

WINCHESTER[®]

STAY TRUE

WINCHESTER®

A CULT BRAND

AN ICON OF HUNTING
AND RECREATIONAL SHOOTING
RENOWNED BEYOND THE FRONTIERS
OF GUN DEALERSHIPS

WINCHESTER® is not just a brand; it is a big gun of the hunting and recreational shooting world, an iconic name known throughout the industry and by hunters and non-hunters, too.

WINCHESTER® is the pioneer behind the lever-action rifle and firearm cartridges. It has taken its quick reloading rifles and now legendary ammunition calibres to the four corners of the globe.

This deep-rooted desire to innovate has been a motivating force behind WINCHESTER® for more than 150 years, driving us to create the products that take the industry forward and exceed consumers' expectations.

STAY TRUE

ZZ PIGEON

Its effectiveness and high velocity make this an outstanding shell for medium- and long-range shots. *See page 70*

NEW: 20 gauge also available.

Simple moments

**THE AGE OF
THE COWBOY
IS NO MORE,
BUT THE
PIONEERS' SPIRIT
OF ADVENTURE
LIVES ON**

ONLY THE AUTHENTIC

Stay true to yourself

The WINCHESTER® man lives his passions to the full, and embraces the challenges posed by the elements, by his quarry, and by himself. He uses current camouflage technology as much as the natural environment and the cover provided by reeds or leafy boughs.

THE SIMPLE LIFE

Live it, simply

The WINCHESTER® man is calm and collected, contented in the beauty of a landscape or the feeling that comes

from a perfect shot. He likes being in touch with the forest when on station, the mud on his boots and the wind that whips his face. He enjoys nature because it doesn't lie and reinforces his own values of humbleness and commitment.

FREE MEN

Follow your own path

Like the early cowboys, the WINCHESTER® man satisfies his thirst for adventure. For him, anything is possible! He doesn't want to be a bystander watching in comfort as the action happens – he wants to be in the thick of the hunt, up close to the quarry.

PRODUCTS YOU CAN TRUST

GUNS AND AMMUNITION THAT DO WHAT THEY PROMISE FOR MEN WHO ARE TRUE TO THEIR WORD

WINCHESTER® designs products for demanding clients and ensures they do what hunters want. Every WINCHESTER® product is specifically and carefully developed with its purpose in mind. By focusing on what matters most and shunning unnecessary gadgets and options, WINCHESTER® gives hunters products that do what they promise, no exceptions.

RELIABLE PRODUCTS

Products you can rely on

Built to work and last in any conditions and any circumstances.

EFFICIENT PRODUCTS

Efficient products designed to hit their target

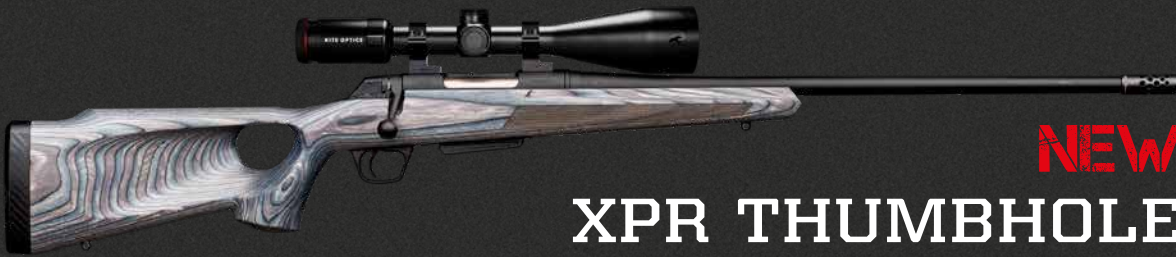

Accurately, consistently and fast.

PRACTICAL PRODUCTS

Practical, straightforward products that are a pleasure to use

Timeless design.
Easy to handle and ergonomic.
Easy-care and time-proof.

**LIGHTER,
FASTER AND
MORE ERGONOMIC**

SX4™

Nothing compares to roaming across fields with your dog and your SX4™. The hard work will bring its reward as you enjoy what you bring home by the fire with your family.

Suddenly, your faithful friend is off like a shot: he's just flushed a brace of hare. You shoulder your gun. The open sights let you home straight in on the first of them. You shoot. With the Active Valve system, recoil is not an issue and the second hare is in your sights in an instant.

You fire again. It's a long-range shot, but with your Back-Bored™ barrel, it's in the bag.

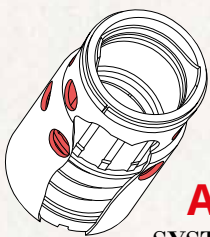

STAY TRUE

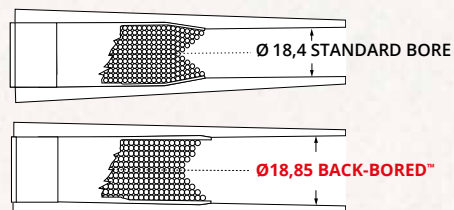

“ *Having spent a lot of time with the new SX4™, its efficiency and aim are beyond compare* ”

John Stephens, world champion duck caller, RNT-V

ACTIVE VALVE SYSTEM

The SX4™ is redesigned to be the most reliable and the fastest semi-automatic shotgun with the least possible recoil. It operates as simply as possible through the use of a gas piston with an 'Active Valve' that adjusts automatically so you can use a wide range of different loads.

BACK-BORED™ BARREL

Back-Bored™ technology makes better use of your cartridge's capability. Back-Bored™ barrels ensure better shot distribution and less shot deformation before impact.

Steel shot proved.

RANIERO TESTA

RECORD SHOOTER

AND HUNTER

Famous Italian shooter and multiple world-record holder Raniero Testa shares his secrets about being a champion and ardent hunter.

There's the Raniero with the rockstar appeal who pulls in the crowds to each of his shows. He broke his latest world record in April 2019, shooting 14 hand-thrown clays in under two seconds with his SX4". Then there's the Raniero who enjoys the peace and quiet and being in touch with nature when out hunting. "My most memorable time hunting is on my home island of Ponza," he explains. "It's a unique place, where you need special permission to hunt. I wait for the migrating birds to fly by, looking out across the Tyrrhenian Sea, off the coast of Naples. There's no other experience I can compare it to."

Which leads to the question: how does one of the top sports shooters in the world pursue his passion for hunting? "They're two totally different things. Hunting is a lifestyle, not a sport," he states. "The most important thing to bear in mind when hunting is respect. We're there to maintain a natural balance, not to shoot. Respect for the game and safety come first."

CUSTOMIZE YOUR **SX4™**

With WINCHESTER® , you can upgrade your magazine capacity to 4 or 6 shells. *See page 47 for more information.*

NEW

SX4™ 9-SHOT 12M

Combining the fastest semi-automatic shotgun on the market with an 8+1 magazine tube gives you the trophy-winning performance of the SX4™ 9-shot composite. The grey Permakote finish on the barrel and receiver protects and preserves your SX4™, and wonderfully offsets the black extension of the tube magazine. This gun comes in a red ABS case. The magazine extension tube is available separately as an accessory item. See pages 46 to 49 for our full range of original accessories.

SX4™ RANIERO TESTA - WORLD RECORD EDITION 12M

In 2019, WINCHESTER® shooter Raniero Testa pushed back the boundaries of physical possibility by breaking 14 clays in under 2 seconds with his SX4™. To celebrate this world record, we have created a special edition, magnum-chambered SX4™ with an 11-shell magazine tube. Its nickel-finished receiver and magazine tube strike a wonderful contrast with the composite stock and fore-end. This magnificent gun bears the name of Raniero Testa and includes five Invictor-Plus™ Signature Chokes. Is your performance worthy?

SX4™ SILVER PERFORMANCE 12M

Just like the SX4™ Raniero Testa, the SX4™ Silver Performance is designed to excel in competitive and hobby sports shooting. Swinging through the clays is easy with the barrel rib. The Inflex Technology recoil pad lets you fire multiple consecutive shots without unshouldering. The five red Invictor-Plus™ Signature chokes guarantee a multi-versatile gun that will deliver stunning performance in any shooting discipline.

NEW

SX4™ CALIBRE 20

WINCHESTER® has launched a calibre 20 version of its SX4™ Composite, Field, Camo Mobuc and Waterfowl models. The SX4™ calibre 20 is an increasingly popular choice among hunters of small game, combining a number of winning features including low weight and easy handling: it weighs less than 3 kg and has less recoil for a faster follow-up shot.

SX4™ COMPOSITE 12/89 & 20M

Firing cycle, weight and ergonomics make this composite version of the SX4™ the fastest shotgun in the world. WINCHESTER®'s engineering expertise offers efficiency and proficiency. The 66, 71 and 76 cm Back-Bored™ barrels, three Invector-Plus™ chokes, Truglo® fibre-optic sight with top-mounted long front sight, and Quadra-Vent gas ports for reduced recoil feel, mark out the SX4™ as a consummate, all-round high-tech, high-strength, high-performance gun.

SX4™ FIELD 12M & 20M

The satin-varnish walnut buttstock and the matte black receiver make this a classic yet powerful gun. This semi-automatic delivers outstanding shooting speed. The Back-Bored™ barrel and the 'Active Valve' gas-operated reloading technology give you the freedom to use all types of shell from the lightest to the heaviest, including steel shot.

SX4™ CAMO MOBUC 12/89 & 20M

The camo pattern on this SX4™ prevents the glint and glare that scares birds. This model also includes the chrome-plated bore and chamber that protects all SX4™ guns against projectile wear. It is fitted with wider Inflex Technology recoil pads for shooting comfort - and it is all the more pleasant with a Super Magnum (89 mm) shell in the chamber.

SX4™ WATERFOWL 12/89 & 20M

Successful since its launch, the now famous semi-automatic SX4™ is back in force. This is the waterfowl version, in 12/89 naturally, with a Mossy Oak camo finish perfectly imitating the play of light and shadow typical of marshland vegetation. This shotgun, with a five or three-shot capacity, depending on the regulations in force, provides a truly outstanding rate of fire. In addition, it combines optimal ergonomics and toughness in the most extreme conditions.

SPEED LOADING

SX4™ EVEN FASTER IN CALIBRE 20

Still basking in the glow of its recent world speed-shooting record, the SX4™ is shooting further ahead: the new calibre 20 version, which includes the revolutionary new 'Speed Loading' technology. This ingenious system cycles the first shell straight into the chamber without having to run the bolt. This shortcut comes in especially handy when you find yourself facing a pack of duck, partridges, pigeons or pheasants and needing to reload in a hurry. This technology is only included on the calibre 20 version of the SX4™.

SX4™
CAMO MOBUC

SX4™ FIELD COMBO SMOOTH 12M

The fastest autoloader on the market is now the most versatile, too. The SX4™ Field Combo comes with two barrels: a 71 cm smoothbore with a rib for outstanding performance against small game, and a 61 cm smoothbore, for fast shooting. It is specially designed to fire slugs on big-game hunts. The cantilever rail provides an easy scope installation option. The satin varnished walnut stock is a winner with shooters who like their guns furnished in wood.

SX4™ BIG GAME COMPOSITE SMOOTH 12M

The SX4™ has had a revamp this year. It has a smoothbore short barrel (61 cm) that ensures ease of handling, removable ¼ chokes, and a Truglo® fibre-optic sight with adjustable rear sight. The Big Game is suited to WINCHESTER® slugs as well as other shotshells.

