## HUNTING TODAY

Hunting connects: different generations, multiple people in society and across national borders. It might be a family tradition, the wish to obtain high quality food, or the joy of working with dogs. Those who decide to hunt actively may have various reasons; but they all have one motive in common – to experience and enjoy nature. There are very few opportunities where one can come into such close and pure contact with wildlife as it is offered while hunting. Especially in difficult times like today, this passion for hunting connects us in particular with our home and with what is truly important to us.

The sustainable management of nature has always been an essential part of hunting. Innovative hunting equipment is not contradictory to our traditions, but can complement them. Modern materials and technologies optimize the safe identification of game and promote precise shooting. A good example for that is thermal imaging technology, which, in particular, is a great help for responsibly hunting wild boars at night.

The new Blaser thermal clip-on mount allows you to combine perfectly – and in a highly precise manner – the Blaser daylight optics with a thermal clip-on device. We would like to accompany you, whether you are a hunter, nature lover, outdoor enthusiast or all three at once, with our products and therefore we present our state-of-the-art and premium-quality equipment on the next 320 pages. Starting with clothing through to hunting experiences, ammunition and from optics through to hunting firearms.

Experience your personal nature adventure with Blaser!

Waidmannsheil,

Yours,  
Dr. Jens Uwe Drowatzky  
Blaser Group CEO

## Our Passion: The Hunt

### **Born Out of Passion**

Hunting may be one of mankind's most fundamental instincts, but in a modern world, we hunters must constantly adapt to new challenges. This is only possible through innovation and the people who drive this with passion.

### **From Partnership**

As a leading innovator, we are the driving force in the international hunting firearms industry. 60 years of experience have sharpened our senses for innovative technological advances while always remaining aware of our ethical obligations.

### **From Enthusiasm**

Our Blaser employees share your enthusiasm for hunting and have a wide range of talents. We are proud of the diversity of personalities and skills, and the great collaboration that happens within the company to produce the finest hunting equipment.

## Our Claim: Creating Values

### **Milled from Solid Blanks**

The manufacture of system parts from solid blanks gives you sound quality, reliability and durability. Labor-intensive manufacturing on the most modern CNC machines provides the basis for minimum tolerances and long-lasting shooting accuracy.

### **From High-Quality Materials**

Highly tempered steel, forged light-metal alloys and precious walnut are brought together with artistic precision to create unique, exceptional objects. Every Blaser hunting firearm is an investment for future generations.

### **With a Sense of Tradition**

We characterize today's hunting culture with a sense of traditional craftsmanship. Highly qualified gunsmiths, stock makers and engravers make the firearm into a masterpiece that highlights the personality and passion of its owner.

## Our Conclusion: Everything from One Source

Enthusiasm for the manufacturing of hunting firearms and the passion for hunting have shaped Blaser. Only in this way, outstanding products and perfectly aligned overall solutions were born, that are consistently extended and further developed – because successful hunting needs far more than just an excellent hunting firearm.

### **Valuable Hunting Optics**

For us, creating the best unit of rifle and target optics has always been a matter of the heart. For our own development division in Wetzlar, we brought together the best of their trade. The result is hunting optics, that are unparalleled. This is exactly as riflescopes and binoculars should be in order to satisfy our customers.

### **Aligned Equipment**

Everything from one source also means for us: high-performance rifle ammunition, essential equipment that is indispensable for hunting and premium wear that is made for active hunting.

### **Attractive Hunting Experiences**

All over the world, Blaser also offers selected hunting trips where highly professional outfitters do everything to fulfill the high demands of our customers to ensure an unforgettable hunting experience.

# Made for Pros

Countless hunting guides from all over the world carry a Blaser by conviction. Only when the going gets tough, does it become evident that a rifle is both reliable and accurate. It is through the experiences of professional hunters that has helped Blaser sporting arms acquire their legendary reputation globally.

“The correct hunting strategy needs to be decisive. It yields much more than constant hunting pressure. The R8 is the perfect rifle above all, due to its short receiver length, when using a silencer. This is the ideal combination to support me while hunting because it doesn’t interfere with the game and is entirely in line with ethical hunting.”

Professional hunter Sepp Rinner has the good fortune of being able to work on a private estate with an owner who has a soft spot for game. Of course, profitable forestry operations also play an important role on his private lands.

Therefore, it is understandable that one is highly interested not only in a healthy forest but also in a well-considered, sustainable cultivation strategy. Nevertheless, it is even more remarkable that with expertise and foresight, this strategy has proven successful in preserving the alpine forest which offers a home to red deer, chamois and many other indigenous species. Many professional hunters, just like Sepp Rinner, have a shared passion for heritage and work to keep it protected.

**Sepp Rinner**  
**Professional Hunter,**  
**Aschau / Chiemgau, Germany**

“In the past, I was rather skeptical about modern hunting firearms. Today, I know how the R8 performs even under the most extreme conditions.”

As the manager of Sney Rivier Lodge in the heart of Namibia, Conway Volek has a broad responsibility. His focus is on wildlife management which – besides hunting – also comprises renaturation measures.

