoil absorption possible on a rifle. The exclusive design and material used promote a downward deviation of the direction of the recoil forces, thus pulling the gunstock slightly away from your face in order to reduce the recoil and upward motion of the gun.

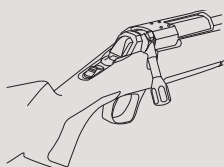

3

BOLT-UNLOCKING BUTTON

The bolt latch button works with the safety and can be used to safely remove the ammunition from the chamber.

ROTATING MAGAZINE

Made in light ultra-resistant polymer, it gives exclusive protection to bullet noses.

4

UTMOST ACCURACY

A free-floating barrel is essential for utmost accuracy. The X-Bolt SF's free-floating barrel is perfect due to double bedding i.e. positioning of the barrel/breech block assembly at two points with respect to the forearm, at the front and at the rear.

The standout feature of the Max Varmint version of the highly popular X-Bolt, which comes in a choice of five calibres, is its distinctive 24-inch semi-weight barrel complete with threaded end (M18x1). The X-Bolt Max Varmint has the modern Max type stock and is fitted with two Picatinny side accessory rails.

1

MAX TYPE STOCK

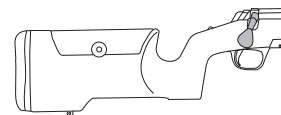

New composite "Max" stock with adjustable comb, ergonomic grip and 20 mm Inflex II recoil pad.

2

OVERSIZED BOLT KNOB

New oversized "tear drop" bolt knob for easy reloading.

BOLT-ACTION RIFLES - X-BOLT PRO CARBON

X-BOLT PRO CARBON

ULTRA LIGHT, ULTRA RIGID, ULTRA PRECISE

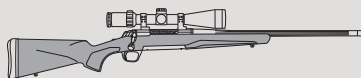

Your high standards are your greatest attribute. You won't accept failure. You need a gun that reflects who you are: efficient, accurate and focused on results. The X-Bolt Pro Carbon is designed for you. It handles with featherweight ease so that you can take your active hunting experience to a new level. The rigidity of the stock gives you even greater accuracy. The X-Bolt Carbon Pro is now available in 300 WM, 270WSM and 7RM calibres.

1

CARBON-FIBRE STOCK

The X-Bolt Pro Carbon is:

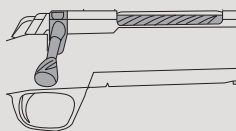

- Ultra-light.
- Ultra-rigid for uniform recoil distribution.
- Ultra-solid, compression-moulded carbon-fibre construction with a high-density foam core.

2

FLUTED BOLT AND BOLT HANDLE

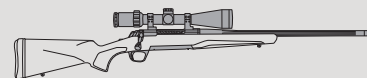

The externally fluted bolt and bolt handle provide smoother action for a rapid shot.

3

CERAKOTE "TUNGSTEN" FINISH

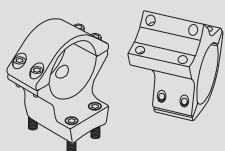

The X-Bolt Pro is Cerakote finished on all its metal components (including the optics) and on the magazine floor plate. The result is better resistance against any type of friction, abrasion and corrosion.

4

INTEGRATED MOUNTING SYSTEM

The integrated scope-mounting system has four screws per fixing point. Therefore it is more stable and provides greater accuracy.

5

DOUBLE BEDDING

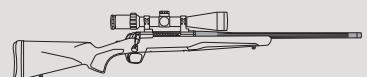

A free-floating barrel is essential for utmost accuracy. The X-Bolt SF's free-floating barrel is perfect due to double bedding i.e. positioning of the barrel/breech block assembly at two points with respect to the forearm, at the front and at the rear.

6

HIGH-PRECISION BARREL

The fluted barrel on the X-Bolt Pro ensures it stays cool and reduces weight. The barrel lapping process polishes away any traces of machining work, improving accuracy and reducing fouling.

Adjustable width comb (drop).

ERGONOMIC GRIP

For optimum handling during precision shooting.

SOLID BUILD, STYLISH AND ERGONOMIC.

BOLT-ACTION RIFLES - A-BOLT

A-BOLT 3 HUNTER LAMINATED BROWN THREADED

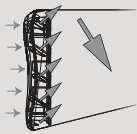

SOLID BUILD, STYLISH AND ERGONOMIC

This model of the A-Bolt 3 rifle shares the same special features as the A-Bolt 3 Hunter and includes a laminated stock for a modern style that doesn't compromise on efficiency.

1

INFLEX™ II ANTI-RECOIL BUTT-PLATE

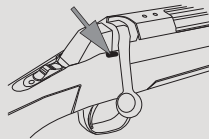

This extra-soft pad offers the best recoil absorption possible on a rifle. The exclusive design and material used promote a downward deviation of the direction of the recoil forces, thus pulling the stock slightly away from your face in order to reduce the recoil and upward motion of the gun.

2

UNLOCKING BUTTON FOR THE BOLT

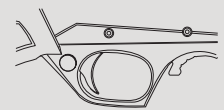

The unlocking button for the bolt ensures optimum security and is ideally placed on the back of the pistol grip. Can be opened in the safety 'on' position.

3

NEW PERFECT TRIGGER

For firing with absolute accuracy, there is no alternative to the A-Bolt 3 trigger action, sharper, short and ultra-direct. The trigger delivers a crisp and direct firing action for a thrilling shooting experience with an accurate shot.

4

BOLT AND HOUSING

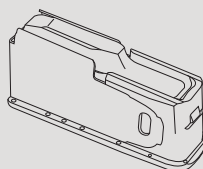

The A-Bolt 3 features a three pin bolt that offers extreme precision. The 60° opening of the bolt allows for a rapid and efficient cycle.

5

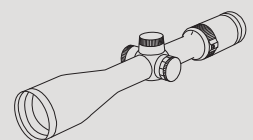

DROP BOX MAGAZINE

The essential accessory, the A-Bolt 3 is fitted with a state of the art drop box magazine. Its synthetic and steel construction can withstand any conditions.

KITE OPTICS, UNCOMPROMISING PERFORMANCE

Browning has teamed up with scopes specialist Kite Optics to develop top-grade, high-performance scopes and sights that combines tough, all-metal construction with precision mechanics. See the entire range at www.kiteoptics.com.

ACCESSORIES FOR RIFLES

BROWNING INTEGRATED SCOPE MOUNT

Our integrated scope mount avoids problems with alignment and eliminates potential loose base-to-ring connections. The ring and base form a single ultra-rigid unit machined from a 7000 series aluminium alloy.

CHOICE OF SCOPE RING HEIGHT (FOR RIFLES WITHOUT OPEN SIGHTS)

Standard (low) ring height for scopes up to a 44mm objective with a standard barrel contour.

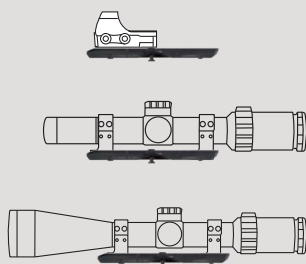

Intermediate (medium) ring height for scopes up to a 50mm objective with a standard barrel contour.

High ring (high) height for scopes up to a 56mm objective with a standard barrel contour.

BROWNING NOMAD

ULTRA-HIGH-PERFORMANCE REMOVABLE MOUNT

A full mount consists of a base rail **A** (single or multiple) matched to the gun and a top rail **B** that is specific to the scope. The base rails are available in SINGLE or MULTIPLE versions. The multiple is adjustable in windage and elevation, and lets you use the same scope on a second gun.

ONLY ONE ADJUSTMENT, MULTIPLE SCOPES ON MULTIPLE GUNS

More details on Browning Nomad mounts on www.browning.eu

PRECISE

The patented bolt technique gives perfect attachment, exceptional resistance and constant precision, whatever the scope used.