SX4™ BIG GAME COMPOSITE RIFLED 12/89

The SX4™ now comes with its first rifled barrel: a mid-heavy 56 cm or 61 cm for highly accurate sabot slug shots. This version comes with an adjustable rear sight and a fibre-optic front sight. The SX4™ Big Game Rifled is everything that makes the SX4™ a success: unbeatably fast, perfectly ergonomic and reasonably priced.

WINCHESTER[®]

RELIABILITY

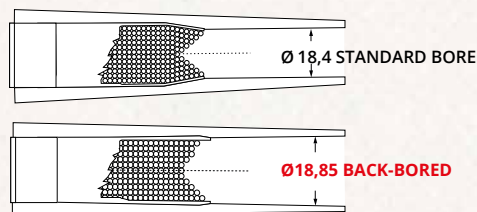

Select

**“ Whether you’re a clayshooter
or a small-game hunter, WINCHESTER®
has the gun you can trust
to match your ambition ”**

Competition is in your blood. You were born to push the limits and set new standards.

Your Select™ is your greatest ally. Its low action frame enables you to reach the target faster than the other shooters. Your finger fits the adjustable trigger perfectly. The buttstock merges into the hollow of your shoulder. The shot fires. You have forgotten what the word ‘miss’ means.

BACK-BORED™ BARREL

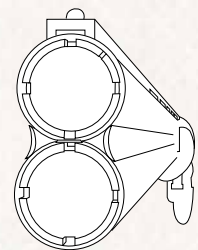

Back-Bored™ Technology makes better use of your cartridge's capability. Back-Bored™ barrels ensure better shot distribution and less shot deformation before impact.

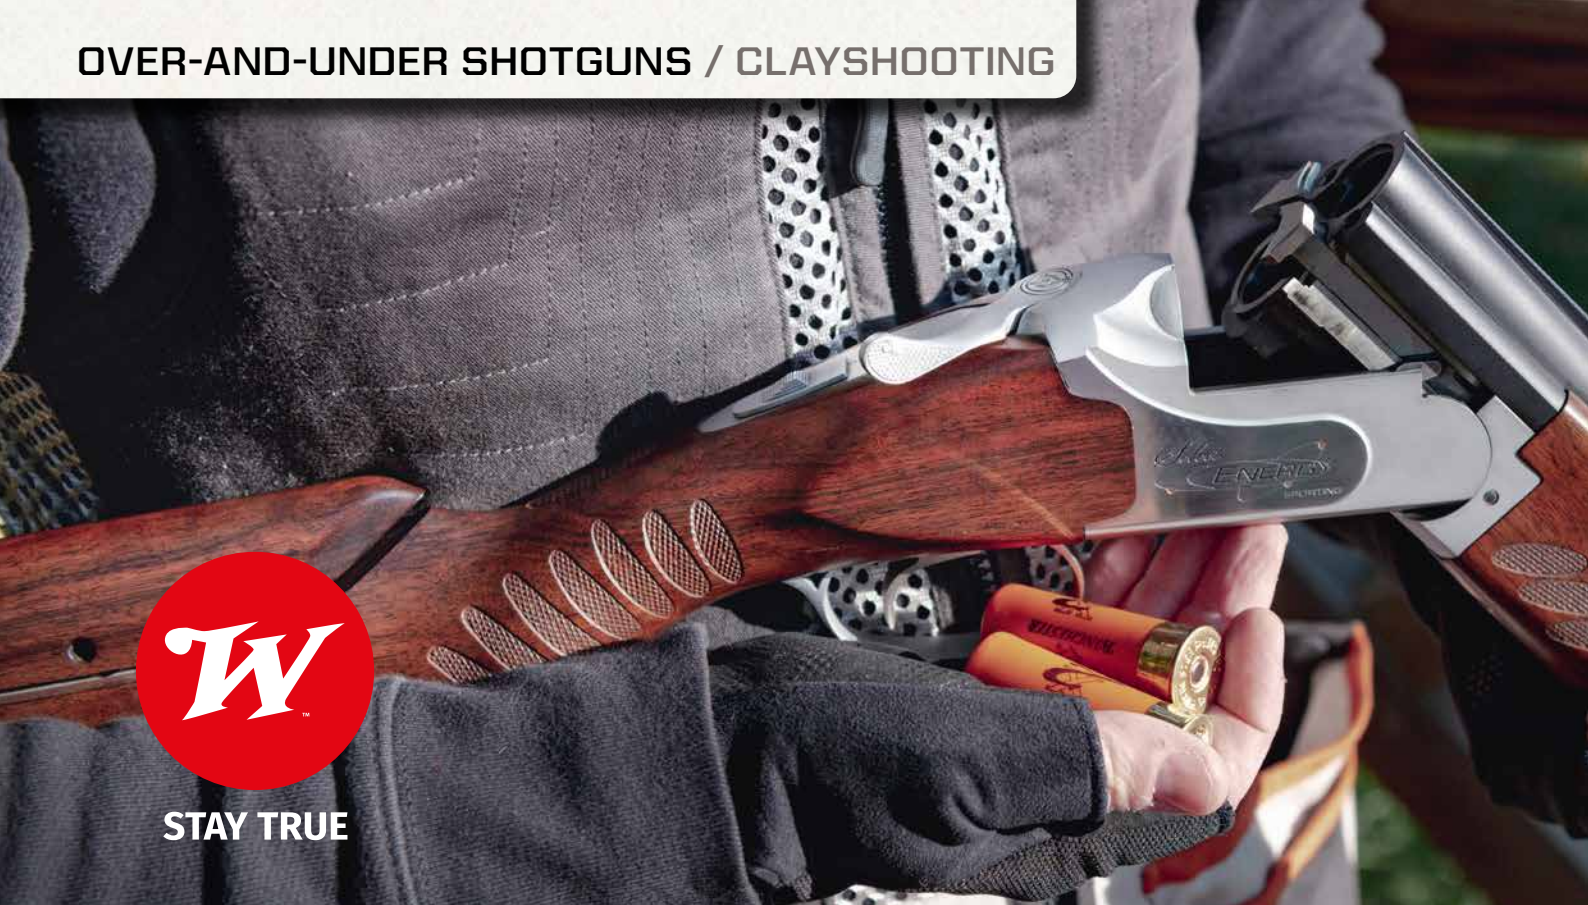

Barrels proofed for STEEL PELLETS

All WINCHESTER® Select™ over-and-under shotguns, are tested with high performance steel shot at 1370 BAR, which allows you to hunt in all conditions and to shoot traditional cartridges as well as those with steel shot without damaging your barrels. The hard chrome plating ensures durable surface wear resistance and is the best protection against dust and corrosion.

Steel shot proofed.

STAY TRUE

SELECT™ TRAP ADJUSTABLE 12M

This version of the Select™ Trap relies on perfect harmony between man and gun. For the sports shooter, what could be more precious than a made-to-measure gun? The Select™ Trap Adjustable's major asset is its stock – judiciously fitted with an adjustable cheek-piece, which allows you to adjust fit and pitch in just a few seconds. With its three interchangeable chokes, this beautifully made 12 magnum preserves all the spirit of the Select™ range, with winning shots into the bargain.

SELECT™ SPORTING II 12M

The Select™ Sporting II features distinctive traditional engraving that highlights its use for both clays and hunting. Its Back-Bored™ barrel is steel shot proved. Five Invector-Plus chokes included.

**DID YOU
KNOW?**

THE IDEAL SHOT PATTERN AT ANY RANGE

Investor-Plus chokes have been specially developed to work with our Back-Bored™ barrels.

They are designed to achieve the 'perfect target' across a variety of ranges. When swapping a choke, you can still get the ideal shot pattern at any range.

Signature Choke

The Signature version from renowned manufacturer Briley is an extended choke that projects from the barrel for easy handling and a sportier look.

See page 49.

SELECT™ ENERGY TRAP ADJUSTABLE SIGNATURE 12M

The Select™ Energy Trap Adjustable has several highly meticulous and sought-after features. The most important is the buttstock with adjustable comb which allows for individual adjustment of the drop and cast in seconds. It also has a wide 13 mm strip, intermediate foresight and a system of interchangeable Truglo® Tru•Bead™ foresights.

SELECT™ ENERGY SPORTING SIGNATURE 12M

The Select™ Energy Sporting Signature, with its easily adjustable comb, comes with a number of outstanding features, including a set of 5 Signature chokes from Briley and an adjustable trigger for perfect handling. A choice of 71 cm and 76 cm barrels, with 10 mm rib and a competition Truglo® Tru•Bead™ foresight complement this shotgun.

2.7 kg

SELECT™ LIGHT GOLD 12M

The Select® Light Gold is the deluxe version of our Select™ Light. The engraving is adorned with gilt animals and the wood is grade 2.5 oil-rubbed walnut. The barrels are Back-Bored™ and steel shot proofed. The Select® Light Gold comes in a WINCHESTER® case with five Invector-Plus™ chokes.

2.7 kg

SELECT™ LIGHT 12M

This light alloy shotgun, with an action frame reinforced with steel trunnions and insert, shows the technical characteristics of steel Select™ models. You will enjoy the stylish engraving of animals on the sideplate. The low action frame of this shotgun along with its low weight give it incredible life and astonishingly quick shouldering.

SELECT™ ENGLISH FIELD 12M

As its name suggests, the engraving on the Select™ English Field is elegant while being traditional. Like all WINCHESTER® Select™ shotguns, the high performance steel shot proofing allows you to shoot game, wildfowl and pests in all conditions and to shoot normal lead cartridges as well as high performance steel shot.