Many of Namibia’s visitors actually do not know the fact, that since the beginning of the 19<sup>th</sup> century a significant change of vegetation has taken place in large parts of the country. The reason for this was the more and more intense cattle ranching resulting in a strong scrub encroachment of the once open savanna. Grass reserves decreased continuously having dramatic consequences for the wildlife population – above all in years with little rain. A professional scrub clearance thus is an important factor in increasing the wildlife’s survival chances even during long dry periods.

Today, the funding of such renaturation projects is almost exclusively financed through hunting. The R8 bolt action rifles which are available at the Sney Rivier Lodge are constantly used by hunting guests while out in the field. They are made for tough use, easily resist hard knocks and thorns as well as dirt while proving their reliability and precision each and every day.

**Conway Volek**  
**Professional Hunter,**  
**Manager Sney Rivier Lodge,**  
**Namibia**

“Our location close to the Atlantic is characterized by salty air and a lot of rain. When hunting, the rather difficult terrain has proven to be a further challenge, so that you quickly learn which kind of equipment is doing the job and which is not. This is the primary reason for why we’ve been carrying R8 models with synthetic stocks for years. The same durability is built into all of the Blaser optics which has shown to be the ideal combination in these extreme conditions. Simply indestructible and at the same time extremely accurate.”

Niall Rowantree is one of the best-known professional hunters of Scotland. Located on the peninsula Ardnurchan near the Scottish west coast, he manages an estate with a size of more than 8,000 hectares. Besides hunting, Niall Rowantree is also responsible for the implementation of important nature conservation projects.

Restoring the biodiversity of flora and fauna on Scotland’s coasts, is a mission to whose funding hunting decisively contributes. Many hunters from all over the world come to the coastal Highlands. Where else can you experience exciting stalk hunting on red deer in such a spectacular landscape? In addition, it is a very welcome side effect that hunting guests finance a considerable amount of the reforestation projects.

**Niall Rowantree**  
**Professional Hunter, Wildlife Manager**  
**Acharacle, Scotland**

A close-up photograph of a person's hands holding a pair of black binoculars. The person is wearing a light-colored plaid shirt. The background is a field of tall, golden-brown grasses, slightly out of focus. The lighting is warm, suggesting a sunset or sunrise. The overall mood is serene and focused.

# OUR HUNTING OPTICS

Some may ask themselves what was the reason for which Blaser started developing their own optical devices. Philosophically answered: The best is the enemy of the good. Constructively answered: Because there are innovative technologies today that meet our requirements when turning our knowledge into one-of-a-kind products. For our customers this means: the right Blaser binoculars for every use, the best Blaser target optic for every rifle. Going for the ideally matching hunting equipment can be that easy.

# Our Target Optics: For Better Shooting

# Reticle in the First Focal Plane: The Shot Hits There, Where It is Expected!

Rifle, scope and scope mount – these are the essential pillars of shooting accuracy. No wonder then, we at Blaser do not compromise. This is also the reason for which we have developed a new generation of riflescopes and while doing so, consequently count on reticles in the first focal plane.

Only with riflescopes featuring a reticle in the first focal plane, the point of impact cannot be changed when switching magnification due to their special design. The reticle overlays the target image before the moving parts of the zoom system come into play.

Originally, reticles in the first focal plane were the benchmark with European premium riflescopes because of their more reliable construction. Only with the development of illuminated reticles for use by day many manufacturers switched their reticle to the second focal plane. The reason for this was the fact that at that time the luminous structures could not be realized fine enough in order to be integrated into the first focal plane.

Thanks to Swiss phase grating technology it was possible to design very fine reticles in the first focal plane featuring a reticle illumination that is also suitable for daylight. A benefit that we at Blaser simply had to make use of – for a constant point of impact with any magnification: The shot hits there, where it is expected!

“On the Scottish west coast, we have very rough hunting conditions. This is why I let many of my guests shoot my R8. When it comes to target optics, I am happy, that Blaser builds high-performing riflescopes with reticle in the first focal plane. Anyone who shoots as much as I do, simply knows that this is the most reliable solution.”

**Niall Rowantree**

*Wildlife Manager and  
Professional Hunter,  
Scotland*

"The Quick Distance Control simply is sensational with Blaser. The inner workings of the turret are constructed fully of metal and extraordinarily durable even with constant adjustments. Throughout the year, countless guests shoot with my rifle. Depending on the shooting distance, I simply adjust the corresponding clicks with a twist of the hand and my guest can always stay on target."

**Niall Rowantree**

*Wildlife Manager and  
Professional Hunter,  
Scotland*

## More Confidence Even with Long- Distance Shots

Even when it is the exception rather than the rule, there are situations in which a long-range shot may become necessary. All well and good, when you are technically prepared for being able to remain on target and not having to aim higher. The Quick Distance Control (QDC) of our riflescopes was specially developed for this purpose. Their highly precise and at the same time robust mechanics provide a consistently reliable return to zero.