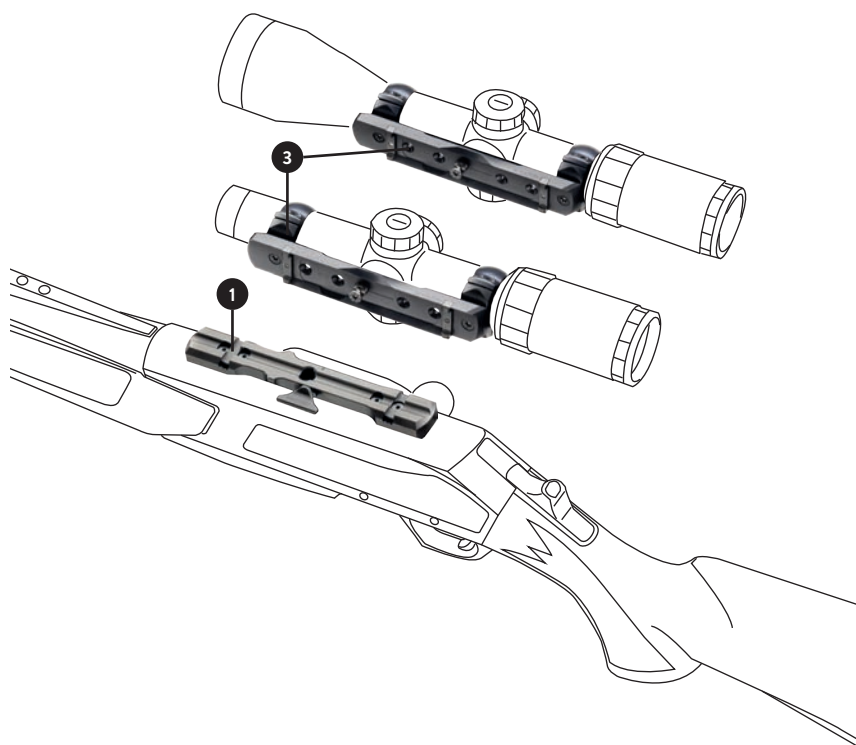

FAST

Using the thumbwheel attachment, change scopes fast, without running the risk of losing alignment.

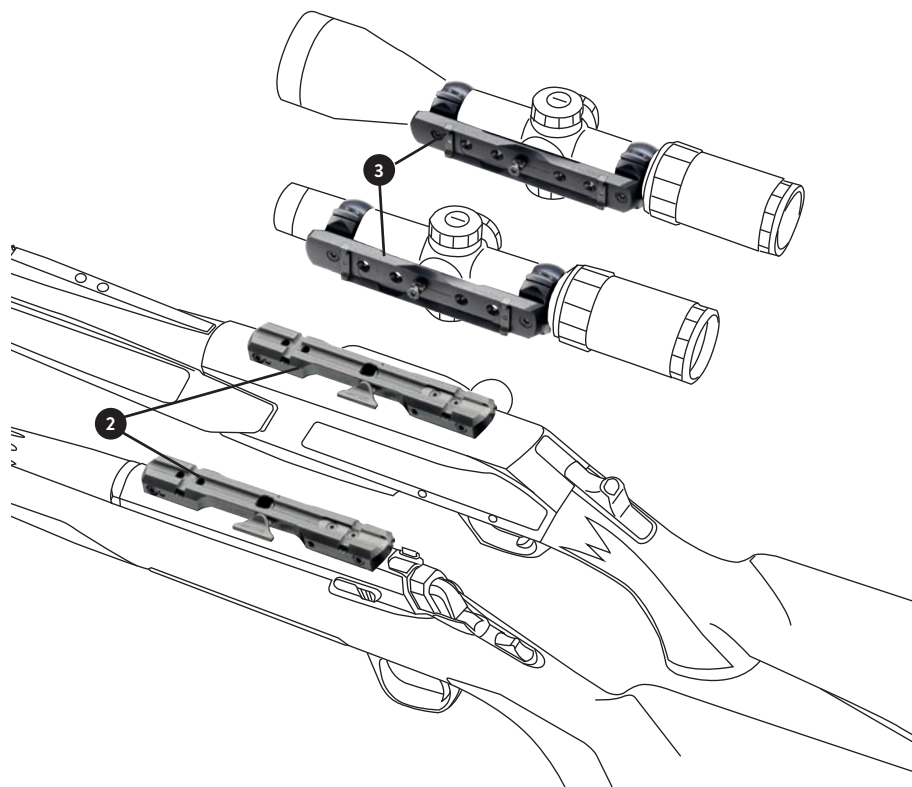

VERSATILE

With the NOMAD MULTIPLE base rail, adjustable in windage and altitude, you can now use all your scopes on any gun, without having to adjust your aim before each change.

AMMUNITION

BXS

MONOLITHIC LEAD-FREE

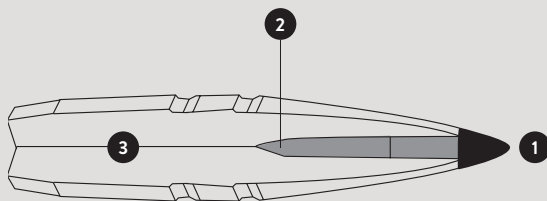

Lead-free

BXS

The Browning BXS is ideal for big game. Its monolithic copper construction provides near-100% mass retention. This means all its energy is saved to penetrate deep into even the thickest hides and ensure overwhelmingly lethal knockdown power. The polymer tip expands fast for maximum impact shock. The nickel-coated casings are corrosion resistant and make loading easier, promising a fast shot backed by guaranteed devastating knockdown power. And because Browning's BXS is lead-free, it can be fired in hunting zones that have lead restrictions in place.

- 1 Polymer tip**
 - Better long-range speed and energy retention
 - Faster expansion
- 2 Hollow Point**
 - Immediate expansion and massive energy transfer
- 3 Monolithic construction (copper)**
 - Near-100% mass retention
 - Deep penetration
 - Lead-free

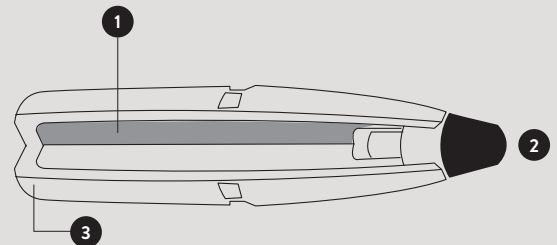

BXC / BXR

CONTROLLED EXPANSION

BXC

The new Browning BXC bullet is designed for heavy game where devastating knock down power and deep penetration are required. The bonded bullet design with a residual weight of almost 100% and the Terminal Tip allows for deep penetration through tough hide and bones. The brass tip, heavy bullet weight and boat-tail are integral components to delivering precision accuracy, maximum downrange velocity and long-range, on-target performance.