WINCHESTER

SUPER SPEED

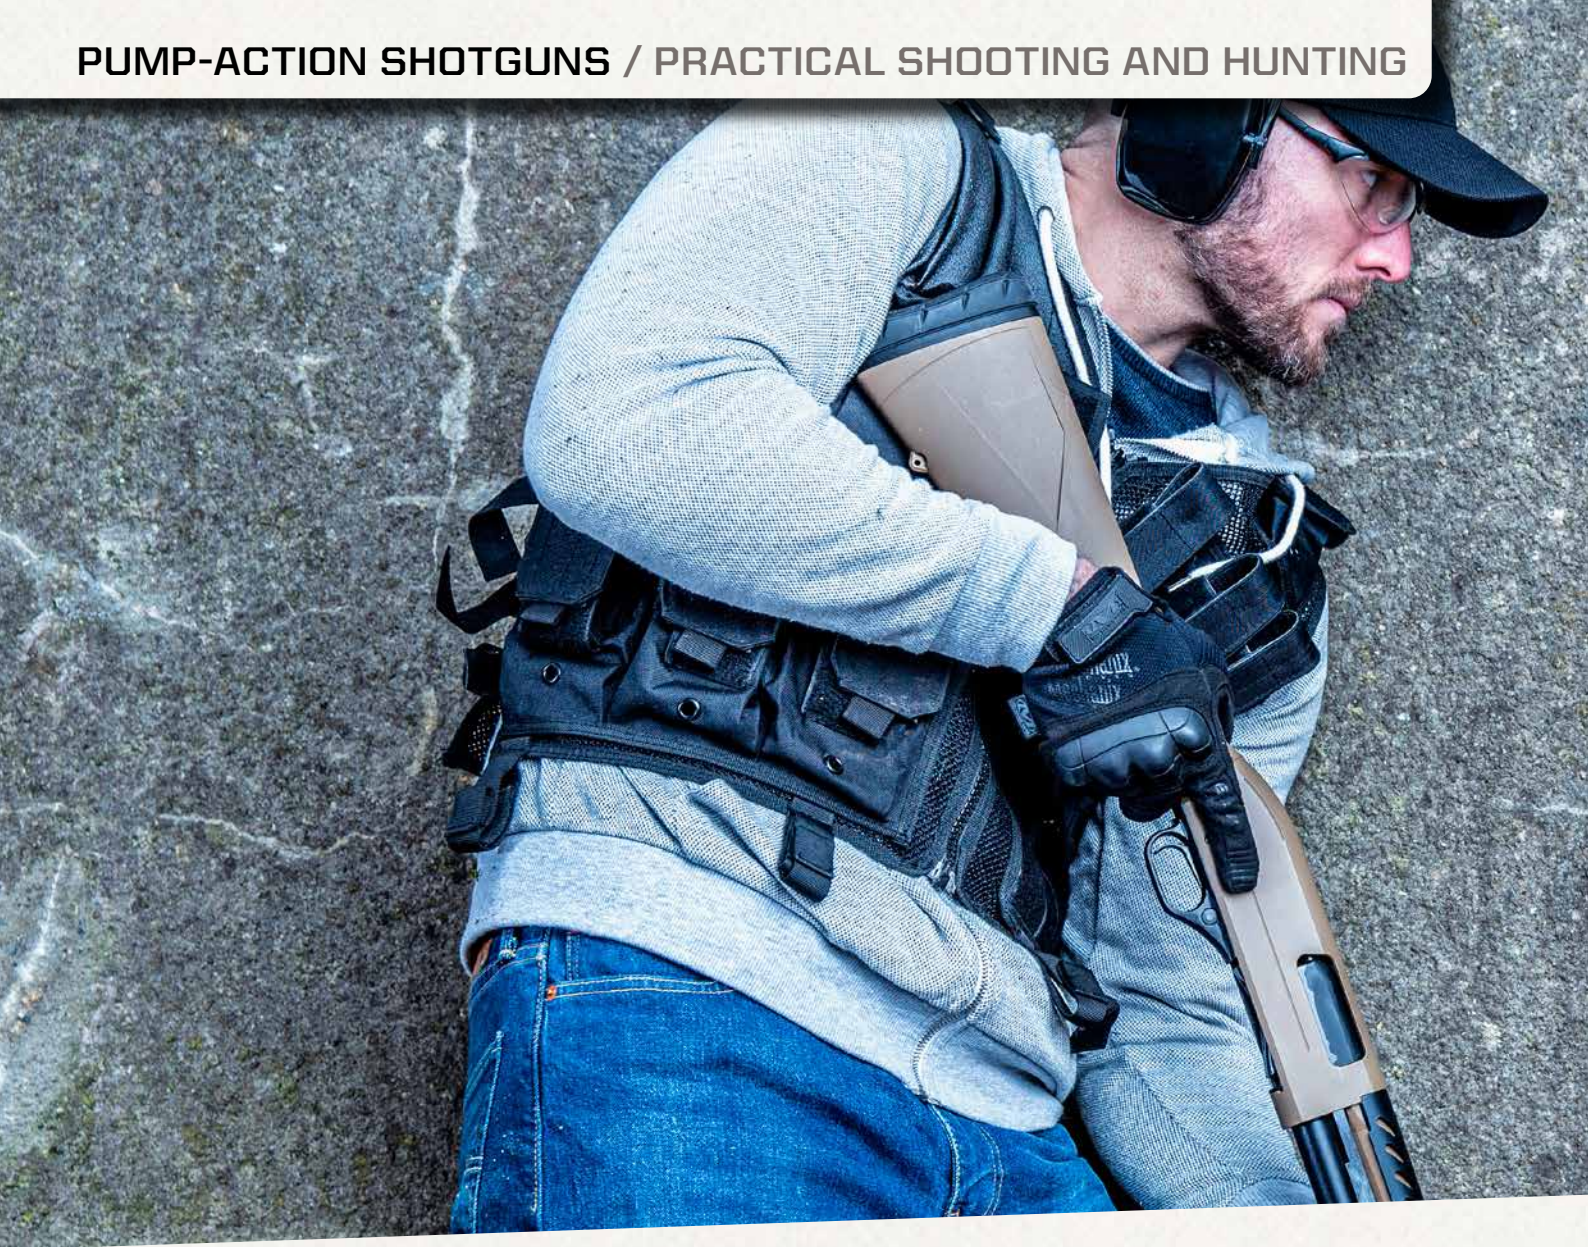

**HIGH VELOCITY,
GROUPING
AND COMFORT**

See page 72

STAY TRUE

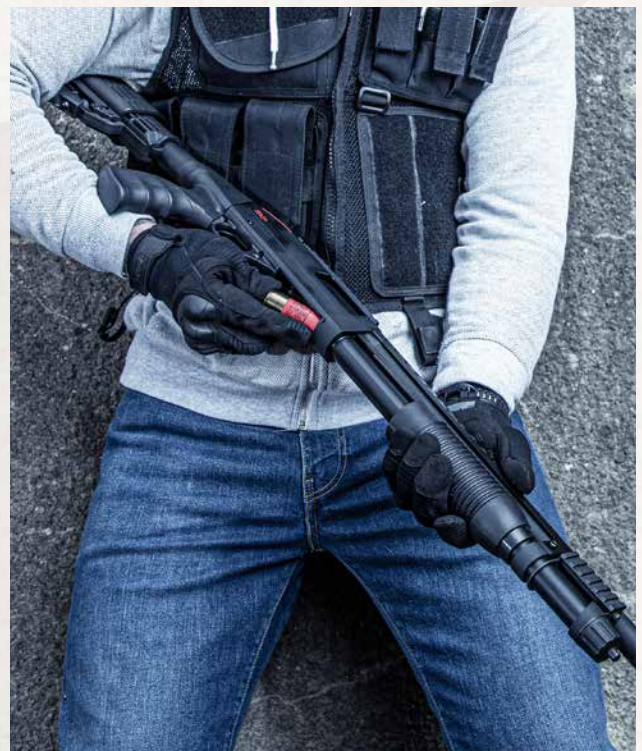

The stock firmly shouldered, you make your way to your stand. The rotating bolt gives you full confidence in your SXP™.

You are king of the game. A target appears; you squeeze the trigger. A perfectly consistent pattern of lead knocks it down.

The 18,85 mm Back-Bored™ barrel system proves its worth once again. With its minimum recoil, you can chamber a new round instantly. Another shot, another target down.

When the shooting is over, it only takes a few seconds to remove the drop-down trigger assembly.

Maintenance is as simple and intuitive as firing.

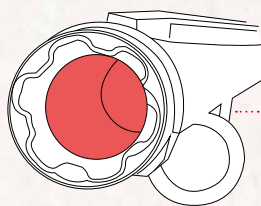

THE PUMP-ACTION SHOTGUN OF LEGENDARY ACCURACY

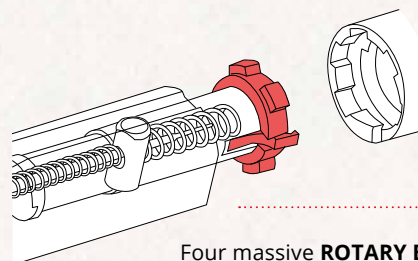

STAY TRUE

“ *The speed and reliability of the SXP™ make it a formidable gun for competitive shooting* ”

The hard chrome ensure highly ruggedized surfaces and better protection against corrosion. The **CHROME-PLATED** bore and chamber make our SXP™ shotguns completely safe for firing steel and other high-density shot.

Four massive **ROTARY BOLT LUGS** provide support, strength and solid lockup in the barrel. As it recoils, the mass of your body slows the rearward travel of the shotgun, while the inertial motion of the bolt, slide and forearm continue cycling the action to give you a head start ejecting the fired shell. Robust steel dual action guide bars eliminate the twisting and binding that waste time and energy when cycling the action.

SXP™ DARK EARTH RIFLED 61 cm BARREL

The Dark Earth flat finish adds character to this SXP™ - and yet it already has charisma to spare.

SXP™ TYPHON RIFLED 61 cm BARREL

The SXP™ Typhon Defender seals the deal: innovative Kryptek Typhon camouflage finish, magnum chamber, drilled and tapped scope-mountable receiver and Truglo® fibre-optic sights.

SXP™ BLACK SHADOW DEER RIFLED 61 cm BARREL

The new SXP™ features a rifled barrel, fibre-optic front sight, and adjustable rear sight. It also offers you fearsome stopping power and accuracy. This version of the SXP™ is built for driven hunts. The understated contours and excellent value for money are sure to delight the most demanding gunowners!

SXP™ XTREM DARK EARTH RIFLED 61 cm BARREL

With a heat shield on the barrel, two adjustable combs and a Picatinny rail: the SXP XTREM Dark Earth Defender has all the kit you need for your dynamic shooting sessions. The sandy Dark Earth colour scheme rounds off its daring look.

Full range in detail on pages 90 - 91

MAGNUM BUCKSHOT

For maximum accuracy.

See page 79 for more information.

SXP™ TYPHON DEFENDER

The SXP™ Typhon Defender seals the deal: innovative Kryptek Typhon camouflage finish, magnum chamber, drilled and tapped scope-mountable receiver, 46 cm smoothbore barrel, interchangeable Invector-Plus™ chokes and Truglo® fibre-optic sights. 6-round (5+1) capacity available.

SXP™ DARK EARTH

The Dark Earth flat finish enhances the character of an SXP™ that already has more than its fair share. The 46 cm barrel brings great handling quality to one of the most popular pump-action shotguns on the firing range. The interchangeable Invector-Plus™ chokes always help deliver the results you're looking for. The SXP™ Dark Earth has a 6-round (5+1) shot capacity.

SXP™ DEFENDER

This model is a 6-shot (5+1) pump-shotgun, easy to carry and use. Its black composite buttstock and smooth chrome 46 cm barrel make it a perfect weapon for law enforcement. Discreet, reliable and light, it is already established in its class.

SXP™ DEFENDER HIGH CAPACITY

The 7+1 capacity of the SXP™ Defender high Capacity takes the uncertainty out of taking that follow-up shot. And the SXP™ Defender High Capacity offers more than fantastic shot capacity – it also comes packed with WINCHESTER® technology. The 51 cm barrel is Back-Bored™ to 18.85 mm, guaranteeing consistent shot patterns and bare minimum recoil. The receiver is countersunk for scope mounting. The Truglo® fibre-optic front sight will delight shooters who prefer to see their target through open sights.

Full range in detail on pages 90 - 91

SXP™ XTRM DEFENDER ADJUSTABLE 46

Designed for target shooters, this model principally stands out due to the length of its stock, its perfectly adjustable cheek-piece, and its pistol grip. In addition, it has a Picatinny rail for a scope, with an integrated ghost ring rear sight.

SXP™ XTRM DEFENDER HIGH CAPACITY 51

This gun offers an 8-round shot capacity and has a 51 cm barrel. It is a 12 gauge chambered for 76 mm that easily adapts to your body and/or the particular demands of your day out in the field. It features a pistol grip and comes with two interchangeable combs and four inserts – making it easily configurable in nine possible combinations.

SXP™ XTREM DARK EARTH DEFENDER

With a heat shield on the barrel, two adjustable combs, Picatinny rails, and an Investor+ tactical 'door breacher' choke, the SXP™ XTREM Dark Earth Defender has all the kit you need for your dynamic shooting sessions. The 46 cm barrel makes this a highly wieldy SXP. The sandy Dark Earth colour scheme rounds off its daring look.

SXP™ DEFENDER TACTICAL ADJUSTABLE 35 *

If you're looking for an extremely short pump-action shotgun with a stock that offers a perfect body fit, the SXP™ Defender Tactical Adjustable 35 has a 35 cm barrel and adjustable comb. Whether you're aiming with a red dot or through open sights, you'll be straight on target. With four cartridges in the tube and one in the chamber, you're ready for those intensive shooting sessions.