The Blaser riflescopes 2.8–20×50iC and 4–20×58iC come with QDC Quick Distance Control as a standard feature. Before shooting over long distances, the corresponding elevation correction of the fast reticle adjustment can be done comfortably even when already in shooting position.

A unique feature is the possibility to fix the two adjustments "zeroed" and GEE (4cm high with a rifle that is zeroed at 100m). This insures that an unintentional adjustment is not possible. Nevertheless hunters can easily make windage or elevation adjustments with just one twist of the hand, should they need. If, due to a long shooting distance, 4cm high shot at 100m should not be sufficient, the reticle elevation adjustment can be rotated further by the necessary "number of clicks". In this case, the adjustment is not locked by lowering the adjustment turret, so that its previously selected adjustments remain clearly visible and reminds you to later set back to "normal position".

# The Cocking Slide Activates the Illuminated Dot

Illumination Control makes this possible with all Blaser R8 and K95 rifles.\*

A sensor in the riflescope recognizes the position of the cocking slide and automatically regulates the switch-on/-off function of the illuminated dot. In order to prepare for the shot one single movement is enough. The illuminated dot's intensity then always corresponds to the intensity that was adjusted last. Its adjustment is comfortably done using the turret on the scope's right. Thanks to this perfect interplay of rifle and scope you gain time and thus the necessary calmness for a safe shot.

When using Blaser riflescopes on rifles without an iC cocking slide, the illuminated dot is activated manually by pulling out the turret on the right. In order to reach the longest possible battery life, the illuminated dot automatically switches off as soon as the rifle is in a very steep to vertical or lying position. Once taking a shooting position again, the illuminated dot is automatically activated.

*\* All Blaser R8 models can be retrofitted with an iC cocking slide.*

See more:  
[www.blaser.de/iC](http://www.blaser.de/iC)

# Automatically Locked

The adjustment turret for parallax is automatically locked for a distance of approximately 100m. Thus, it cannot be adjusted unintentionally. Before shooting at distances greater than 100m, the adjustment turret is easily pulled out to select the desired distance.

# The Swiss Reticle Revolution

Since the days of William Tell, the Swiss have been recognized for their utmost precision. With the collaboration between the Swiss and Blaser a new standard of precision adds value to any hunting experience.

Thanks to innovative Swiss phase grating technology, Blaser riflescopes captivate through a low reticle sub-tension even with high magnifications.

In combination with the daylight-visible illuminated dot that is adjustable to all light conditions, nothing stands between you and your perfect shot anymore – from daytime stalking to sitting game at night.

# The Better Function May Also Look Even Better

The Blaser riflescopes were designed by hunters with a passion for hunting. Thanks to the sophisticated layout and intuitive handling of all functional elements, the hunter can totally focus on a safe and accurate shot. Their distinctive design gives rifle and scope a perfectly shaped overall appearance.

## **Sophisticated Functionality**

The very flat turret for the windage adjustment was deliberately positioned on the left side of the riflescope's body. The higher turret with adjusting wheels for the parallax compensation and illuminated dot intensity are positioned on the right – all for the purpose of comfortable handling. For right-handed shooters (more than 85% of all hunters) this provides an unobstructed view of the scope settings without interfering with your peripheral vision.

Above all when shooting at moving game, where it is fundamentally recommended to keep both eyes open, this is a great advantage to having an optimum view over the total field of view.

In order to respond to the highest requirements when it comes to precision, the Blaser riflescopes deliberately feature the reticle in the first focal plane – forward of the magnification lenses. Only with this design, mechanical tolerances do not influence the point of impact when changing magnification.

## **Unique Design**

The clean lines of the Blaser riflescopes sit in perfect harmony with rifle and riflescope. All functional components feature a robust rubber coating with unique fish-scale chequering, providing distinctive style and color schemes perfectly adapted to those of the rifle.

## **Bright, Naturally Colored, Weatherproof**

The CCC (Color Corrective Coating) multi-layer coating of all lenses provides a color neutral, high-contrast view at any time of day. Eyepiece and objective lens are additionally protected against dirt and moisture thanks to the SLP (Smart Lens Protection) coating. The finish is applied using nano technology ensuring water and dust resistance.

## When the Going Gets Tougher

The durable body of the Blaser riflescopes features a robust hard anodized coating which makes it resistant to external influences. When dealing with a drop or fall while hunting, the illumination adjustment control was purposefully built in conjunction with the parallax adjustment turret to avoid damage. Both operating elements are made of sturdy metal and feature a vulcanized rubber coating in handy fish-scale chequered design.

## Larger Illuminated Dot, Faster on Target – Entirely Automatic

The 1–7x28 iC is state-of-the-art level performance additionally equipped with an Intelligent Variable Dot. Rough terrain, foul weather, and high levels of stress will put even the most experienced hunter to the test. The dual output feature of the illuminated dot is just the answer you have been searching for. At low power of magnification, 4x and lower, the illuminated dot is larger in size and ideal for fast moving game providing greater situational awareness and intuitive target acquisition. The IVD's dot intensity can also be adjusted by a side mounted turret.