- 1 Bonded bullet**
 - Controlled expansion
 - Higher weight retention for maximum energy transfer and deeper penetration
- 2 Terminal tip (aluminium)**
 - Penetrates tough hide and breaks through strong bones
- 3 Heavy weight and boat tail design**
 - Increased downrange velocity, accuracy and energy

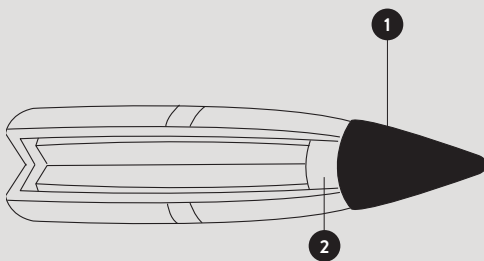

RAPID EXPANSION

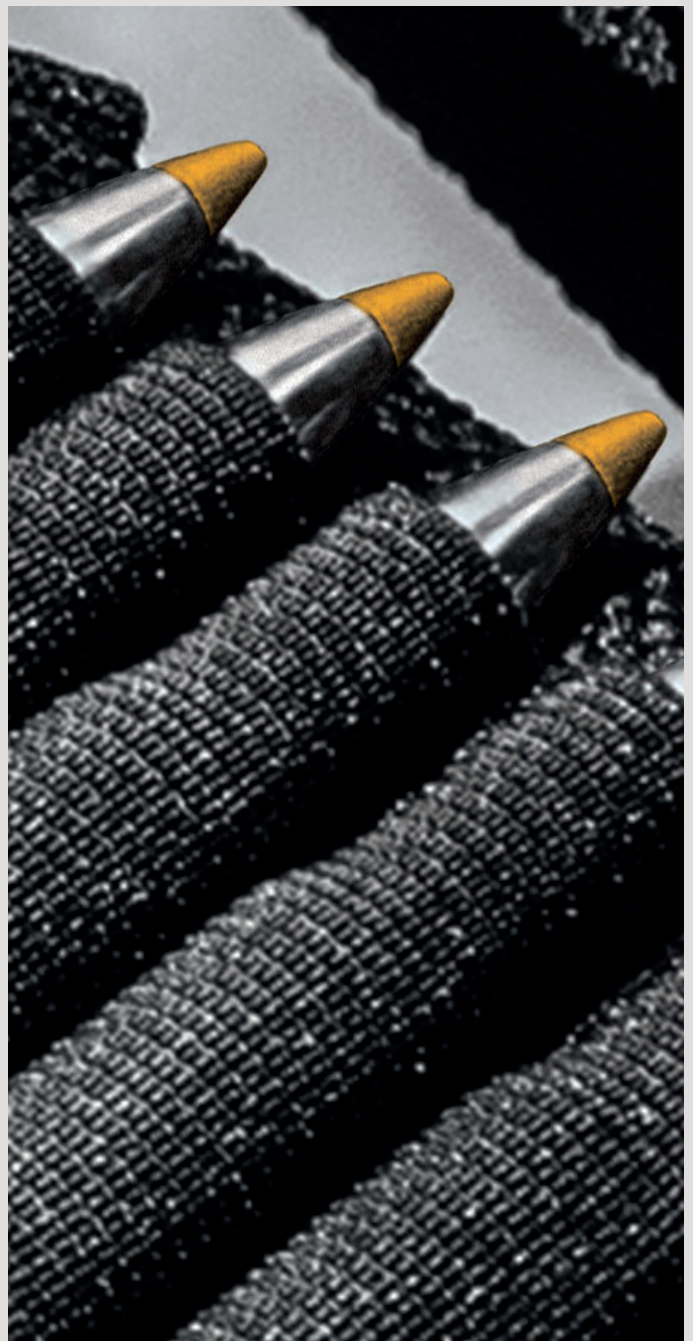

BXR

BXR Rapid Expansion Matrix Tip is designed specifically for use on medium game such as roe deer or wild boar. The proprietary matrix tip design allows for high downrange velocity and energy retention while also initiating rapid positive expansion. The jacket and tip combination yields precision accuracy, rapid energy transfer and generates massive knockdown power.

- 1** Matrix tip (mix of copper and polymer)
 - High downrange velocity and energy retention
 - Initiates rapid expansion
- 2** Hollow point
 - for rapid expansion and maximized energy transfer on medium game

MIROKU - HUNTING & SHOOTING

MIROKU, JAPANESE TECHNOLOGY

Having been making Hunting Guns since 1893, Miroku not only benefits from a great gun-making experience, but also from the Japanese tradition of precision work with steel and wood. Because of this heritage, the Miroku guns are technically perfect and pleasing to the eye.

GUARANTEE OF PERFECTION

Before leaving the factory, all Miroku shotguns sold in Europe have to pass a stringent accuracy and reliability test involving the use of an electronic pattern plate, as well as the CIP (International Gunpowder Committee) tests which are renowned for their rigorous standards.

JAPANESE
TECHNOLOGY

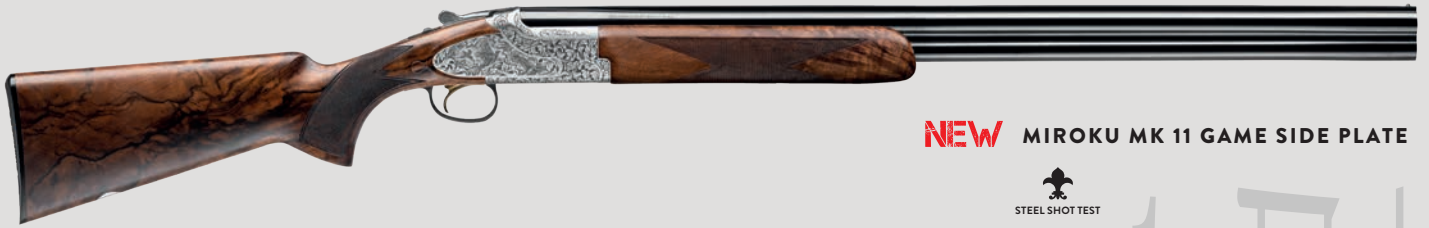

ATTENTION TO DETAIL

For strength, action and barrels are made from selected chomemolybdenum alloyed steels. All Miroku shotguns have actions forged from a single piece of steel thereby guaranteeing fundamental structural integrity. The nitride finish on the action and the blueing of the barrels increase their resistance to wear, corrosion and other signs of ageing. Each load-bearing part also undergoes a thermal treatment which further enhances the gun's durability.

Miroku barrels are internally chromed, except in the choke area, which allows the owner to adjust the choke as required. Standard models have an «old silver» finish and all are engraved, whilst the higher «luxury» Grades have profuse hand-finished engraving, continuing a centuries-old tradition.

For all Miroku shotguns, quality is constant, their strength is legendary and they are safe in operation. In the hand, their balance is perfect, and as one has come to expect from Miroku, the finish is impeccable.

NEW MIROKU MK 11 GAME SIDE PLATE

YOUR GUN IS MUCH MORE THAN A TOOL.

It is the expression of your deepest wishes and who you are.

Nothing but the best pleases you. When you saw the Miroku MK11 Side Plated, you knew straight away that this over-and-under is made for you. This fine gun combines an ultra-low action frame with the renowned inertia operated system of the Browning B525.

The engraved hunting scenes are like the wood: magnificent.

弥勒

DESCRIPTION MIROKU MK11

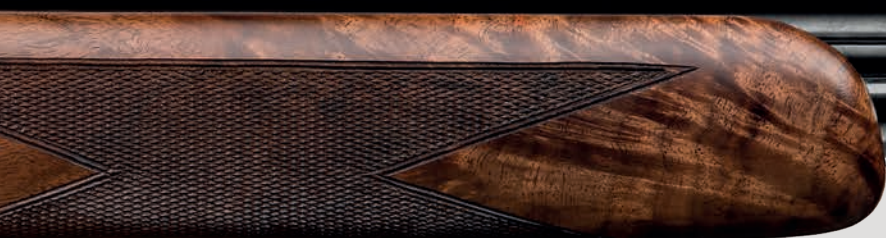

- **Stock :**
 - Grade 4 walnut
 - Pistol grip and splinter hunting fore-end
- **Action frame :**
 - Steel
 - Grey finish (nitride coated)
 - Ultra-deep engraving, pheasants and partridges
- **Barrels :**
 - Blued barrels
 - 6 mm solid top rib
 - Silver front sight
- **Shooting comfort & Performance :**
 - 5 Invector+ chokes
 - Black Pachmayr recoil pad
- **Packaging :**
 - Black Opaline carry case
- **Gauge :**
 - 12/76mm

THE MIROKU MK11: AN INNOVATIVE AND ELEGANT NEW PLATFORM

The Miroku MK11 is like a fine hand-crafted jewel that you never tire of admiring. First of all, this side-plated shotgun is an absolute treat for the eyes. The engraved pheasants and partridges are particularly deep, giving life and dimension to the motifs. Add in the high standard of hand-checked wood, the teardrops and the lovingly crafted finishes, and you have a gun that sets new standards of elegance.