SXP™ DEFENDER TACTICAL PG 35 *

Ultra-compact firepower! This version of the SXP™ is available with a 35 cm barrel. The 4+1 capacity and pistol grip guarantee excellent results during your practical shooting sessions. This pump-action shotgun is easily carried over the shoulder thanks to the sling ring, and is a popular choice that is quick, safe and simple to use.

SXP™ WATERFOWL 5+1

This model designed for waterfowlers is chambered in 12-89 mm with a chrome-plated, steel shot proved barrel. The stock and fore-end are composite and in a camouflage pattern that deftly recreates a wildfowl hunting environment. And the magazine holds 6-round (5+1) so you don't miss a firing opportunity when you're out on the hunt.

NEW

ZZ CANARD

WINCHESTER®'S FASTEST STEEL SHOTSHELL

The 33 g of steel shot in the new ZZ Canard shotshell flies at 440 m/s, making it the fastest in the WINCHESTER® range of steel shotshells.

The high velocity is mitigated by the relatively low load weight to maintain a comfortable shooting experience. The steel pellets are coated in a fine layer of tin for effective corrosion resistance.

For more information, see page 76.

SXP™ FIELD 5+1

The SXP™ Field was designed for hunters who prefer a more traditional finish with a wooden stock. This version is chambered for 12-76 mm and its barrel allows you to shoot steel pellet ammunition. The 6-round (5+1) magazine offers optimum shot capacity.

SXP™ BLACK SHADOW 5+1

This reliable shotgun has a modern look and is available with a 66 cm or 71 cm chrome-plated Back-Bored™ barrel and a 6-round (5+1) magazine. The Black Shadow is the hunting version of the SXP™ composite and is shipped with three Invector-Plus™ chokes.

SXP™ BLACK SHADOW DEER RIFLED 5+1

The SXP™ features a rifled barrel, fibre-optic front sight, and adjustable rear sight. It also offers you fearsome stopping power and accuracy. This version of the SXP™ is built for driven hunts. The understated contours and excellent value for money are sure to delight the most demanding gunowners!

**SXP™
BLACK SHADOW**

PRECISION,

PERFORMANCE,

WINCHESTER XPR™

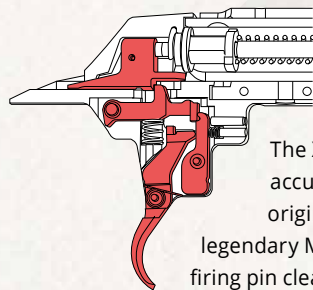

“ WINCHESTER® XPR™: the straight-shooting accurate rifle ”

You’ve been waiting months for this moment. A wheat field, bordered by thick forest, stretches around you. The reddening sun slowly sinks behind a hill.

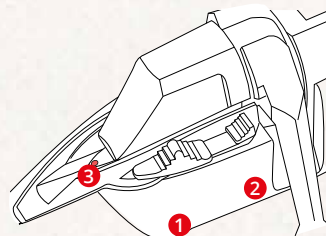

All you can hear is the rustling of leaves. All of a sudden, the sound of a crow cawing. It’s the signal.

Looking through your scope, you can see a lone boar at 150 metres. Half-hidden in the undergrowth, it pauses. Is it time to move out into the open yet? It decides to risk it. Your finger strokes the M.O.A.™ Trigger System on your XPR™. It’s a great shot. The boar drops instantly. Adrenalin levels return to normal.

XPR™ M.O.A.™ TRIGGER SYSTEM

The XPR™ has a major advantage that makes it an extremely accurate rifle: its M.O.A.™ Trigger System. The trigger was originally developed for the WINCHESTER® Company’s legendary M70™, and uses a system of pivoting levers that release the firing pin cleanly and at great speed for maximum accuracy. The result is triple-zero performance: *zero take-up, zero creep, zero overtravel.*

Two-position SAFETY

The XPR™ has a dual safety system that consists of a conventional on/off mechanism and a bolt safety feature.

The bolt release button **2** positioned in front of the conventional safety button **1** lets you load or unload with the gun on safe, i.e. with the traditional safety button in the on position. For even greater safety while hunting, you can see at a glance whether the firing pin is cocked or not by the cocking indicator on the bolt head **3**.

XPR™ LONG RANGE

The XPR™ Long Range can help you take top spot in sports-shooting competitions. Made from the best components. The tactical stock from specialist manufacturer Grayboe is made of fibreglass for unbeatable ergonomics and ultimate lightweight strength. The semi-weight barrel ensures accurate shots at long range and the oversized bolt knob is quick and easy to operate.

The recoil pad is an Inflex II for perfect recoil absorption. The inserts let you adjust for the optimum setup.

1 TACTICAL STOCK

The fore-end is flat and wider for better support on the shooting range.
The receiver and barrel sit low for improved stability and control. The pistol grip allows you to fit the stock snugly into your shoulder at constant pressure for a more secure hold.
The cut-out at the bottom of the stock offers excellent support on sand bags or just better control with your free hand.

2 BOLT HANDLE

The bolt handle has been made larger for more accurate operation.
The bolt handle is available as a spare part – *See page 48.*

3 SEMI-WEIGHT BARREL

A semi-weight barrel reduces heating and increases stability. The result is greater accuracy at long range.

DID YOU KNOW?

NEW: THE .223REM CALIBRE

The XPR is now also available in the .223 Rem calibre, which is ideal for hunting fox and other smaller animals. Its precise ballistics and reasonable price make it a go-to calibre for sports shooters.

See page 59 for more information.

NEW

NEW

XPR™ THUMBHOLE

Good ergonomics and grip are vital for a successful shot. The laminated grey wood thumbhole stock is made for fast shouldering and sets the XPR™ Thumbhole apart. The laminated wood gives the stock greater dimensional stability even in adverse conditions. This rifle also has a modern, exclusive look that makes it totally unique. And as with all our XPR™ models, the barrel is OEM threaded.

NEW

XPR™ VARMINT ADJUSTABLE THREADED

Varminting requires a gun that is accurate, low-key and easy-handling. The oversized bolt handle means you can recock your XPR in record time. The composite stock features an adjustable comb from the famous manufacturer Kalix for optimal eye-to-scope alignment. The 53 cm semi-weight barrel ensures an extremely accurate shot at any range, and the M14x1 thread makes your XPR™ suppressor ready for a discreet and effective shot (*).

XPR™ COMPOSITE*

The XPR™ Composite is now available in seven calibres, to cover hunters' and sports shooters' every need. The standard barrel length is 53 cm, and 61 cm for the Magnum calibres.

1 INFLEX RECOIL PAD

The ultra-flexible material used in the INFLEX recoil pad provides the best possible recoil absorption. The exclusive technology inside the pad ensures that it compresses on firing to move the stock downwards and slightly away from your face. Shooting comfort is vastly improved and you retain optimum aim for the follow-up shot.

Your XPR™ comes with a 7 mm-thick insert to increase your stock length. You can also purchase additional inserts from our line of original WINCHESTER® accessories - [see pages 48](#).

2 WEAVER BASES

All the models in the XPR™ range come with Weaver bases as standard for fitting scope mounting rings using the Picatinny standard - [see pages 48](#).

3 THREADED BARREL

The barrels are now threaded to receive a suppressor* or muzzle brake - [see page 90 for a list of calibres](#).

XPR™ SCOPE COMBO THREADED

By matching our XPR™ threaded bore with our Vortex Crossfire II scope, 'this all-in-one combo' comes to you preassembled and set up. The Vortex Crossfire II 3-9x40 scope is equipped with the Dead-Hold BDC reticule. This rifle-scope combo is ready to fire straight out of the box, after zeroing.

XPR™ COMPO COMPACT THREADED

The XPR™ range is adapted to accommodate different hunter profiles with a compact version for users with a smaller build. Its barrel is shortened by 19 mm to 330 mm. It is available in .243 Win or .308 Win calibres. Threaded barrel, scope-mounting bases, M.O.A.™ trigger: this model is every bit the equal of the traditional version.

DID YOU
KNOW?

CUSTOMIZE YOUR **WINCHESTER®** **XPR™**

Original **WINCHESTER®** accessories have been specially designed for you to customise your **WINCHESTER®** gun and tailor it to your needs.

See pages 46 to 49 for our full range of accessories

XPR™ HUNTER MOBUC THREADED

The XPR™ Hunter Mobuc is a rifle that will catch the eye of admirers who appreciate fine guns but melt into the background when the quarry comes into view. The composite stock is wrapped in Mossy Oak Break-Up Country camouflage. This XPR is available in .243 Win, .30-06 Spr and .308 Win versions, comes with a 53 cm barrel and delivers excellent ballistic performance. The M14x1 thread provides an easy solution for fitting a sound moderator or muzzle brake, while the Weaver bases included in the case ensure maximum scope stability.

REMINDER!

THE BENEFITS OF A SUPPRESSOR

Suppressors are now permitted in most countries in Europe (*).

A suppressor has a number of benefits when hunting or shooting down range:

- Less muzzle flash
- Less recoil
- Greater comfort for shooters and their entourage

(). Laws and regulations governing the possession and use of suppressors vary by country. Please check with your local authorities. Your gun will require adjustment if a suppressor is fitted.*