Above 4x magnification the dot size is automatically reduced for accurate shot placement over long distances. Precise dot resolution is essential for target identification and shot placement. The dot intensity can also be adjusted by a side mounted turret. Whether bright sun, reflective snow or deep twilight, as soon as the game comes into sight, target acquisition is intuitive.

## Blaser 2.8-20x50 iC The All-rounder

Compact performance – whether mountain hunting, stalking or sitting game, the 2.8–20x50iC captivates with compact size and range.

See more:  
[www.blaser.de/allrounder](http://www.blaser.de/allrounder)

#### Compact and Powerful

20x maximum magnification and bright 50 mm objective lens merge into an extremely compact construction. Thanks to the one-of-a-kind design, rifle and scope result in a harmonious overall appearance.

<b>Magnification</b>	2.8x – 20x
<b>Effective lens diameter</b>	28 mm – 50 mm (1.1" – 1.97")
<b>Exit pupil diameter</b>	10 mm – 2,5 mm (0.39" – 0.1")
<b>Field of view at 100 m (109 yds)</b>	13.2 m – 1.9 m (14.4 yds – 6.5 yds)
<b>Eye relief</b>	90 mm (3.5")
<b>Transmission</b>	>90% night / >92% day
<b>Parallax compensation</b>	50 m (54.7 yds) to infinity, 100 m (109 yds) arresting
<b>Elevation / windage adjustment at 100 m (109 yds)</b>	230 cm (2.52 yds) / 90 cm (0.98 yds)
<b>Elevation adjustment with QDC at 100 m</b>	80 cm (31.5")
<b>Adjustment per click</b>	1 cm / 100 m (0.39" / 109 yds)
<b>Diopter adjustment</b>	+2.5 / -3 diopter
<b>Weight</b>	770 g (27.16 oz)
<b>Overall length</b>	343 mm (13.5")

- > Universal magnification range
- > Elegant and compact, only 343 mm overall length
- > 20x magnification provides invaluable services to safely identify game and gives the ability to interpret and understand targets at long range.

# Blaser 4-20x58iC

## The Light Giant

The twilight specialist – superior for sitting game and when hunting in the very last light. Excellent light gathering characteristics far exceed what other scopes provide in low light conditions. Making the impossible long range shot possible.

<b>Magnification</b>	4x – 20x
<b>Effective lens diameter</b>	49mm – 58mm (1.93" – 2.28")
<b>Exit pupil diameter:</b>	12.3mm – 2.9mm (0.48" – 0.11")
<b>Field of view at 100 m (109 yds)</b>	9.2m – 1.9m (10.0yds – 2.0yds)
<b>Eye relief</b>	90mm (3.5")
<b>Transmission</b>	>90% night / >92% day
<b>Parallax compensation</b>	50m (54.7 yds) to infinity, 100m (109 yds) arresting
<b>Elevation / windage adjustment at 100 m (109 yds)</b>	150cm (1.64yds) / 90cm (0.98 yds)
<b>Elevation adjustment with QDC at 100m (109 yds)</b>	80 cm (31.5")*
<b>Adjustment per click</b>	1 cm / 100m (0.39" / 109yds)
<b>Diopter adjustment</b>	+2.5 / -3 diopter
<b>Weight</b>	885g (31.22oz)
<b>Overall length</b>	365mm (14.37")

- › High contrast and optimal sharpness of detail, especially in the last light
- › 58 mm lens diameter means more than 7% additional light yield compared to a 56 mm lens
- › 20x magnification provides invaluable services to safely identify game and gives the ability to interpret and understand targets at long range.

\* when using the 0.2° forward inclined Blaser Mount.

### 58mm Objective Lens Diameter

Compared to riflescopes featuring a 56mm objective lens diameter, 58mm provide an additional light yield of 7%. This allows use of a higher magnification with better detail recognition in deep twilight or at night.

See more:  
[www.blaser.de/light-giant](http://www.blaser.de/light-giant)

**True 1x Magnification**

Only with both eyes open, the shooter's peripheral vision can truly track game ensuring a safe shot. The Blaser 1-7x28iC offers this benefit thanks to its true 1x magnification. Ideal for optimum overview and rapid target acquisition.

## Blaser 1-7x28iC The Intelligent One

The comfortable eye relief of 90 mm minimizes the risk of recoil induced eye injuries on big bore rifles. The intelligent Variable Dot IVD is an invaluable assistant in hunting for strongly self-protective game which requires instant target acquisition when approaching quickly.

Thanks to the 28 mm objective lens the 1-7x28iC is perfectly usable even in twilight, which makes it a versatile riflescope for worldwide hunting on all seven continents.

- › IVD (Intelligent Variable Dot), automatically activated illuminated dot for driven hunts
- › True 1x magnification
- › Very large field of view of more than 40 m
- › Large exit pupil of 10mm with 1x for rapid target acquisition
- › Large zoom range for universal use
- › 28mm lens diameter enables a 7x magnification with an exit pupil of 4mm. This enhances the field of application with poor lighting conditions.