But the MK11 Side Plated is more than just a work of art: it's a technological revolution, offering an unprecedented combination of two important components - an ultra-low action frame and an inertia operated system. The ultra-low action frame gives a much faster aim and better recoil absorption, while the inertia system, which is also a feature of the Browning B525, is unfailingly reliable and lowers the final price of the gun.

The Miroku MK11 Side Plated is certain to make a name for itself among fine-gun enthusiasts!

SHOOTING CLOTHING

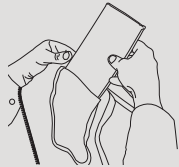

NEW AND MORE ERGONOMIC FIT, BETTER SUPPORT AROUND THE WAIST.
REDUCES THE NOTICEABLE WEIGHT OF THE CARTRIDGES.

1

TWO REACTAR™ RECOIL PAD POCKETS

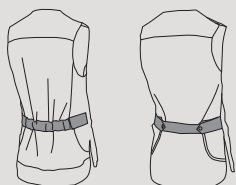

However hard you train, the repeated impacts against your shoulder are also going to impact your performance. The Reactar™ pad absorbs a large proportion of the recoil so that you can keep your mind on the target.

3

ELASTICATED BELT WITH BUTTONS

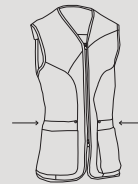

The weight of the cartridges can hamper your movement when you're taking the shot. The new comfort-fit elasticated belt on your Browning vest puts the weight of the cartridges on your hips instead of your shoulders for smooth and unhindered movement.

2

NEW SLIM FIT

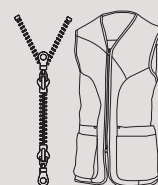

A poorly fitting vest won't help you get that perfect swing, and your performance will suffer. The new slim-fit Browning vest is perfectly tailored to your body, moves with you, and lets you show exactly what you can do.

4

TWO-WAY ZIPPER

Our designers have added a two-way zip so that you can adjust your vest perfectly to your body shape. Now your vest will always provide the perfect fit, your shots will be more relaxed and you'll be at the top of your game.

SAFETY REINVENTED.

RANGE OF SAFES

EN 1143-1 Grade 0
+ UL RSC certified

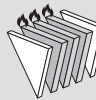

180° door
opening angle

Nine permanent and
mobile bolts

Electronic lock

Fire resistance:
90 min at 915° C

Maximum security

BROWNING PROSTEEL SAFES: SAFETY MADE SAFER

The Browning range of gun safes combines security with fire resistance. With up to 90 minutes fire resistance and European standard forced-entry resistance you can be sure of unparalleled secure storage for your guns and valuables. The customisable interior layout, elegant exterior finish and maximum security offer storage solutions with style.

DOG PROTECTION

DOG PROTECTION AND ACCESSORIES

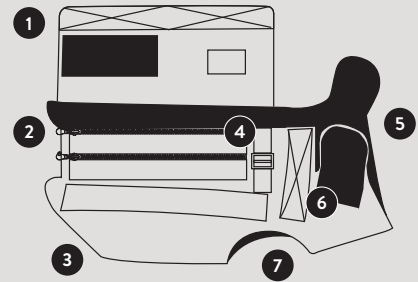

PROTECT PRO

DOG SAFETY REINVENTED

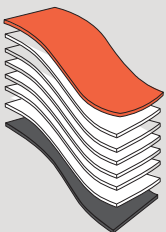

A range of dog vests that provide maximum visibility, a Cordura outer layer to protect your hunt dog against aggressive environments, and a perforation-resistant Dyneema inner layer to protect against boar attacks.

1. Cross-stitching on all velcro fasteners for extra strength
2. YKK zip for extra hard-wearing performance
3. High-tensile thread, higher thread weight and anti-abrasion treatment
4. Adjustment strap (Pro-Hunter range), perfect fit with no strain on the zippers
5. New ergonomic cut, freer head movement for your dog
6. Longer flap, better adhesion
7. Enclosed seams, no overlay so less risk of injury

COMPOSITION OF PROTECT DOG VESTS

FROM FIVE TO EIGHT LAYERS

- External side Cordura 600-1100 DTEX
- Up to four Dyneema® puncture-resistant layers
- Two thermo regulating layers (Pro and Evo)
- Puncture resistant up to 300kg
- One interior surface

K6 RANGE

LIGHTER, SMARTER, FASTER!

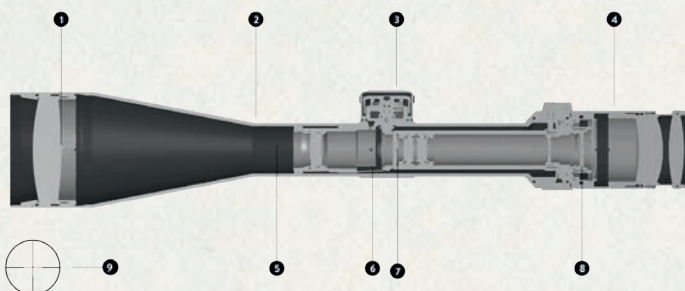

The latest generation KITE OPTICS 6x zoom rifle scopes feature an all new new design. The K6 scope has a lower weight and new intelligent functions of illumination. The elegant yet modern looks of this single tube scope, were brought to life by one of Europe's most reknown design studios.

The instrument combines the highest level of light transmission with extraordinary image performance and the great 6x zoom factor. A perfect match between high precision components and a state-of-the-art manufacturing and assembling process. In the large field of view sits a thin 4A reticle with a brilliant and sharp illuminated dot. Allowing fastest, safest and most accurate target acquisition.

The K6 is equipped with intelligent and practical features. Battery life of this scope is maximized by the APC (angle power control) system. When your weapon is put upright or is laying down on its side, the illuminated dot automatically goes to sleep mode and will activate again when you take it out of this position. It has a timer auto switch off (3h) and it will also tell you when battery power is low, so you have the time to take a new battery from the spare battery compartment and continue your hunt without any frustrations. All these features can be deactivated in case you wish to do without.

K6 2.5-15x56i

Features :

- 1 MHR-coated for accurate detailing and 93% light transmission
- 2 Anodised aluminium tube for secure and reliable mounting
- 3 Easily adjustable turret with return-to-zero ability
- 4 Ultra hard-wearing aluminium magnification-adjustment ring
- 5 Argon-filled tube for all-weather use
- 6 Brass tube and turrets for long-lasting, accurate reticle-to-target dial-in
- 7 Spare battery compartment
- 8 Sharp, fine and clear, adjustable illuminated dot
- 9 Ultra-fine 4A1 reticle with auto-off feature, for maximum light transmission and minimum target concealment

WINCHESTER®

A CULT BRAND

AN ICON OF HUNTING
AND RECREATIONAL SHOOTING
RENOWNED BEYOND THE FRONTIERS
OF GUN DEALERSHIPS

WINCHESTER® is not just a brand; it is a big gun of the hunting and recreational shooting world, an iconic name known throughout the industry and by hunters and non-hunters, too.

WINCHESTER® is the pioneer behind the lever-action rifle and firearm cartridges. It has taken its quick reloading rifles and now legendary ammunition calibres to the four corners of the globe.

This deep-rooted desire to innovate has been a motivating force behind WINCHESTER® for more than 150 years, driving us to create the products that take the industry forward and exceed consumers' expectations.