XPR™ STRATA THREADED

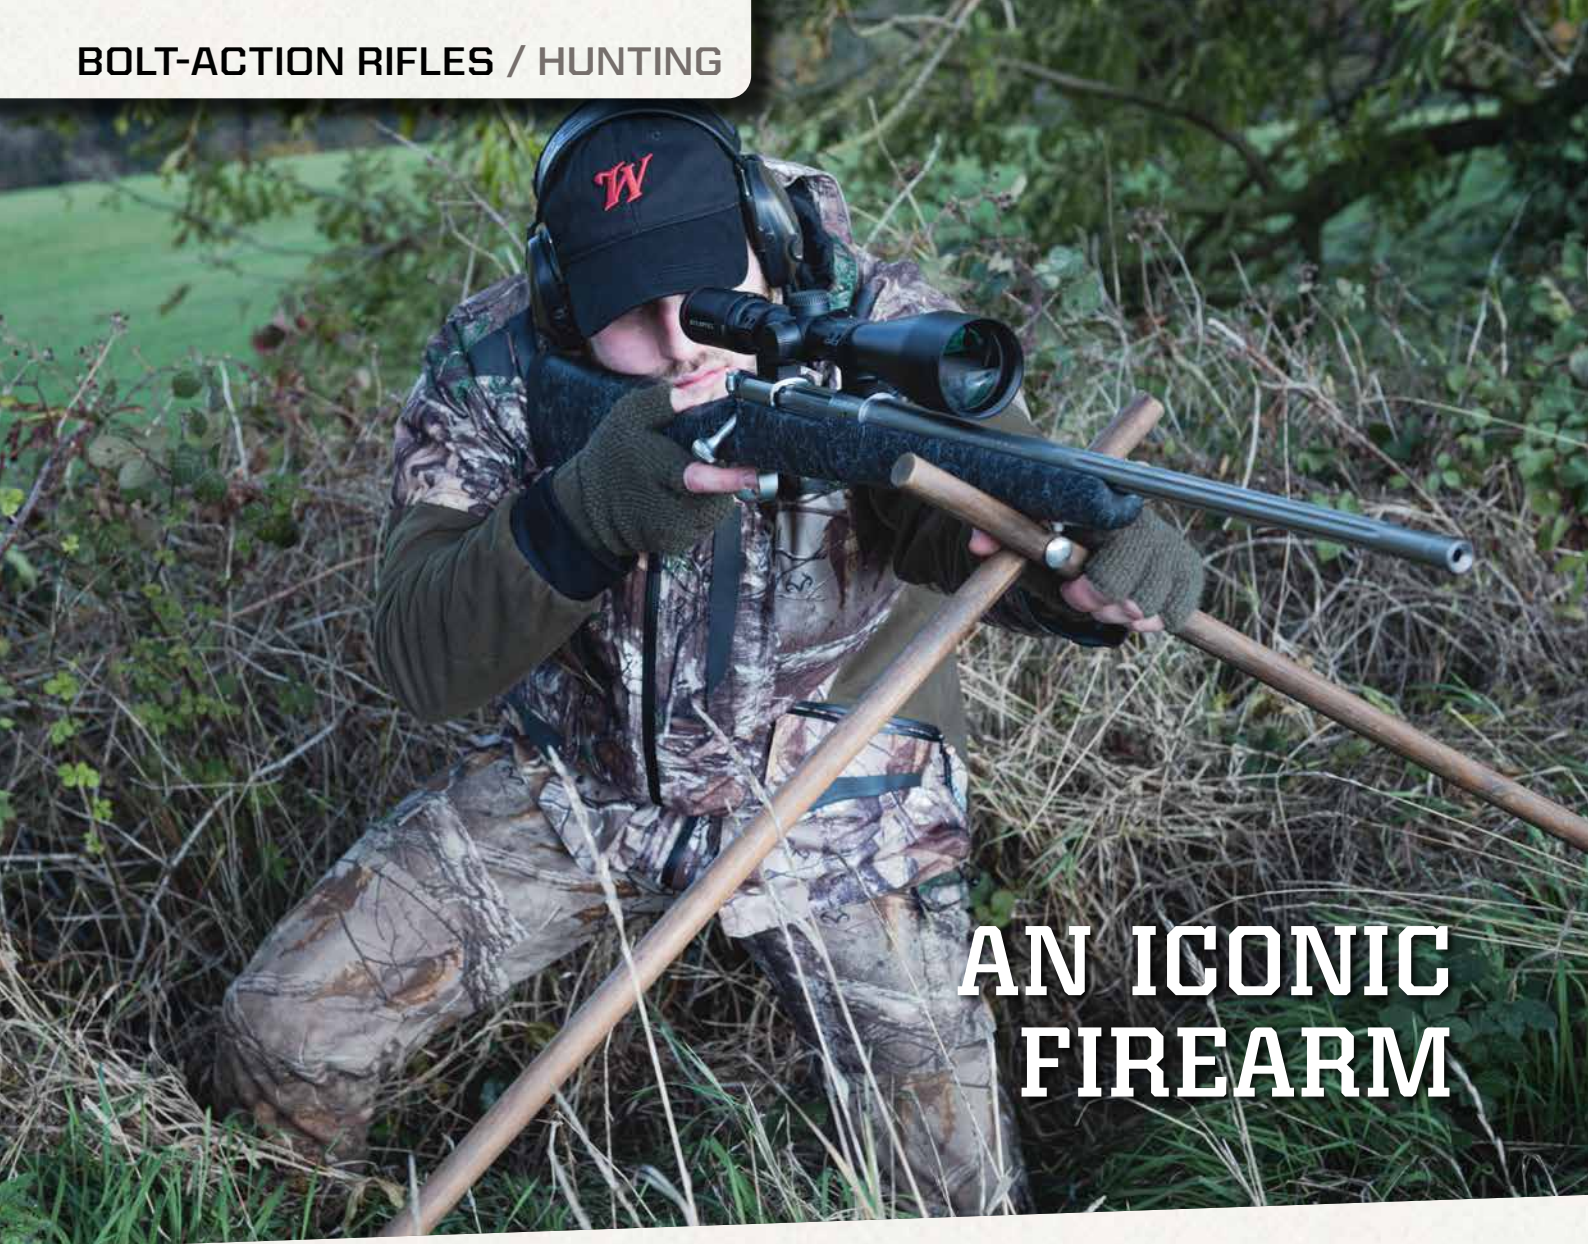

The XPR™ Strata is designed to delight. The True Timber Strata camo pattern makes it instantly recognisable. The large bolt handle and T1 WINCHESTER® muzzle brake guarantee unrivalled shooting comfort. The 19 mm-diameter mid-weight barrel provides excellent rigidity for unrivalled accuracy, even after heavy use. The XPR™ Strata is available in .243 Win, .308 Win, 6.5CM, .30-06 Spr with a 53 cm barrel. It also comes with a 61 cm barrel for the .300 WM and .338 WM calibres.

XPR™ SPORTER ** THREADED

The power of the XPR™ is now available in a Sporter version! With its specially designed wooden sporter stock and Inflex recoil pad, this rifle is available in a large selection of calibers: .243 Win, .308 Win, .30-06 Sprg and .270 Win in 53 cm barrel and .300 WM in 61 cm barrel. It is ready-fitted with scope-mounting bases for perfect target sighting. The barrel has an M14x1 thread for mounting a muzzle brake or suppressor, as required.

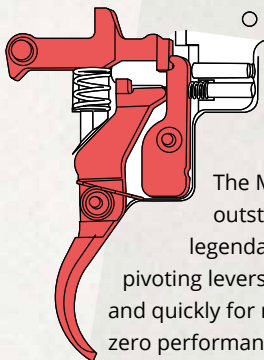

AN ICONIC FIREARM

MODEL 70™

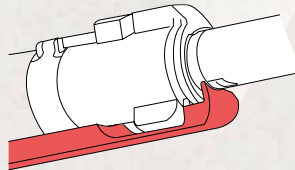

You've been aware of the fox for a week now. Every day, at the same time, you watch him prowling around at the edge of the wood. Unsuspecting, he roots around peacefully. He has no way of knowing you've just got an M70™.

Taking up position, perched in an old oak tree, you load your M70™. You close the breech smoothly. You closely scan the edge of the forest with your binoculars. This is his usual time. He won't be long now. When the moment comes, he won't stand a chance.

M.O.A.™ TRIGGER SYSTEM

The M.O.A.™ trigger adds to the outstanding accuracy of the legendary M70™. The system uses pivoting levers that release the pin cleanly and quickly for maximum accuracy and triple-zero performance: *zero take-up, zero creep, zero overtravel.*

CONTROLLED-ROUND FEED (CRF) BOLT

The large claw extractor slides smoothly and contacts a significantly larger area of the cartridge base than a classic extractor. The cartridge is perfectly controlled between leaving the magazine and being chambered. This proven concept allows the extraction of an unfired cartridge even if it has not been completely introduced into the chamber.

MODEL 70™ EXTREME WEATHER THREADED *

Its fibreglass Bell & Carlson stock gives you an exceptional grip; its floating piped stainless steel barrel reduces the gun's weight and optimises cooling. Forged in a single piece of aluminium, its bedding block is a guarantee of strength and vigour for obtaining a direct, regular pull; its M.O.A.™ Trigger System reduces any risk of release or lost movement to zero when firing, and its recoil pad reduces recoil effects.

This model is now available with a threaded barrel for mounting accessories such as a muzzle brake or suppressor.

**“ The ‘Rifleman’s Rifle’:
the benchmark against which
every other bolt-action rifle is measured ”**

MODEL 70™ CLASSIC HUNTER

In addition to all of the technical innovations found on the new Model 70™, this Classic Hunter version is equipped with adjustable battue rib sights. Its battue strip and fibre-optic foresight that is adjustable in all positions allow rapid and precise shots without a scope.

MODEL 70™ SAFARI EXPRESS

The Model 70™ Safari Express rifle is the perfect choice for the safari of your dreams. It is designed for firing the most powerful calibres at the most dangerous game. The wide Pre-64 claw bolt, the Pachmayr® Decelerator® recoil pad, the sights, the walnut stock, the three-position safety catch and the M.O.A.™ Trigger System make this legendary rifle the prime choice for all professional hunters in Africa.

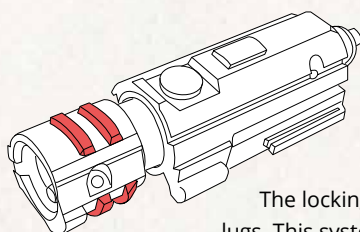

RELIABLE
IN ALL
CONDITIONS

“ This highly reliable semi-automatic rifle is a reference in the hunting world ”

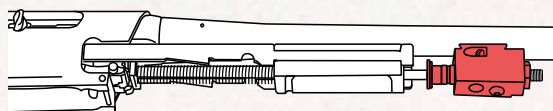

The hunting horn sounds loudly. All at once, the forest is alive with especially heightened activity. Dogs yip, the beaters move through the undergrowth, the breech on your SXR™ clicks slightly. Your expression hardens, your heart beats faster as your excitement rises.

A wild boar hurtles out to the right of you. He skids, hesitating which way to go. A few metres behind him, the dogs remind him there is no time to lose. He takes off again, past you. You can almost feel his panting breath. Finally, he tries to escape across your line of fire. You don't hesitate, the SXR™ responds as if it had been waiting for that precise moment. You didn't need a second shot.

**WINCHESTER®
LOCKING SYSTEM**

The locking system in the barrel is made up of seven lugs. This system provides excellent shooting accuracy, as well as the flexibility of firing magnum rounds. This locking system guarantees greater safety.

WINCHESTER® Gas Auto Loading System

The loading-cycle regulation system ensures perfect operation with all types of rounds, even with magnum calibres.

SXR™ VULCAN™ BLAZE

The SXR™ Camo Blaze is the perfect partner for driven-hunt enthusiasts: its hi-viz orange camo is guaranteed to keep you safe in any conditions. The short 47 cm barrel can be manoeuvred with ease, even in the most awkward surroundings. The Dura-Touch® coating provides perfect handling performance. The SXR™ Vulcan™ Camo Blaze is designed for hunters who keep going when the going gets tough.

SXR™ VULCAN™ BLACK TRACKER

Specially designed for driven hunts, with a short, 47 cm barrel. The hardy SXR™ Vulcan™ Black Tracker is available in three calibres (.308 Win, .30-06 Spr and 9.3x62), is made to withstand the toughest conditions, and is formidably effective. This is an unobtrusive gun with stock and fore-end made from black-tinted walnut finished in a Dura-Touch® coating for comfortable, safe handling.

SXR™ VULCAN™ BATTUE

The SXR™ Vulcan™ is equipped with the WINCHESTER® mechanical gas-operated system. This semi-automatic rifle is extremely reliable and is impressively accurate. Whatever game you like to shoot, there is an SXR™ in the right calibre to meet your needs.

STAY TRUE

MODEL 94™ SHORT RIFLE

A favourite rifle with all hunters and shooters, the Short Rifle is compact, easy to handle and lightweight. The new Model 94™ Short Rifle has a short dull-blued barrel, 51 cm long with traditional sights and a countersunk receiver for easy use with a scope.

MODEL 94™ SPORTER

The new WINCHESTER® Model 94™ Sporter rifle is a gun that demanding hunters, target shooters and collectors are always happy to rediscover. The rifle has a magnificent dull-blued half-round, half octagonal 61 cm barrel. The walnut stock is delicately chequered and oil-rubbed; the traditional butt-plate is in blued steel.

MODEL 94™ TAKE DOWN

The new Model 94™ rifle consists of two compact elements - the barrel and the stock-hull. It is easily assembled by twisting the extremity of the cartridge tube a few times. Thus the Model 94™ Take Down is both easy to use and exceptionally versatile.

DID YOU KNOW?