<b>Magnification</b>	1x – 7x
<b>Effective lens diameter</b>	10mm – 28mm (0.39" – 1.1")
<b>Exit pupil diameter</b>	10mm – 4mm (0.39" – 0.16")
<b>Field of view at 100m (109 yds)</b>	40.8m – 6.0m (44.6yds – 6.6yds)
<b>Eye relief</b>	90mm (3.5")
<b>Transmission</b>	>90% night / >92% day
<b>Parallax compensation</b>	100m (109yds) fixed
<b>Elevation / windage adjustment at 100m (109 yds)</b>	180cm (1.97yds) / 180cm (1.97yds)
<b>Elevation adjustment with QDC at 100m</b>	---
<b>Adjustment per click</b>	1 cm / 100m (0.39" / 109yds)
<b>Diopter adjustment</b>	+2.5 / -3 diopter
<b>Weight</b>	645g (22,75 oz)
<b>Overall length</b>	319mm (12.5")

# The Solution for Wild Boar Hunting at Night

# Precise Connection

For hunting wild boar at night we offer an optimally coordinated combination of a premium dayscope precisely connected with a thermal clip-on device.

Liemke Merlin-35

Blaser BL43

Blaser 1-7x28iC

With its ideal magnification range for hunting wild boar and the mounting rail extended to the front of the riflescope, the Blaser 1-7x28iC is the perfect platform for the use of thermal clip-on devices\*.

A reliable connection to the riflescope is of crucial importance for a consistent and repeatable point of impact when hunting with a thermal clip-on device. Our new Blaser thermal clip-on mounts are extremely easy to operate.

Thanks to the automatic positioning of the clip-on mount, using the integrated rail of the Blaser 1-7x28iC, the installation is always repeatable, even in complete darkness.

Thanks to a recoil lug, which needs to be installed onetime into the inner rail of the Blaser riflescope 1-7x28iC, the constant positioning of the thermal clip-on device is guaranteed. When the clamping lever is closed, the thermal clip-on mount is additionally locked on the scope tube.

This ensures the highest level of repeatable accuracy even when the thermal clip-on device is frequently attached or detached.

The Blaser riflescope 1-7x28iC is suitable for every use. Whether stalking, driven hunts or hunting wild boar at night, the Blaser 1-7x28iC becomes a new universal genius in combination with the Blaser thermal clip-on mount and the appropriate thermal clip-on device\*.

Blaser riflescope 1-7x28iC, Blaser thermal clip-on mount BL43 und Liemke thermal clip-on device Merlin-35

Liemke thermal clip-on device Merlin-13 with Blaser thermal clip-on mount BL30

Liemke thermal clip-on device Merlin-42 with Blaser thermal clip-on mount BL52

\*The new Blaser thermal clip-on mount BL30 (M30x1 thread), BL43 (M43x0.75 thread) and BL52 (M52x0.75 thread) are specified for Liemke thermal clip-on devices Merlin-13, Merlin-35 and Merlin-42. The use of thermal clip-on devices from other manufacturers with the M30x1, M43x0.75 or M52x0.75 thread is usually possible.

*Blaser*

# Blaser Red Dot Sight: With Open Eyes

# Blaser RD20

## Better Sight Picture – Better Hits

The Blaser RD20 is a red dot sight specially developed for Blaser rifles to provide a better sight picture for quick shots. It is characterized by a unique combination of large inside diameter and minimal target blockage by the housing. The original Blaser saddle mount is seamlessly integrated into the aluminum housing which results in a sleek and compact appearance with a lower overall weight. These characteristics can only be achieved when the red dot sight is perfectly matched to the rifle.

The RD20 is the ideal optic for quick shots on driven hunts and as an interchangeable accessory for all Blaser rifles, making it the ideal addition to a riflescope.

### IIC – Intelligent Illumination Control

When carrying the rifle muzzle up or down, or with the rifle in a resting position on the hunting stand, the red dot switches off automatically. It is activated again immediately when raising the rifle. Six hours after the last button operation, the RD20 switches off, making manual switch-off of the sight at the end of the day optional. This energy saving concept provides a battery life of up to 50.000 hours.

<b>Inside diameter</b>	36 mm
<b>Diameter of red dot</b>	2 MOA bzw. 58mm/100m
<b>Magnification</b>	1x (no magnification)
<b>Parallax free distance</b>	50m
<b>Adjustment range elevation/windage</b>	300 cm / 100 m
<b>Adjustment per click</b>	2 cm/100m bzw. 1 cm/50 m
<b>Length x Width x Height</b>	98 x 44 x 66 mm
<b>Weight</b>	195 g
<b>Waterproof</b>	0,4 bar / 4 m water depth
<b>Battery life</b>	bis zu 50.000 Stunden
<b>Illumination settings</b>	30 levels, continuously dimmable
<b>Operating temperature</b>	-25°C bis +50°C
<b>Shut-off functions</b>	IIC-Funktion

› Better sight picture: 36mm diameter with only 3.5mm coverage by the housing wall

› In all kinds of weather: Scratch-resistant protective lenses that sit almost flush with the housing - easy to clean from water drops, snow and debris.