STAY TRUE

Simple moments

**THE AGE OF
THE COWBOY
IS NO MORE,
BUT THE
PIONEERS' SPIRIT
OF ADVENTURE
LIVES ON**

ONLY THE AUTHENTIC

Stay true to yourself

The WINCHESTER® man lives his passions to the full, and embraces the challenges posed by the elements, by his quarry, and by himself. He uses current camouflage technology as much as the natural environment and the cover provided by reeds or leafy boughs.

THE SIMPLE LIFE

Live it, simply

The WINCHESTER® man is calm and collected, contented in the beauty of a landscape or the feeling that comes

from a perfect shot. He likes being in touch with the forest when on station, the mud on his boots and the wind that whips his face. He enjoys nature because it doesn't lie and reinforces his own values of humbleness and commitment.

FREE MEN

Follow your own path

Like the early cowboys, the WINCHESTER® man satisfies his thirst for adventure. For him, anything is possible! He doesn't want to be a bystander watching in comfort as the action happens – he wants to be in the thick of the hunt, up close to the quarry.

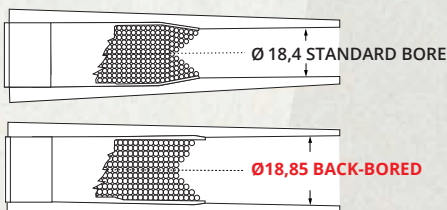

**PRODUCTS YOU
CAN TRUST**

Select

**Whether you're a clayshooter
or a small-game hunter, WINCHESTER®
has the gun you can trust
to match your ambition**

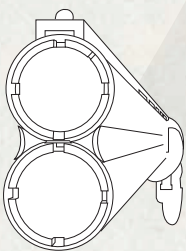

Competition is in your blood. You were born to push the limits and set new standards.

Your Select™ is your greatest ally. Its low action frame enables you to reach the target faster than the other shooters. Your finger fits the adjustable trigger perfectly. The buttstock merges into the hollow of your shoulder. The shot fires. You have forgotten what the word 'miss' means.

BACK-BORED™ BARREL

Back-Bored™ Technology makes better use of your cartridge's capability. Back-Bored™ barrels ensure better shot distribution and less shot deformation before impact.

Barrels proofed for

STEEL PELLETS

Steel shot proofed.

All WINCHESTER® Select™ over-and-under shotguns, are tested with high performance steel shot at 1370 BAR, which allows you to hunt in all conditions and to shoot traditional cartridges as well as those with steel shot without damaging your barrels.

The hard chrome plating ensures durable surface wear resistance and is the best protection against dust and corrosion.

**LIGHTER,
FASTER AND
MORE ERGONOMIC**

*Having spent a lot of time
with the new SX4™, its efficiency
and aim are beyond compare*

Nothing compares to roaming across fields with your dog and your SX4™. The hard work will bring its reward as you enjoy what you bring home by the fire with your family.

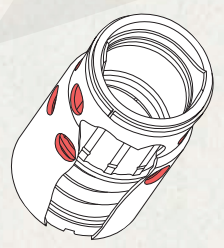

Suddenly, your faithful friend is off like a shot: he's just flushed a brace of hare. You shoulder your gun. The open sights let you home straight in on the first of them. You shoot. With the Active Valve system, recoil is not an issue and the second hare is in your sights in an instant. You fire again. It's a long-range shot, but with your Back-Bored™ barrel, it's in the bag.

 Steel shot proved.

BACK-BORED™ BARREL

Back-Bored™ technology makes better use of your cartridge's capability. Back-Bored™ barrels ensure better shot distribution and less shot deformation before impact.

ACTIVE VALVE SYSTEM

The SX4™ is redesigned to be the most reliable and the fastest semi-automatic shotgun with the least possible recoil. It operates as simply as possible through the use of a gas piston with an 'Active Valve' that adjusts automatically so you can use a wide range of different loads.

RANIERO TESTA RECORD SHOOTER AND HUNTER

Famous Italian shooter and multiple world-record holder Raniero Testa shares his secrets about being a champion and ardent hunter.

There's the Raniero with the rockstar appeal who pulls in the crowds to each of his shows. He broke his latest world record in April 2019, shooting 14 hand-thrown clays in under two seconds with his SX4™. Then there's the Raniero who enjoys the peace and quiet and being in touch with nature when out hunting. "My most memorable time hunting is on my home island of Ponza," he explains. "It's a unique place, where you need special permission to hunt. I wait for the migrating birds to fly by, looking out across the Tyrrhenian Sea, off the coast of Naples. There's no other experience I can compare it to."

Which leads to the question: how does one of the top sports shooters in the world pursue his passion for hunting? "They're two totally different things. Hunting is a lifestyle, not a sport," he states. "The most important thing to bear in mind when hunting is respect. We're there to maintain a natural balance, not to shoot. Respect for the game and safety come first."

THE PUMP-ACTION SHOTGUN OF LEGENDARY ACCURACY

SXP™

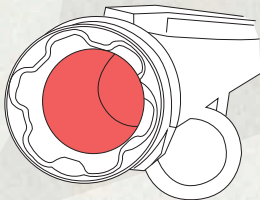

***The speed and reliability of the SXP™
make it a formidable gun
for competitive shooting***

The stock firmly shouldered, you make your way to your stand. The rotating bolt gives you full confidence in your SXP™. You are king of the game. A target appears; you squeeze the trigger. A perfectly consistent pattern of lead knocks it down.

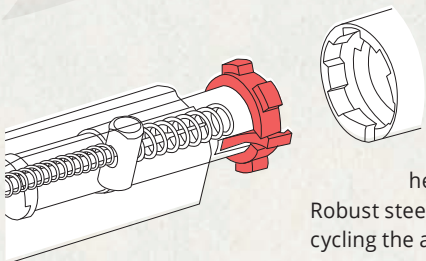

The 18,85 mm Back-Bored™ barrel system proves its worth once again. With its minimum recoil, you can chamber a new round instantly. Another shot, another target down.

When the shooting is over, it only takes a few seconds to remove the drop-down trigger assembly.

Maintenance is as simple and intuitive as firing.

The hard chrome ensure highly ruggedized surfaces and better protection against corrosion. The CHROME-PLATED bore and chamber make our SXP™ shotguns completely safe for firing steel and other high-density shot.

Four massive **ROTARY BOLT LUGS** provide support, strength and solid lockup in the barrel. As it recoils, the mass of your body slows the rearward travel of the shotgun, while the inertial motion of the bolt, slide and forearm continue cycling the action to give you a head start ejecting the fired shell.

Robust steel dual action guide bars eliminate the twisting and binding that waste time and energy when cycling the action.

**RELIABLE, PRACTICAL,
EFFECTIVE**

SXR²

Hunting is about trust: trusting yourself and trusting your lucky star. For thirteen years, thousands of hunters around the world have developed a unique bond with their SXR Vulcan semi-automatic. Its speed, safety and reliability make it a reference among driven-hunt enthusiasts. Now, with the perfect response to the changing needs of hunters, Winchester is proud to announce the arrival of the SXR².

ERGONOMICS AND COMFORT DRIVING PERFORMANCE

How a gun handles is a key factor for a successful day's hunt. And because we are well aware that Winchester hunters thrive on results, we have been working on a whole range of parts to improve your shooting experience with the SXR².

SXR² THE BASICS

The success of the first-generation SXR was built on its accuracy, reliability and safety. Ever mindful of keeping our customers satisfied, we have kept those components that will make the SXR² a success.

- **RELIABILITY:** the gas-operated system is unchanged. It is unfailingly reliable and can be adjusted if needed.
The result is a gun that can use subsonic munitions, a sound moderator, heavy scope, etc.
- **ACCURACY:** the cold-hammered barrels are made at FN Herstal, which is renowned for the quality of its barrels for civilian and military use.
- **SAFETY:** the seven-lug bolt gives the shooter unrivalled safety.