The gun that won the West

The WINCHESTER® Model 1892 lever-action rifle quickly became the movie-makers' favourite. The 1939 film *Stagecoach*, shot in Monument Valley by John Ford, has become one of the classic Westerns. In it, John Wayne, playing Johnny Ringo, carried a WINCHESTER® Model 1892 lever-action repeating rifle that was specially made for his big hands.

MODEL 1892™*

WINCHESTER® brings back one of the most famous, most sought-after rifles the world over... the WINCHESTER® Model 1892™. It is known for its accuracy, high magazine capacity, and fast follow-up shots. Next to his horse, the cowboy called upon his Model '92. It balanced easy in the saddle and low recoil kept him on target. It provided the cattleman, rancher, trapper and homesteader with dinner and got him out of some tight scrapes. This rifle is available in .357 Mag.

MODEL 1873™*

The definition of 'legend'. Here at WINCHESTER® Repeating Arms we know a great deal about legends. Our product line is full of them. But few can match the legendary look, feel and function of this very special octagon-barrelled Model 1873™ with a stunning cased coloured receiver. This rifle is available in .45 Colt. and in .357 Mag.

CUSTOMIZE YOUR GUN

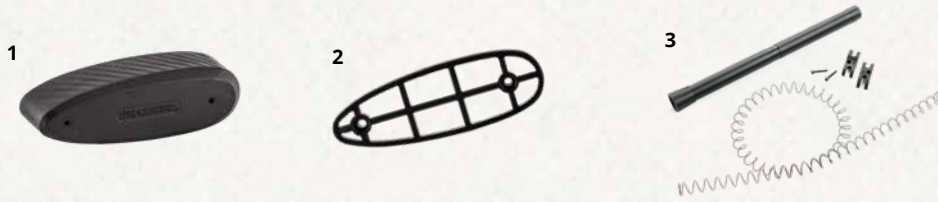

A gun is not truly perfect until it meets all the needs of the person shouldering it. Always attentive to client comfort, **WINCHESTER®** offers a wide range of accessories.

WINCHESTER BIG GAME AMMUNITION

A WINCHESTER® BULLET FOR EVERY TYPE OF GAME

Our rifle ammunition is the result of detailed research to bring you the perfect bullet for each type of hunt.

Each one of the technical solutions used reflects the ballistics expertise of our engineers and the experience in the field that went into making them.

Our experience brings you WINCHESTER ammunition suited to any specific purpose.

MEDIUM GAME

The thin hide and limited density of roe deer, mouflon and fallow deer need a bullet that expands rapidly on impact. Go for the traditional Power Point or the Ballistic Silvertip for knockdown power and controlled expansion behind the plastic tip that hits with legendary precision.

SEE PAGES 52-53 FOR PRODUCT INFORMATION

STAY TRUE

MEDIUM TO HEAVY GAME

The unique design of the Extreme Point lead core and monolithic (100% copper) Extreme Point Copper Impact stops any game with outstanding accuracy and devastating knockdown power at any range.

SEE PAGES 54-55 FOR PRODUCT INFORMATION

HEAVY GAME

For heavy animals, a maximum retention of mass ensures the transfer of energy necessary and a profound penetration into dense tissue. Fusion loads, such as Power Max Bonded and Accubond CT, are the ideal ammunition for large boar, red deer or elk.

SEE PAGES 56-57 FOR PRODUCT INFORMATION

VARMINTS

Vermin is nimble and light with thin hides. Varminting requires accurate ammunition that expands instantly on impact. The Varmint-X and Varmint-X Leadfree are available in .223 Rem, 22-250 Rem and .243 Win, offer good wind stability, and can be fired at very long range.

POWER-POINT®

QUICK AND MASSIVE
knock down

The Power Point is the perfect, versatile bullet for any medium-game hunter. Hundreds of millions of Power Point bullets sold in 40 years are testimony to how effective and reliable it is.

SOFT POINT: fast expansion for maximum energy transfer to the target.

NOTCHED TAPERED-THICKNESS JACKET: uniform expansion suited to the size of the quarry.

SOLID LEAD CORE: powerful knockdown, ideal for driven hunts.

CALIBRE: .22 HORNET / .22-250 Rem / .222 Rem / .223 Rem / .243 Win / 6.5x55 SE / .270 Win / .270 WSM / 7 mm Rem / 7mm 08 Rem / 7x64 / .30-06 Spr / .30-30 Win / .308 Win / .300 WM / .300 WSM / 8x57 JRS / .338 WM / 9.3x62 / 9.3x74 R / .44-40 Win

HUNTING

MEDIUM GAME

BALLISTIC SILVERTIP

Controlled EXPANSION

The Ballistic Silvertip range is ideal for use on medium game at long range.

PLASTIC TIP: faster expansion on impact.

SLEEK PROFILE: outstanding accuracy.

CONTOURED JACKET: controlled expansion and optimum weight retention.

LUBALOX® COATING: less friction for better ballistic performance.

HEAVY BASE: prevents bullet deformation and is the starting point for wide mushrooming.

CALIBRE: .30-06 Spr / .223 Rem / .243 Win / .270 Win / .270 WSM / 7 mm Rem / .280 Rem / .308 Win / .300 WM / .300 WSM

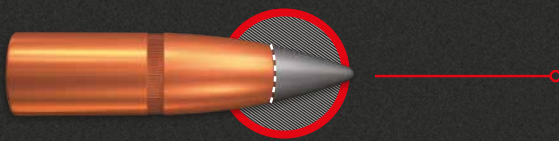

DID YOU KNOW?

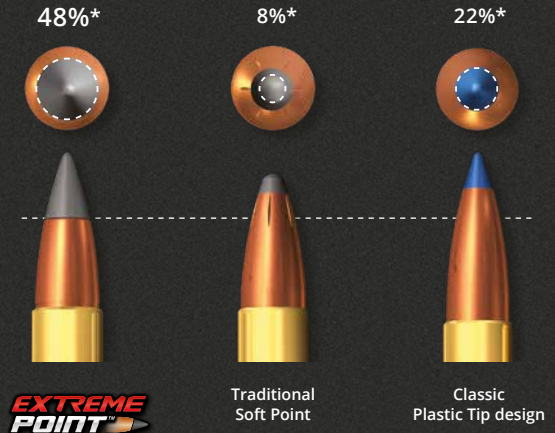

EXTREME POINT TECHNOLOGY

The bullets in the EXTREME POINT range feature an exclusive design that makes them extremely effective. The enormous plastic tip is waiting to unleash an impact diameter between two and six times larger than conventional ammunition.

This impressive surface area instantly transfers maximum energy on impact, resulting in outstanding stopping power.

BIGGER TIP. BIGGER IMPACT.™

* = Impact Diameter (in % of total diameter)

EXTREME-POINT® LEAD

Devastating KNOCKDOWN POWER

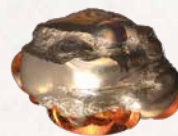

The Extreme Point Lead is designed for hunters who want fast expansion and immediate knockdown.

WIDE DIAMETER POLYMER TIP: a faster expanding bullet for instant traumatic effect on impact.

ACCURATE: the polymer tip and aerodynamic bullet profile guarantee extreme accuracy.

TAPERED-THICKNESS JACKET: controlled expansion for optimum penetration.

CALIBRE: .30-06 Spr / .243 Win / .270 Win / .270 WSM / .300 WM / .308 Win / 6.5 Creedmoor / 7 mm Rem

HUNTING MEDIUM TO HEAVY GAME

EXTREME POINT™

COPPER IMPACT

NEW: LEAD-FREE

The Extreme Point Copper Impact is the perfect lead-free solution for hunters who want a bullet that delivers deep penetration on medium and heavy game.

MONOLITHIC DESIGN: the all-copper bullet provides near-perfect weight retention for deeper penetration, even through bone and dense tissue.

LARGE-DIAMETER POLYMER TIP: faster expansion for immediate impact trauma.

VERY WIDE DEEP CAVITY: guaranteed expansion at any range on any size of game.

CALIBRE: .30-06 Spr / .243 Win / .270 Win / .308 Win / .300 WM

See page 84 for technical information

HUNTING

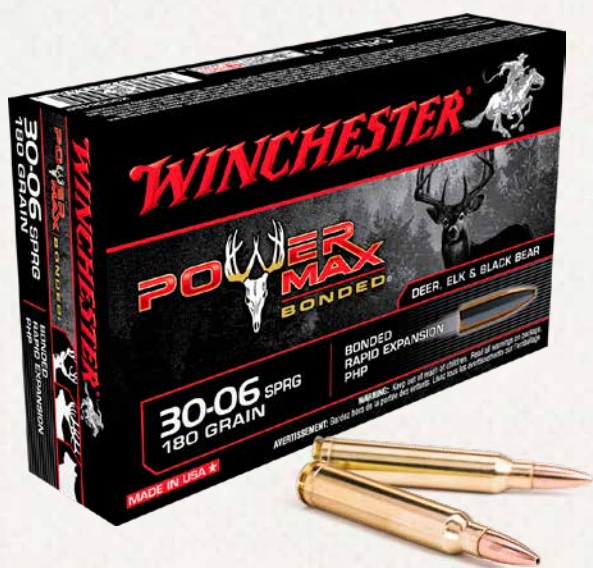

HEAVY GAME

POWER MAX[®]

Optimal WEIGHT RETENTION

The Power Max is for hunters who want a bullet that penetrates deep against big game.

PROTECTED HOLLOW POINT: optimum expansion and greater accuracy.

BONDED LEAD CORE: higher mass retention for deeper penetration and superior knockdown power.

CONTOURED JACKET: designed for optimum expansion in any circumstances (range, speed, game type, etc).

CALIBRE: .30-06 Spr / 243 Win / .270 Win / .270 WSM / 7mm Rem / 7mm WSM / .30-30 Win / .308 Win / .300 WM / .300 WSM

ACCUBOND®

MAXIMUM energy

The Accubond is for hunters who want extreme energy and fantastic accuracy against large game at long range.

PLASTIC TIP: faster expansion on impact.

BONDED LEAD CORE: significant mass retention for better penetrating power and maximum energy transfer.

SOLID, HEAVY BASE: guarantees deep penetration through bones and dense tissue.

LUBALOX® COATING: less friction for better ballistic performance.

CALIBRE: .30-06 Spr / .270 Win / .270 WSM / 7 mm Rem / .300 WM

VARMINT CONTROL

EXPLOSIVE expansion

The Varmint-X range has been specially developed for rapid energy transfer on light animals with thin hides. Its aerodynamic profile and good wind stability make the Varmint-X range formidably accurate at very long range.

VARMINT X® LEAD FREE

CALIBRE: .243 Win / .22-250 Rem / .223 Rem

HOLLOW TIP: optimum expansion and greater accuracy.

ALLOY JACKET: thin jacket with an engineered profile for explosive fragmentation.

ZINC CORE: lead-free.

VARMINT X®

CALIBRE: .243 Win / .22-250 Rem / .223 Rem

PLASTIC TIP: ensures fast expansion and excellent accuracy.

ALLOY JACKET: thin jacket with engineered sidewall profile for explosive fragmentation.

LEAD CORE: designed for rapid fragmentation.

STATIC TARGET SHOOTING

MATCH™

LONG-RANGE ACCURACY

The Match™ range is made for experienced sports shooters. Its sleek profile combines with a fine hollow point and a boat tail to guarantee accurate shots at long range. Match™ bullets are available in the most popular calibres for tack-driving performance: 6.5 Creedmoor 140 gr and .308 Win 168 gr.