› Always ready: With the IIC function, the RD20 features an energy saving concept with intelligent switch-off functions and thus enables a service life of up to 50,000 hours.

See more:  
[www.blaser.de/RD20](http://www.blaser.de/RD20)

# Our Binoculars: For Instant Overview

## Quick to Focus – Even When Moments Matter

### **An Immediate Vibrant Image for Maximum Viewing Comfort**

Being able to raise the binoculars to your eyes and have the perfect view – this is the formidable challenge to be met when designing hunting optics.

A completely new optical calculation combined with using the largest lenses for the eyepiece allows for significantly faster image acquisition. This delivers a particularly comfortable visual experience in any situation – even if the binoculars are not in the optimum position in relation to your eyes.

## Of Exceptional Quality

### Performance with Intelligent Protection

Superior light transmission, neutral color reproduction and brilliant, high-contrast images are a must for long-range optics used for hunting. Our CCC multiple layer coating (Contrast and Color Corrective Coating) ensures first-class image performance in any light conditions.

Just as important as optical quality is the protection of the outer lenses. The SLP coating (Smart Lens Protection) is based on nanotechnology and ensures water and dust protection. It also allows for rain to run off and makes cleaning the lenses significantly easier.

## It Does Not Get Any Easier: Remove and Clean

Dust or fine sand can damage both the lens surface as well as the precision mechanics of the adjustable eye cups. With our binoculars, the eye cups can be removed particularly easy and fast thanks to a newly developed technical solution. This also allows for a gentle cleaning at any time.

# Blaser 8x56

## King of the Night

First-class performance when hunting game in deep twilight and at night.

<b>Magnification</b>	8x
<b>Objective lens diameter</b>	56 mm (2.2")
<b>Exit pupil diameter</b>	7 mm (0.3")
<b>Eye relief</b>	21 mm (0.8")
<b>Field of view (degrees)</b>	7,6°
<b>Field of view (at 1,000 m)</b>	133 m (145.5 yds)
<b>Shortest focusing distance</b>	2.5 m (2.7 yds)
<b>Dimensions</b>	196 x 153 x 66 mm (7.7" x 6" x 2.6")
<b>Weight</b>	1,150 g (2 lb. 8.5 oz.)
<b>Diopter adjustment</b>	+/- 4 diopter

# Blaser 10x42

## Distance Specialist

Ideal for hunting in the mountains or on open ground – enables you to identify detail even at great distances.

<b>Magnification</b>	10x
<b>Objective lens diameter</b>	42mm (1.7")
<b>Exit pupil diameter</b>	4.2mm (0.2")
<b>Eye relief</b>	18.3mm (0.7")
<b>Field of view (degrees)</b>	6.6°
<b>Field of view (at 1,000m)</b>	116m (127yds)
<b>Shortest focusing distance</b>	2m (2.2yds)
<b>Dimensions</b>	184x144x58mm (7.3"x5.7"x2.3")
<b>Weight</b>	970g (2lb. 2.2oz.)
<b>Diopter adjustment</b>	+/- 6 diopter

# Blaser 8x42 Universal Genius

Compact universal binoculars for any hunting situation.

<b>Magnification</b>	8x
<b>Objective lens diameter</b>	42 mm (1.7")
<b>Exit pupil diameter</b>	5.25 mm (0.2")
<b>Eye relief</b>	18.2 mm (0.7")
<b>Field of view (degrees)</b>	8°
<b>Field of view (at 1,000 m)</b>	141 m (154 yds)
<b>Shortest focusing distance</b>	2 m (2.2 yds)
<b>Dimensions</b>	184x144x58 mm (7.2"x5.7"x2.3")
<b>Weight</b>	960 g (2 lb. 1.9 oz.)
<b>Diopter adjustment</b>	+/- 4 Dioptrien

# R8

## Unequaled in Every Way

Just as diverse as hunting, so are the demands hunters place on their rifles.

To say the R8 is just a bolt action rifle is the understatement of the century. More than just a rifle it is a platform that allows you the flexibility to interchange calibers while providing ergonomic perfection in stock design and unequaled trigger performance.

# ACCURATE

## **Blaser Precision Trigger**

The desmodromic trigger mechanism guarantees your trigger will function even when iced or heavily soiled. The mechanical advantage of a simple lever will ensure success even in the harshest conditions. When things are going your way a trigger without creep, will turn that thought impulse into action.

## **Blaser Saddle Mount**

Barrel and Saddle Mount form one accurate unit: Notches machined into the top of the barrel, directly above the chamber, insure while your barrel freely floats your point of impact remains constant.

## **Optimum Barrel Bedding**

The large-scale bedding of the barrel exclusively in the solid receiver guarantees repeatable accuracy when exchanging the barrel. Stock deformation due to extreme weather can never affect the position of the barrel.