SXR² AT A GLANCE

- **BARREL:** 53 cm
- **STOCK:** Composite or Field (walnut)
- **OPEN SIGHTS:** yes, easily adjusted
- **ADDITIONAL ACCESSORIES AVAILABLE TO BUY:**
 - K1 Reflex red dot sight for instinctive aiming
 - Adjustable cheek rest from Kalix
 - NOMAD+ Fix mount (integrated rings)
 - 25 mm or 30 mm Inflex II recoil pads
 - 7 mm stock insert
- **ACCESSORIES INCLUDED IN THE BOX:**
 - Trigger lock
 - Stock adjustment inserts
 - 15 mm Inflex II recoil pad
 - Sling rings
- **CALIBRES:** .308 Win, .30-06 Spr., .300 WM, 9.3x62

SXR² NEW FEATURES

1 STOCK:

- PISTOL GRIP: redesigned to give you the perfect grip, including with heavy recoil calibres.
- AMBIDEXTROUS PALM SUPPORT
- CHECKERING: fresh and dynamic new style checkering for a firmer hold.
- INFLEX II RECOIL PAD: the SXR2 comes with the Inflex II recoil pad, which is outstandingly flexible and absorbs recoil like no other. A 7 mm insert and 25 mm and 30 mm Inflex II recoil pads are available as accessories.
- STOCK INSERTS: for vertical and lateral stock adjustment.
- ADJUSTABLE CHEEK PIECE: an adjustable cheek piece from Kalix is available to buy and fit to the composite stocks.
- COMPOSITE STOCK: in a change from the SXR, the SXR² is available in a composite version.

2 FORE-END:

- FORE-END: 10% more tapering to ensure total control of the gun.
- CHECKERING: fresh and dynamic new style checkering for a tighter hold.

3 BOLT:

- SLIDE CATCH: with the new slide catch, you can keep the breech open so that you and your fellow hunters around you can see that your gun is not loaded. This new feature also makes loading and unloading more comfortable.
- OVERSIZED BOLT HANDLE: easy to handle, even with gloves on.

4 SIGHTS:

- OPEN SIGHTS: new front and rear sight for instant target acquisition.
- MOUNTING RAILS AND RINGS: compatible with fixed rings or with the Browning NOMAD system.
- KITE OPTICS K1 REFLEX: compatible with the K1 Reflex system from Kite Optics, allowing you to place your K1 red dot in an ultra-low position for an instinctive aim.

AN ICONIC FIREARM

MODELTM 70

***The ‘Rifleman’s Rifle’:
the benchmark against which
every other bolt-action rifle is measured***

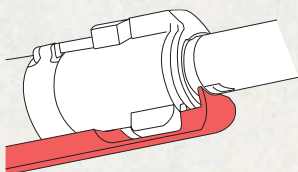

You’ve been aware of the fox for a week now. Every day, at the same time, you watch him prowling around at the edge of the wood. Unsuspecting, he roots around peacefully. He has no way of knowing you’ve just got an M70™.

Taking up position, perched in an old oak tree, you load your M70™. You close the breech smoothly. You closely scan the edge of the forest with your binoculars. This is his usual time. He won’t be long now. When the moment comes, he won’t stand a chance.

M.O.A.TM TRIGGER SYSTEM

The M.O.A.TM trigger adds to the outstanding accuracy of the legendary M70™. The system uses pivoting levers that release the pin cleanly and quickly for maximum accuracy and triple-zero performance: *zero take-up, zero creep, zero overtravel.*

CONTROLLED ROUND FEED (CRF) BOLT

The large claw extractor slides smoothly and contacts a significantly larger area of the cartridge base than a classic extractor. The cartridge is perfectly controlled between leaving the magazine and being chambered. This proven concept allows the extraction of an unfired cartridge even if it has not been completely introduced into the chamber.

PRECISION,

PERFORMANCE,

WINCHESTER XPR[®]

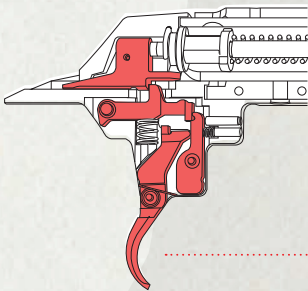

XPR[™]

WINCHESTER[®] XPR[™]:
the straight-shooting accurate rifle

You've been waiting months for this moment. A wheat field, bordered by thick forest, stretches around you. The reddening sun slowly sinks behind a hill.

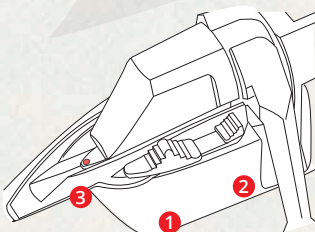

All you can hear is the rustling of leaves. All of a sudden, the sound of a crow cawing. It's the signal.

Looking through your scope, you can see a lone boar at 150 metres. Half-hidden in the undergrowth, it pauses. Is it time to move out into the open yet? It decides to risk it. Your finger strokes the M.O.A.[™] Trigger System on your XPR[™]. It's a great shot. The boar drops instantly. Adrenalin levels return to normal.

XPR[™] M.O.A.[™] TRIGGER SYSTEM

The XPR[™] has a major advantage that makes it an extremely accurate rifle: its M.O.A.[™] Trigger System. The trigger was originally developed for the WINCHESTER[®] Company's legendary M70[™], and uses a system of pivoting levers that release the firing pin cleanly and at great speed for maximum accuracy. The result is triple-zero performance: *zero take-up, zero creep, zero overtravel.*

Two-position
SAFETY

The XPR[™] has a dual safety system that consists of a conventional on/off mechanism and a bolt safety feature. The bolt release button **2** positioned in front of the conventional safety button **1** lets you load or unload with the gun on safe, i.e. with the traditional safety button in the on position. For even greater safety while hunting, you can see at a glance whether the firing pin is cocked or not by the cocking indicator on the bolt head **3**.

NEW
WILDCAT®
SEMI-AUTOMATIC .22LR

NEW WINCHESTER WILDCAT 22 LR

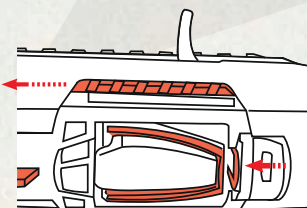

Faithful to its tradition of innovation, WINCHESTER® is now offering a .22 LR semi-automatic rifle that is set to become a reference in its sector: the Wildcat.

This new platform with a decisively modern look promises to be a concentrate of pleasure for all shooters.

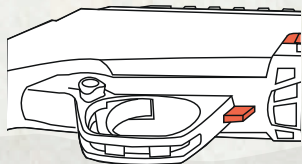

LOWER RECEIVER

The lower receiver assembly of the Wildcat™ is easily removed from the upper assembly by pushing a single button located at the rear of the upper assembly with your finger. No tools are required. The manual safety button is easily reversible so it's perfect for both right- and left-handed shooters.

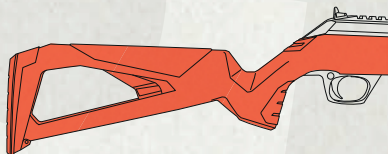

THE MAGAZINE

The magazine ejects right into your hand. The magazine release is fully ambidextrous by using the side-mounted rails or the release tab just forward of the magazine.

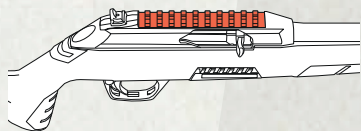

THE SLIDE LOCK BUTTON

The slide lock button on the front of the trigger guard allows you to manually lock the action open for added safety during storage or transporting.