CALIBRE: .308 Win / 6.5 CM

POWER POINT SUBSONIC

SHOOTING WITH A SUPPRESSOR

Power Point Subsonic ammunition is ideal when you want top performance and minimum noise for target-shooting at short range or hunting small game and varmints with a suppressor. (*) The engineered profile of the projectile results in high expansion and effective terminal ballistics at subsonic velocity. The Power Point Subsonic range is available .308 Win and .300 Blackout.

(*) Every country has different laws and legal requirements when it comes to suppressors. Please check local laws and regulations. Information subject to change.

CALIBRE: .308 Win / .300 Blackout

FULL METAL JACKET

PRACTICE SHOOTING

Full Metal Jacket rounds are designed for shooters who want ammunition that is low cost and reliable. These rounds can be fired from bolt-action or semi-auto rifles with great accuracy. This range is available in .223 Rem, 308 Win, .30-06 Spr and 6.5x55 Swe.

CALIBRE: .308 Win / .30-06 Spr / 6.5x55 Swe / .223 Rem

SUPER CLEAN FMJ

LEAD-FREE for indoor shooting

CALIBRE: 9 mm Luger

The new Super Clean bullet from WINCHESTER does not expose shooters and the environment to lead.

The traditional lead core has gone, replaced by zinc. Super Clean also has a heavy-metal-free primer. This lead-free construction will be especially popular on indoor ranges and with high-volume shooters. The Super Clean is available in 9 mm Luger, the most popular calibre on shooting ranges.

WINCLEAN

LEAD-FREE FOR INDOOR SHOOTING

WinClean ammunition is loaded with WINCHESTER's own patented heavy-metal-free primer. The bullet has a Brass Enclosed Base (BEB): a brass jacket that surrounds the base and sides. This protects the shooter from exposure to lead vapours that are released when the shot is fired. There are also significantly lower residue levels, for a cleaner gun.

CALIBRE: 9 mm Luger / .357 Magnum

FULL METAL JACKET

ACCURATE and consistent

CALIBRE: 9 mm Luger / .38 Special / .45 Auto / .380 Auto / .40 S&W

The new Super-X 124 gr FMJ in 9 mm Luger from WINCHESTER® is perfect for all shooters and all situations.

FULL METAL JACKET: provides positive functioning and no expansion.

CONSISTENT ACCURACY: trusted for target and range shooting.

REDUCED BARREL FOULING: less cleaning and more range time.

STATIC TARGET SHOOTING

LEAD WAD CUTTER

PAPER TARGET SHOOTING

These wadcutter bullets are specially designed for practice shooting at paper targets at short- and medium-range. The flat front that is the same diameter as the calibre size cuts the paper cleanly to leave a neat and precise impact hole for fast and unequivocal scoring. This type of bullet has to be shot at limited range for best accuracy.

CALIBRE: .38 Special

LEAD

COWBOY ACTION SHOOTING

Lead-tip ammunition known as "Cowboy" ammunition is ideal for "Cowboy Action" shooters. Cowboy Action Shooting is a skill event that requires excellent aim and consistent performance. Their flat-nose design is perfect for rifles and revolvers with a tubular magazine.

CALIBRE: .44-40 Win / 44 S&W Sp / .45 Colt

JACKETED SOFT POINT / HOLLOW POINT

LIMITED EXPANSION

Jacketed Soft Point ammunition offers a good compromise between non-expanding FMJ and high-expanding hollow point ammunition. It can be used for defence or as a "coup de grâce" on the hunt, without causing excessive damage.

CALIBRE: .44 Rem Mag / 9mm Luger

.22LR

STAY TRUE

SUPER SPEED®

VELOCITY AND ACCURACY

This .22 LR munition combines the best components for high-level downrange and varminting performance. The round nose of the 40 gr lead bullet guarantees excellent cycling and feeding.

The bullet is copper-plated for less lead fouling in the barrel. The Super Speed® is renowned as a highly accurate round. Its 386 m/s muzzle velocity makes it ideal for use in semi-automatic and bolt-action guns.

VARMINT HV®

HIGH VELOCITY, HIGH PRECISION

The .17 HMR calibre WINCHESTER® Varmint HV brings together the best technologies to maximum effect when varminting and hunting small animals. The polymer tip maintains a flat trajectory and hits with explosive expansion. This ammunition combines high velocity with outstanding accuracy for the best performance, even at long range.

CALIBRE .17 HMR

SUPER-X® JHP

EXPLOSIVE EXPANSION

The fast and explosive expansion of the Jacketed Hollow Point bullet makes this the ideal .17 HMR ammunition for varminting.

CALIBRE .17 HMR

.22 WM

SUPER-X®

.22 WM FULL METAL JACKET

A deep penetrating and highly accurate FMJ bullet with a flat trajectory. The power of the .22WM calibre combines with the effectiveness of the FMJ bullet to make this cartridge the ideal choice for varminting and target shooting.

CALIBRE .22 WM

A WINCHESTER® CARTRIDGE FOR EACH TYPE OF HUNT

The WINCHESTER® name has been associated with innovation for over 150 years. During that time, we have expanded our range with groundbreaking new products that give hunters the perfect cartridge for their hunt.

If wood pigeon is your thing or you prefer your luck with the duck, if widgeon fits the bill or you won't go out the door unless it's boar, WINCHESTER® has the ammunition you need.

When you chamber a WINCHESTER® round, you know the game is almost in the bag.

PEST CONTROL

There's a pigeon or a corvid to shoot at almost every time of year. You're fixated on that breathtaking, magic moment the birds fly overhead. It's such a fleeting moment that success is the only option.

ZZ PIGEON CAL 20: VELOCITY AND POWER AT LONG RANGE

WORLD RECORD

In 2019, **WINCHESTER** exhibition shooters Aaron and Steve Gould broke the world long-distance shooting record when they hit a clay at 146,3 m using **WINCHESTER LONG BEARD** shells!

LONG BEARD XR®

WORLD RECORD long range shot

SHOT-LOK™ TECHNOLOGY, HARDENED RESIN

An effective very long-range shot requires perfectly spherical pellets that fly through the air without veering off course. The lead shot in the Long Beard shells are encased in hardened resin using Shot Lock™ technology. When the gun is fired, the resin fragments into a fine protective powder that fills all the air gaps between the pellets.

Now the pellets no longer collide, retaining their perfectly spherical shape.

The shot pattern remains perfectly tight and the pellets penetrate even further.

CALIBRE 12 49 g / cal. 12 56 g

SUPER SPEED

HIGH VELOCITY, groupings and **COMFORT**

The secret of the Super Speed shells is their ability to turn outstanding performance into a superbly comfortable shooting experience in a wide choice of gauges and loads.

The exclusive powder and optimal combustion offer a higher velocity shot at lower pressure for greater comfort.

The specially designed cup wad delivers highly consistent shot patterns. Finally, the welded star crimp ensures constant pressure for maximum velocity.

VERY HIGH 20 mm HEAD (12 ga) firmly secures the shell.

NICKEL-PLATED 40 g 12-gauge and 32 g 20-gauge shot for deeper penetration and even tighter groupings.

CALIBRES 12 36 g / cal. 12 40 g Nickel-plated lead / cal. 12 50 g / cal. 16 32 g / cal. 20 28 g - cal. 20 32 g Nickel-plated lead / cal. 28 24 g

Heavy **LOADS** and **SUPER HEAVY** magnum

The 12-gauge and 20-gauge Super XX and DOUBLE X in 35 to 63 g loads mean one thing: power. The heavy lead loads deliver maximum impact at long range for tremendous stopping power. The DOUBLE X shells are loaded with copper-plated lead shot that is coated in a fine protective powder for increased effectiveness. These two technologies retain the spherical shape of the shot for increased ballistic efficiency at long range. Also available in 10-gauge super magnum loaded with a 56 g copper-plated lead shot.

DOUBLE X

CALIBRES 20 35 g / cal. 10 56 g - Copperplated pellets

SUPER-XX®

CALIBRES 12 35 g / cal. 12 89 mm 63 g Super Magnum

RANGER®

GENTLE SHOT WITH CONSISTENT SHOT PATTERNS

The Ranger® gives hunters on walked-up shoots or on the trail of small game in open country the smooth shots and consistent groupings that have made it a legend among shotshells for decades.

The red case with its exclusive welded star crimp provides better protection for the components and locks in WINCHESTER's expertise.

The 32 g load is your perfect partner for shooting doves and pigeons, corvids and game including pheasants, even at long range.

CALIBRE 12 32 g

See page 88 for technical information

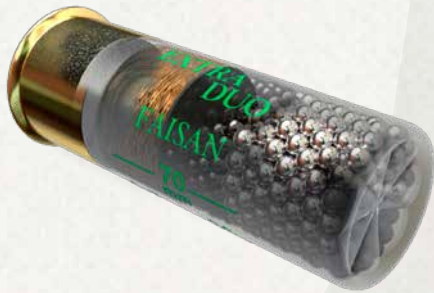

NEW: TWO SHOT SIZES for perfect PATTERNING

The new EXTRA DUO range has been developed to deliver double the performance: the shell is loaded with two separate layers of different-diameter shot for a more effective and lethal shot pattern. The larger, faster pellets hit the target first, transferring maximum energy. They are immediately followed by the smaller pellets, which optimise the shot pattern with the maximum number of impacts.

EXTRA DUO PHEASANT

The (felt) grease wad delivers optimum shot distribution even at long range.

CALIBRE 12 36 g (n°5 + n°7)

EXTRA DUO WOODCOCK

The disperser wad in this shell makes it particularly effective at short range in dense vegetation.

CALIBRE 12 35 g (n°8,5 + n°9)

SPECIAL FIBRE - GREASE WADS

HIGHEST SHOT PATTERN CONSISTENCY

The famous pink grease wad delivers a perfectly evenly balanced spread from the centre to the edge of the grouping to guarantee effective short-to medium-range shots.

The Special Fibre shells are more consistent and flawlessly reliable against birds on the wing or when the undergrowth is in the way of you and a rabbit or woodcock.

CALIBRES 12 32 g - cal. 12 34 g - cal. 12 36 g / cal. 20 28 g

GREASE WADS

RANGER® DISPERSER

THE WIDEST SHOT PATTERN AT SHORT RANGE

Some environments such as undergrowth require you to shoot at short range, between 7 and 15 meters.

The disperser in the cup wad spreads the shot and effectively opens the grouping for this type of short-range, often instinctive shot.

CALIBRES 12 34 g / cal.20 27 g

DISPERSER WAD

SPECIAL PIGEON

**FAST SHOT AND
TIGHT GROUPING
AGAINST PIGEONS**

WINCHESTER has developed a special shotshell for this popular yet demanding bird.

The heavy 36 g load, 400 m/s velocity and No. 5, 6 and 7 shots that are perfectly calibrated for this type of bird make this shell your best bet for high-density shot patterns at long range.

CALIBRE 12 36 g

SPECIAL MIGRATEUR

**LIGHT LOAD AND MAXIMUM
VELOCITY AGAINST SMALL
MIGRATORY BIRDS**

The "Spécial Migrateur" is designed for hunting small migratory birds such as larks, thrush and quail.

Its 32 g load is available in all shot sizes from No. 7.5 to 12, and is perfect for use against this type of tiny game.

At a very high 405 m/s, it is suitable for long-range shots.

CALIBRE 12 32 g

SPECIAL CORVIDES

**HEAVY LOAD
for CROWS**

This shotshell fires its 38 g load in No. 4 or 6 shot at 400 m/s to deliver the kind of impact required to take down crows from any distance.