## **Blaser Radial Locking System**

Stability and reliable accuracy: The extremely strong, concentric locking system locks directly in the barrel without any rotary motion. 14 locking surfaces provide 360 degree engagement.

## **Forged Barrel and Chamber**

Precision and durability: The barrel and chamber are cold hammer forged at the same time for most calibers. Barrel and chamber are perfectly concentric.

## **Perfect Stock Design**

The relaxed shooting position of the hand reduces the risk of flinching. Blaser stocks, with their distinct palm swell and optimal cast, provide the ideal grip. The thumbhole stocks of the R8 Success and R8 Ultimate models go even further: thanks to a completely relaxed wrist and arm posture, shooting accuracy is significantly enhanced in any firing position.

## SAFE

### **Manual Cocking System**

For decades, Blaser's manual cocking system has set the benchmark. It is acknowledged as one of the safest in the world. There is no mechanical safety system that guarantees the safety of an uncocked firing spring. The R8 is cocked the very moment before shooting. Should the shot not be taken, by simply pressing down on the cocking lever, it will slide back smoothly, decocking the rifle.

### **Protection Against Misuse**

If the R8 magazine with integrated trigger guard is taken out, the cocking lever cannot be set in the cocked position. This is without doubt the safest protection against unauthorized use!

### **No Unintentional Bolt Opening**

If the R8 is decocked with a locked bolt, the bolt handle is blocked. To safely open the bolt, the cocking lever needs to be moved slightly forward (approx. 3mm/1/8"), but not cocked, while simultaneously pulling back on the bolt handle.

# HUNTABLE

## **Short Cut**

The unique design of the R8 magazine above the trigger allows the overall length of the R8 to be significantly shorter than any conventional bolt action rifle.

## **Perfect Balance**

The well-balanced weight distribution offers fast handling and quick target acquisition.

## **Easy Take-Down**

More comfort when stalking over long distances: the R8 can be stripped down, packed away and reassembled in a matter of seconds without the slightest change in the point of impact.

## RELIABLE

### **Quick Take Down – Easily Cleaned**

Even when in the bush, the R8 can be taken down and reassembled within a few seconds. Snow, dirt, leaves or needles are easily removed.

### **Desmodromic Trigger Mechanism**

Maximum reliability – even when iced or heavily soiled. The trigger system of the R8 is force-controlled. Cycling the bolt automatically resets the trigger.

### **Locked Magazine**

The R8 magazine is only released when simultaneously pressing both release buttons. Accidental drop out of the magazine by unintentionally pushing the release buttons is thus virtually impossible. In addition, both release buttons can be locked by a lever inside the magazine.

### **Excellently Protected**

The closed construction of the R8 receiver prevents damage caused by foreign objects. When the magazine is stored outside the rifle, a protective cover keeps the dirt out. All metal parts are either made of rustproof material or protected against corrosion with a specific finish. The inside of the barrel and chamber are polished and need conventional care.

# VERSATILE

## **Around the World with One Rifle**

Trigger, stock length, and handling – everything remains just the way you are used to: Thanks to interchangeable barrels, the R8 is the ideal companion on all continents no matter what game you are hunting.

## **Quick Scope Change**

Every barrel is prepared for the Original Blaser Saddle Mount, so each scope or illuminated dot sight that is zeroed to the barrel can be interchanged.

## **Changing Stocks**

If you are expecting bad weather or rugged terrain, the precious wooden stock can be removed and replaced with the R8 Professional synthetic stocks.

## **For Left-Hand Shooters**

Most R8 models are available as a true left-hand version including stock, bolt assembly and ejection.

## **Compact Solution for Ladies and Gents:**

### **R8 Intuition**

Features a purpose-built stock which takes into account the anatomy of women.

### **R8 Compact**

The perfect choice whenever build and height of the hunter require a shorter stock.

## FAST

### **In-line Repeating**

Fast as lightning with a relaxed posture: The bolt handle is located in an ergonomically perfect position, just above the trigger guard. Rifle and eye remain focused on the target giving more time to aim exactly and ensure a perfect shot.

### **“Blind” Magazine Exchange**

Easy and fast: The magazine buttons can be operated “blindly” due to their perfect positioning above the trigger. When pushing on both buttons at the same time, the magazine releases straight into the shooter’s hand. A second, loaded magazine can be inserted extremely quickly without looking.

### **Double Loading Option**

The R8 can be loaded and unloaded in two ways: with the magazine taken out or left inside the rifle. With an open bolt, cartridges can be inserted or removed from the top of the magazine very quickly and easily.

# R8

## Indestructible: Our Synthetic Stocks

[www.blaser.de/en/media](http://www.blaser.de/en/media)

# R8 Ultimate

The R8 Ultimate sets a new standard in terms of functionality and design. The two-piece ergonomically designed thumbhole stock ensures a completely relaxed shooting position, as well as optimal control of the rifle when firing.

With the newly developed, modular stock options, the R8 Ultimate and the R8 Ultimate Silence are exactly tailored to your individual needs.