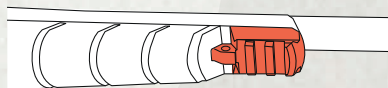

HIGHLY ERGONOMIC

The Wildcat™ features a highly ergonomic ambidextrous molded polymer stock with skeletonized buttstock, upright ribbed pistol grip and rugged textured matte finish.

THE UPPER ASSEMBLY

The upper assembly has an integral Picatinny top rail so you can easily add your choice of optics or electronic sights.

RAIL PICATINNY

A Picatinny rail section on the underside of the forearm tip lets you attach an optional bipod, sling mount, light or other accessory. The included rail cover protects your hand from the rail's edges and corners when accessories are not attached.

A NEW PACKAGING STRUCTURE WITH 4 FAMILIES TO PICK THE RIGHT CARTRIDGE

Starting autumn 2020, WINCHESTER shotshells packaging will be upgraded to a new visual identity. This attractive look and feel reflects the new WINCHESTER brand identity and helps inform and empower professionals and users in their decision-making. The way product information is organized and represented on our packaging is optimized to achieve more consistency and clarity across the product line.

NEW WINCHESTER EXTRA

The best of the WINCHESTER expertise

- The promise of the optimized results for specific games and end uses
- Deep black means elegance and rigor
- The macro imagery of the game highlights the recommended end use

WINCHESTER PERFORMANCE

The WINCHESTER iconic shotshells

- ZZ Pigeon, ZZ Canard, Super Speed, Rack Master... Their performances always meet your highest expectations
- The black wood design translates their strong personality
- Colorful game imagery raises emotion

WINCHESTER HERITAGE

The WINCHESTER popular shells in hunters pockets for decades

- The good old friends you can always rely on!
- Grey wood design for an atmosphere of authenticity
- Colored game imagery on neutral environment emphasizes the end use

WINCHESTER SUPER

The WINCHESTER competitive cartridges with no compromise on quality

- Neutral background stages the WINCHESTER logos
- The key selling point is the WINCHESTER brand and all that it means to hunters and shooters

A PACKAGING DESIGN THAT HELPS YOU!

1. Strong and modern WINCHESTER brand identity
2. Color code of the respective family
3. Emphasized sub brand
4. Usage clearly identified by a large game imagery
5. Easy to read key technical information:
 - Caliber picto with a specific color for increased safety
 - Special components or materials shown in dedicated area
6. Main user benefit

WINCHESTER

BIG GAME

AMMUNITION

A WINCHESTER® BULLET FOR EVERY TYPE OF GAME

Our rifle ammunition is the result of detailed research to bring you the perfect bullet for each type of hunt.

Each one of the technical solutions used reflects the ballistics expertise of our engineers and the experience in the field that went into making them.

Our experience brings you WINCHESTER ammunition suited to any specific purpose.

MEDIUM GAME

The thin hide and limited density of roe deer, mouflon and fallow deer need a bullet that expands rapidly on impact. Go for the traditional Power Point or the Ballistic Silvertip for knockdown power and controlled expansion behind the plastic tip that hits with legendary precision.

SEE PAGES 52-53 FOR PRODUCT INFORMATION

	POWER POINT	BALLISTIC SILVER TIP
KNOCKDOWN POWER	●●●●○	●●●●○
PENETRATION	●○○○○	●○○○○
LONG DISTANCE	●●●○○	●●●●●
MINIMAL MEAT DAMAGE	●●●○○	●●●●○

MEDIUM TO HEAVY GAME

The unique design of the Extreme Point lead core and monolithic (100% copper) Extreme Point Copper Impact stops any game with outstanding accuracy and devastating knockdown power at any range.

SEE PAGES 54-55 FOR PRODUCT INFORMATION

HEAVY GAME

For heavy animals, a maximum retention of mass ensures the transfer of energy necessary and a profound penetration into dense tissue. Fusion loads, such as Power Max Bonded and Accubond CT, are the ideal ammunition for large boar, red deer or elk.

SEE PAGES 56-57 FOR PRODUCT INFORMATION

VARMINTS

Vermin is nimble and light with thin hides. Varminting requires accurate ammunition that expands instantly on impact. The Varmint-X and Varmint-X Leadfree are available in .223 Rem, 22-250 Rem and .243 Win, offer good wind stability, and can be fired at very long range.

REMARKS

A large area of the page is filled with horizontal dashed lines, providing space for handwritten remarks.

(*) Recommended Retail Price : The retail prices will be determined by the retailers based on their own commercial policy.
Indicative weight, real weight may vary depending on wood density / Le poids est indicatif et peut varier en fonction de la densité du bois de la crosse et du garde main.

GENERAL CONDITION OF SALES

- General Provisions**

All Contracts concluded by Browning International (hereinafter referred to as "Browning") on the basis of orders and/or order forms sent to it, written or verbal, shall be governed by the present General Conditions of Sale, which are assumed to be known to and accepted by the Purchaser and prevail over all general or specific clauses or conditions from which the Purchaser may benefit, most notably his General Conditions of Purchase. Browning reserves the right to modify the present General Conditions at any time. Our Specific Conditions of Delivery, although they are the subject of a separate document, form an integral part of our General Conditions of Sale.
- The following terms used in the present General Conditions of Sale have the definitions given below :

 - "Products": all the goods sold, marketed and/or distributed by Browning;
 - "Contract": each order and/or order form duly and expressly accepted by Browning;
 - "Purchaser": any client of Browning who has issued an order and/or order form duly and expressly accepted by Browning;

Formation of the Contract

The commercial proposals issued by Browning are made without commitment. Browning shall have the right to require all orders to be shown on a written order form, which shall only be binding upon Browning after express acceptance by Browning, regardless of what the previous practice with the Purchaser may have been. Commitments made by third parties, especially agents, shall not be binding upon Browning until after written approval from Browning.
- Cancelling an order**

When exceptional circumstances justify such action, Browning may cancel an order previously confirmed in writing. Browning shall immediately advise the Purchaser of the cancellation. In this case, both Parties shall meet together in order to determine the best way of remedying this situation.
- Prices**

The Product prices indicated on Browning's tariffs are for information only, and may be subject to alteration without any warning. The prices invoiced to the Purchaser shall be those of Browning's tariff in force at the moment of delivery. If the price of the Products ordered but not yet delivered has increased by more than 15%, Browning shall warn the Purchaser before the Products are delivered, and the Purchaser may cancel his order in writing within 8 days of the said notification by Browning. Unless the provisions of our Specific Conditions of Delivery stipulate otherwise, the cost of transportation, packing and insurance, and all taxes or similar charges shall be payable by the Purchaser.
- Incidents / Risks**

Unless the provisions of our Specific Conditions of Delivery stipulate otherwise, the Products ordered from Browning shall be delivered straight from our factory ("ex works" according to the stipulations in the most recent current edition of Incoterms). The Products shall travel at the risk and peril of the Purchaser.
- Deliveries and delivery deadlines**

The Purchaser shall check that the products are satisfactory on delivery. In particular, this check should cover the references, quantity and quality of the Products and their consistency with the order. Delivery dates are given for information. Delayed delivery or failure to deliver for any reason whatsoever shall not authorise the Purchaser to cancel or terminate the Contract, and moreover shall not confer the right to any withholding, penalty, compensation or damages with regard to Browning.
- Complaints**

Complaints shall only be accepted if they are sent to Browning in writing, together with all the required supporting documentation, within a maximum of 10 working days from receipt of the Product. If it is agreed that the Products supplied are defective or do not comply, Browning shall be obliged merely to replace the Product or refund its value as invoiced, without being held liable or any compensation being payable by Browning in any way whatsoever.
- Returned Products**

Returned Products, for exchange or taking back, shall only be accepted if they have been or are the subject of a prior express agreement by Browning's commercial department. In the event of acceptance, a return acceptance number shall be given to the Purchaser in the form of a specifically designed returns form. This number must be clearly shown on the package, which must be returned in its original packaging and accompanied by a copy of the invoice relating to the Product. All returns must be sent carriage paid, unless previously agreed otherwise. In no circumstances may ammunition, primers, separate parts, viewfinders showing traces of mounting or outdoor Products be returned or exchanged. Returned Products may only be credited by Browning after acceptance in the company's establishments if they have been the subject of prior acceptance by Browning and are in perfect condition. Administration costs totalling 20% of the net price of the Products shall be deducted by Browning from the total refundable to the Purchaser.
- Payment**

Unless specific conditions in the invoice state otherwise, invoices shall be payable by the Purchaser:

 - either in cash 10 days from the date of the invoice, with a discount deducted;
 - or 60 days from the date of the invoice.