CALIBRE 12 38 g

Nickel-plated LEAD SHOT

SPECIAL CHASSE

**GREAT RANGE
AND PENETRATION**

The "Spécial Chasse" is the cartridge for driven days and walked-up shooting in open country. The 34 g load is nickel-plated for increased hardness and less shot deformation. The result is remarkable range and fantastic penetration.

CALIBRE 12 34 g

SPECIAL PETITS CALIBRES

**THE 20-GAUGE
THAT PERFORMS
LIKE A 12-GAUGE**

The 28 g nickel-plated shot load delivers excellent penetration and a high-density grouping, so that you can hunt any game with your 20-gauge all year round.

CALIBRE 20 28 g

SUPER X

HEAVY LOADS AND SMALL GAUGE

The Super X range of cartridges provides heavy loads for outstanding performance from small 28-gauge and 410-bore guns.

CALIBRES .410 / cal. 28 28g

ZZ CANARD

NEW: WINCHESTER'S FASTEST steel shotshell

The 33 g of steel shot in the new ZZ Canard shotshell flies at 440 m/s, making it the fastest in the WINCHESTER range of steel shotshells. The high velocity is mitigated by the relatively low load weight to maintain a comfortable shooting experience. The steel pellets are coated in a fine layer of tin for effective corrosion resistance.

CALIBRE 12 33 g

STEEL 36

76 MM STEEL MAGNUM

The heavy 36 g steel load has a velocity of 415 m/s for long-range shots against heavy waterfowl.

As with all WINCHESTER steel shotshells, the cup wad is reinforced for optimum barrel protection. The 20 mm head firmly secures this Magnum shell.

CALIBRE 12 36 g

SPECIAL CANARD

HIGH-VELOCITY STEEL SHOT

The cartridge that raises the game of steel shot a little further, with an effective range that will surprise you.

Its 34 g steel load and 410 m/s velocity offer maximum firing comfort.

CALIBRE 12 34 g

STEEL 28

STANDARD PRESSURE STEEL SHOTSHELL

This shell is classed as standard pressure with a 28 g steel shot load, and can be fired in complete safety from **shotguns proofed to a minimum of 930 BAR (*)**

Available in No. 5 or 6 steel shot, ideal for small and medium waterfowl.

(*) If in doubt, ask your dealer for confirmation that your shotgun can fire standard pressure steel shot.

CALIBRE 12 28 g

XTENDED RANGE BISMUTH

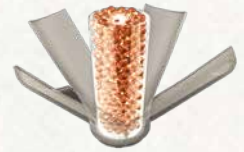

DEVASTATING STOPPING POWER AT EXTREME RANGE

The high-density Bismuth gives you a similar level of penetration as lead. The exclusive Shot-Lok® technology and shape-preserving resin guarantee a denser shot pattern for greater stopping power. The result is twice as many on-target impacts at 50 meters compared to an equivalent lead load.

This standard-pressure, lead-free, high-performance shell can be fired from **shotguns proofed to a minimum of 930 BAR (*)**.

(*) *If in doubt, ask your dealer for confirmation that your shotgun can fire standard pressure steel shot*

CALIBRE 12 46 g

SHOT-LOK® TECHNOLOGY, HARDENED RESIN

BLIND SIDE **

HEX STEEL SHOT for **MAXIMUM lethality**

The shape of the Hex Steel Shot™ results in massive wound channels. Each shot transfers maximum energy, increasing the kill zone by 25%.

The special "Diamond" cut wad maintains shot pattern density despite the high velocities and hex shape of the shot.

The BLIND SIDE delivers overwhelming stopping power that other steel shotshells cannot match, even at long range.

CALIBRES 12 35 g - cal. 12 39 g - cal. 12 46 g / cal. 20 30 g

DRYLOK **

OPTIMAL PROTECTION FOR WETLAND HUNTS

The Drylok range has been specially designed to resist oxidation and moisture. This shot is treated against corrosion for a superlative shot pattern, and is protected by a welded centre star crimp.

The primer is varnished to keep a perfect seal and guarantee flawless ignition and combustion whatever the conditions.

CALIBRES 12 35 g - cal. 12 44 g / cal. 20 28 g

See page 88 for technical information / ** High-performance shotshell for steel shot proofed shotguns.

DID YOU KNOW?

WHICH STEEL SHOTSHELL FOR YOUR SHOTGUN?

Every **WINCHESTER®** shotgun with an interchangeable choke is steel shot proofed and has a "fleur-de-lis"  stamped on the barrel.

They can fire all steel shotshells, from standard to high-performance. Only "standard" steel shotshells can be fired from shotguns that are "standard" proofed to 930 bars. For more information on steel shot and the rules governing their use, visit <http://www.winchestereurope.eu/steel>

Roe deer DRIVES

There are a number of advantages to shooting roe deer with shotshells, when and where it is permitted. It is the safe choice in a semi-urban area. There is less chance of ricochet with more control over range.

Large shot and buckshot prove highly effective at short range, with maximum stopping power.

Our new range of shotshells designed specifically for use on roe deer give you the best of Winchester®'s technology for driven hunts with shotguns.

SUPER SPEED CHEVREUIL

The Super Speed family now includes a Roe Deer Special with No. 1 shot.

Choose from 40 g nickel-plated or 50 g shot loads for the 12-gauge version. The 20-gauge version has a 32 g load of nickel-plated shot.

The nickel-plated shot provides excellent penetration and tightly packed grouping.

CALIBRES 12 40 g NI - cal. 12 50 g / cal. 20 32 g Nickel-plated lead

SUPER XX CHEVREUIL

CALIBRE 12 63 g

For shots that require a heavy load, you won't find better than the 63 g of No. 1 shot in the Super XX Roe Deer Special.

MAGNUM BUCKSHOT

Maximum PENETRATION and precision

CALIBRE 12 12x8.6mm Coppered lead

This top grade shell is loaded with twelve 8.6 mm copper-plated shot. Copper plating hardens the shot for greater penetration and accuracy. The heavy 45 g load and 385 m/s velocity ensure maximum effectiveness.

USE: HEAVY GAME AT SHORT RANGE.

DOUBLE X[®]

SHOT POWER AND STOPPING POWER

The Double X[®] is loaded in the USA with 9, 12 or 15 x 8.6 mm (N° 00) copper-plated shot. The copper-plated pellets are coated with a fine powder of composite material that forms a buffer and reduces shape loss. Superb performance delivering deep penetration and outstanding accuracy.

USE: HEAVY GAME AT SHORT RANGE.

CALIBRE 12 9x00 Coppered lead - cal. 12 12x00 Coppered lead, 15x00 Coppered lead

SUPER X[®]

QUALITY AND PERFORMANCE

These buckshot shells were made in the USA using the best loading technology. The 8.6 mm pellets are coated in a fine powder made from composite materials that forms a buffer to prevent shape loss. This range is available with a 9-pellets load in the 12-gauge version or a 15-pellets load in the 12-gauge Magnum (76 mm) version.

USE: LIGHT TO MEDIUM GAME AT SHORT RANGE.

CALIBRE 12 9x00
NEW: cal. 12 15x00 76mm

STANDARD BUCKSHOT

QUALITY AND COMFORT

This buckshot range is available in multiple shot sizes and quantities to suit every requirement. The wads are adapted to each load to guarantee a better shot pattern and greater firing comfort for the hunter.

USE: LIGHT TO MEDIUM GAME AT SHORT RANGE.

CALIBRE 12 9x8.6mm - cal. 12 12x7.6mm - cal. 12 16x4mm - cal. 12 27x6.9mm

DEER SEASON

NEW: ROBUST STOPPING POWER against large GAME

This new, heavy 35 g slug has been specially developed to give big-game hunters the best performance from smoothbore and rifled barrels. A stabilizing wad is inserted into the slug to increase in-flight accuracy. The slug deforms on impact, transferring maximum stopping power.

USE: HEAVY GAME AT MEDIUM AND LONG RANGE/SMOOTHBORE

Suitable for rifled and smoothbore barrels.

CALIBRE 12 36 g

BRENNEKE EMERALD

EXCELLENT PENETRATION AGAINST HEAVY GAME

The slug you need to hunt boar and deer. The integrated plastic base acts as a gas seal and stabilizer, giving you the highest possible velocity and accuracy. The solid 34 g pointed slug ensures good penetration.

USE: HEAVY GAME AT MEDIUM RANGE.

Designed for smoothbore barrels only.

CALIBRE 12 34 g

XP3

MAXIMUM PRECISION AND PENETRATION FOR RIFLED BARRELS

The XP3™ was developed for rifled-barrel shotguns and generates maximum force against deer, boar and roe deer. The XP3™ is a sub-calibre slug sabototed in a special plastic support that imparts spin to the projectile, eases its passage through the chokes, and guarantees higher velocity.

USE: HEAVY GAME AT MEDIUM AND LONG RANGE.

Designed for rifled barrels only.

CALIBRE 12 19,5 g - cal. 12 76 mm 19,5 g

RACK MASTER

Maximum deformation, HIGH STOPPING POWER

CALIBRE 12 32 g / cal. 16 28 g

Outstanding expansion from the new Rackmaster slug. This heavy (32 g) slug with the expanding hollow point guarantees maximum knockdown power.

The wad stabilizer maintains excellent accuracy.

USE: HEAVY GAME AT MEDIUM RANGE.

Designed for rifled and smoothbore barrels.

SUPER X[®]

VELOCITY AND ACCURACY

The Super X[®] slug brings you a high-velocity shot with an accurate, flat trajectory. The secret is in the design, with a concave rear to shift the centre of gravity forwards.

The slightly hollow point provides faster expansion and maximum energy transfer. This 28 g slug is ideal against boar and roe deer at medium range. Available in a 21 g lead-free version.

USE: LIGHT AND MEDIUM GAME AT MEDIUM RANGE.

Designed for smoothbore barrels only.

CALIBRES 12 28 g - cal. 12 Mag 28 g / cal. 20 21 g / cal. .410 6 g. Available in lead-free, calibre 12 21 g

See page 88 for technical information

NEW:

PHOTODEGRADABLE

WAD

From 2020, all our X2 shotshells will come with a photodegradable wad, which decomposes faster than a conventional plastic wad under the effect of light and the weather at the range, without affecting performance.

X2 STEEL

HIGH-PERFORMANCE STEEL at a competitive price

The X2 STEEL is classed as a standard pressure shell and can be fired from all shotguns proofed to 930 Bar (*). In 12-gauge 24 g and 28 g load, it is available in no. 7 shot. For skeet shooting, the X2 STEEL is also loaded in 12-gauge 24 g no. 9 shot.

(*): If in doubt, ask your dealer for confirmation that your shotgun can fire standard pressure steel shot.

CALIBRE 12 24 g - cal. 12 21 g - cal. 12 28 g

X2 LEAD

PERFORMANCE and versatility

Available in 12-gauge with different lead sizes and 24 g / 28 g / 32 g loads, this shell works for all shooting disciplines.

CALIBRE 12 24 g - cal. 12 28 g - cal. 12 32 g

AA TRACKER

TRAINING SHOTSHELL: see your **SHOT**

CALIBRE 12ga 32 g

AA TRACKER WAD

The AA TrAAcker gives shooters a clear view of their shot trajectories all the way to the target. The secret is in the helix-shaped petals that spin the wad, which tracks the pattern through the air.

Available in orange and black wads to suit the ambient light.

STREUKREUZ

LARGE DISPERSION OF SHOT

The 24 g Streukreuz is a specific cartridge used in short-distance shooting in sporting clay guns. The plastic disperser wad guarantees a large dispersion of shot at a very short distance, even in shotguns with a full choke.