When Browning notes a simple delay in payment, it shall have the right to demand payment on demand or a guarantee for any Purchaser's outstanding orders. Invoices sent by Browning may only be disputed by the Purchaser in a registered letter within a period of 10 working days of receipt. After this deadline, the Purchaser shall be deemed to have irrevocably accepted the invoices. Without notice and other formality, failure to pay any invoice on its due date shall automatically lead to the imposition of a fixed contractual increase of 15% of the price and a minimum charge of EUR 25,00 as stipulated damages to cover administrative and legal costs, as well as conventional interest calculated on the basis of the official rate in Belgium plus 3% per annum. All this shall be without prejudice to any damage that Browning may otherwise be entitled to. In addition, failure to pay any invoice by its due date shall render all other debts owed by the Purchaser to Browning payable immediately and in full, regardless of the planned method of payment, and shall confer upon Browning the right to suspend all of the Purchaser's outstanding Contracts.
- Reserve of ownership**

The Products sold shall remain the exclusive property of Browning until the agreed price is paid in full, without this reserve of ownership modifying the Product risk burden borne by the Purchaser. Instalment payments may be kept in order to cover possible losses on resale. The Purchaser shall be required to keep the Product in good condition and keep them constantly identified before being used. The Purchaser shall not give the Products as security or guarantee before their price has been paid in full. In addition, Browning shall benefit from all rights that protect or guarantee sellers within the country of the Purchaser.
- REACH (Registration Evaluation and Authorisation of Chemicals)**

Our Products are manufactured, imported and / or marketed in accordance with data received from relevant suppliers, if any, about the pre-registration, registration and / or uses of substances and / or preparations they may contain pursuant to obligations imposed on said suppliers by European regulation 1907/2006 of December 18, 2006 (REACH). However, the possible transmission of said safety data under BROWNING's obligation to inform the Purchaser under REACH, whatever may be its form, cannot expressly or implicitly imply a warranty as to the technical and / or commercial specifications of the Product or on the product's suitability for any purpose, determined or not.
- Personal data**

Personal data created as part of a sales transaction are processed in accordance with the General Data Protection Regulation (GDPR) 2016/679 of 27th April 2016. Personal data processed by Browning International as part of a sale are treated as confidential. Information about the client is processed electronically by Browning International and is vital for processing the order. This information and personal data are also retained for safety purposes, in accordance with legal and regulatory requirements. They will be kept for as long as necessary in order to fulfil the orders and any applicable warranties ensuing therefrom. Access to the personal data is strictly restricted to employees and agents of the company who are authorised to process the data in the course of their duties. Information that is collected may be shared with third parties that are contracted by the company to perform outsourced tasks required for order management purposes, without the need for the client's consent. It should be noted that, within the scope of their service provision, the third parties only have limited access to the data and are contractually bound to use them in accordance with the provisions set out in the applicable legislation on personal data protection. Beyond the instances noted hereabove, the company undertakes not to sell, rent, transfer or give access to the data to third parties without the prior consent of the client, unless required to do so for legitimate legal purposes (legal obligation, prevention of fraud or abuse, exercising rights of defence, etc.). In accordance with the applicable legal and regulatory provisions, in particular the Belgian law of 30th July 2018 on the protection of natural persons with regard to the processing of personal data, clients have the right to access and have rectified, transferred, and deleted, data held about them, and the right to have its processing restricted. Clients may also, with legitimate reason, object to the processing of data that concerns them. Clients may, subject to presenting a valid proof of identity, exercise their rights by contacting Browning International at Webmaster@browning-int.com.

Guarantee

Browning shall guarantee that the Products are, on the day of their delivery, free from all defects caused by poor quality of materials used or by manufacturing defects. Where necessary, Browning shall apply its guarantee to the Products strictly within the limits of the guarantee conditions published by Browning in relation to each Product, and with the reserve, with regard to visible defects, that these defects are the subject of a complaint by the Purchaser in accordance with Article 8 above. Browning does not guarantee the suitability of the Products for any specific use. Browning shall not be liable for any direct or indirect damages if the Products are lost or stolen.

Liability

Under no circumstances BROWNING shall be held liable for any use whatsoever that can be made with the Products, and in particular for the compliance of their conditions of use with those described under any related safety data under REACH, if any. Moreover, BROWNING'S liability cannot be claimed in cases of impossibility or delay in performing its technical or commercial obligations that would result from compliance with its legal or regulatory obligations under REACH.

Packaging

When the Products are sold packed, the method of packaging and/or protection shall be left to the discretion of Browning, unless the Purchaser stipulates a special form of packaging; in this case, the packaging shall be supplied to the Purchaser under express agreement by Browning.

All Products are subject in particular to availability of Products and the possibility of Browning obtaining and preserving the authorisations, licences and other documents necessary for its supplying and/or selling the Products.

Licences

The Purchaser shall pay the costs of approval and legalisation, and any other similar costs, and shall have sole responsibility for obtaining the prior authorisations required by the competent authorities in relation to the Products (import licence, DSP-83, International Import Certificate, End User Certificate etc.). The Purchaser must send to Browning any document (import licence, DSP-83, International Import Certificate, End User Certificate or other) required for Browning to obtain export licences within a period of 8 working days following the signature of his order. Failing this, Browning shall have the right to terminate the Contract binding it to the Purchaser in relation to the Product(s) in question immediately. The Purchaser must in addition comply with all regulations relating to the importation of Products coming from Belgium or from any other countries into the country of destination.

Law against re-exportation

American law forbids the sale, transfer, exportation and/or distribution of Products originating from the United States, to certain countries without authorisation. The Purchaser may not resell, transfer, re-send, re-export or otherwise dispose of Products of American origin outside the territory of the European Union without the prior written consent of the US State Department.

Intellectual property rights

Purchase of our Products does not confer on the Purchaser the right to use trademarks, patents or other intellectual property rights of which Browning is the owner or licensee. Browning reserves the right to take all action necessary for the protection of its intellectual property rights.

European Corporate Policy Browning International

Throughout the European Union, Browning International's European Corporate Policy requires for its products firearms and ammunition to be handed over to customers (consumers) physically by professionals in shops and for guided selling to be practised, including a check on the legal conditions that enable its goods to be handed over to customers.

Transfer of debt

In the event of Products belonging to Browning being resold, even after transformation, all the debts arising from their resale shall automatically be transferred by the Purchaser back to Browning. Within this framework, the Purchaser undertakes to inform its own purchasers and to carry out all necessary measures for implementing this Article.

Void clauses

If one of the clauses in the present General Conditions of Sale turns out to be void, this shall not have the effect of rendering all of the General Conditions of Sale void.

Applicable law and jurisdiction

The only applicable law shall be Belgian law. All disputes, whatever their nature and whatever the place of delivery of the Products, shall fall exclusively within the competence of the Courts of Liège, Belgium unless Browning prefers to bring them before the Courts of the Purchaser's place of residence or Registered Office.