All of these options support our goal: to provide what is needed to shoot better in every situation.

*The R8 Ultimate with optional muzzle thread, scope Blaser 2.8–20x50 iC and mount*

## R8 Ultimate

- › Ergonomically optimized synthetic stock
- › Black-brown synthetic stock with black elastomer inlays
- › Available options include: adjustable comb, adjustable recoil pad, recoil absorption system

*The R8 Ultimate with optional muzzle thread, recoil absorption system, scope Blaser 2.8–20x50 iC and mount*

## R8 Ultimate Leather

- The same as the R8 Ultimate, but includes:
- › Stainless steel brace in the stock
  - › Impregnated leather inlays on fore-end, pistolgrip and comb

See more:  
[www.blaser.de/R8Ultimate](http://www.blaser.de/R8Ultimate)

For further technical information, see page 120 onwards.

*The R8 Ultimate Silence with optional scope Blaser 2.8–20x50 iC and mount*

**R8 Ultimate Silence**

The same as the R8 Ultimate,  
but includes:

- › Integrated silencer

*The R8 Ultimate Silence Leather with optional recoil absorption system, scope Blaser 2.8–20x50 iC and mount*

**R8 Ultimate Silence Leather**

The same as the R8 Ultimate Leather,  
but includes:

- › Integrated silencer

*For further technical information, see page 120 onwards.*

#### Adjustable comb

The intuitively operated, multi-level adjustable comb ensures the perfect mount in every situation.

Once the adjustable comb is fitted to your individual body proportions and your optics, the integrated memory function ensures return to the correct comb position for every shot.

#### Recoil absorption system

The inserted recoil pad with recoil absorption system makes for a pleasant shooting experience – even with larger calibers.

The internal absorption elements are available in different hardness which can be adjusted to your preferences and produce a noticeably reduced muzzle climb while shooting.

The recoil absorption system, especially in combination with the R8 Ultimate Silence or another silencer option, offers unmatched comfort while shooting.

#### Adjustable recoil pad

The adjustable length, height and pitch of the recoil pad offers a variety of practical advantages. It can be adjusted quickly and easily for different shooters or, depending on weather, different clothing situations.

#### The Silence models are available in following calibers

- › Cal. .308 Win.; 8x57 IS; 9.3x62; barrel lengths 42cm or 47cm (16.5" or 18.5")
- › Cal. 8.5x55 Blaser; 30-06; barrel length 47cm (18.5")
- › Cal. .300 Win. Mag.; .300 Blaser Mag.; barrel length 52cm (20.5")

# R8 Professional

The R8 Professional is designed for hard use: elastomer inlays support secure grip and aiming even in wet conditions. The specially developed recoil pad combines outstanding recoil reduction with excellent sliding characteristics.

*The R8 Professional, stock color dark-brown*

## R8 Professional

- › Synthetic stock with black elastomer grip inlays, available in dark green, savannah, black-brown or optional camo
- › Optional adjustable comb
- › Optional with left-hand stock and bolt assembly

## R8 Professional S

- › The same as the R8 Professional, but with fixed magazine unit.

*The R8 Professional Tracking, stock color dark green*

## R8 Professional Tracking

The same as the R8 Professional, but includes:

- › Short tracking barrel (50cm/19.7") and HIVIZ® quick acquisition sights
- › Retainers for sling swivels on the muzzle as well as on both sides of the stock

*Stock color savanne*

*Stock color black-brown*

*Stock color camo*

For further technical information, see page 120 onwards.

# R8 Professional Success

Sporting shooters have been using special rifle stocks for decades.

They know that you shoot much more accurately with them! So why should not hunters use the best stock available, too? As hunters are not aiming at inanimate targets, but are striving to cleanly kill live game, the perfect stock is essential. Once a hunter has tried a thumbhole stock, they rarely want to use anything else.

*The R8 Professional Success, stock color dark green with optional scope Blaser 2.8–20x50 iC and mount*

## R8 Professional Success

- › Ergonomically perfect synthetic stock
- › Dark green or black-brown stocks available with black elastomer grip inlays
- › Optional with left-hand stock and bolt assembly

*Stock color black-brown*

*Stock color dark green*

# R8 Professional Success Leather

The R8 Professional Success Leather combines a robust synthetic stock with non-slip stock inlays made of specially impregnated leather. Different stock and leather colors provide an individual look.

*The R8 Professional Success Leather, stock color black-brown with leather inlays in cocoa and optional scope Blaser 2.8–20x50 iC with mount*

*The R8 Professional Success Leather, stock color black-brown with leather inlays in havanna and optional scope Blaser 2.8–20x50 iC with mount*

## R8 Professional Success Leather

- › Ergonomically perfect synthetic stock
- › Stainless steel brace in the stock
- › Black-brown, dark green, black or savannah stocks available
- › Impregnated leather inlays on fore-end, pistolgrip and comb
- › Select between leather inlays in cocoa, black, havanna, stonegrey, Monza (with red contrast stitching) and mystic-red
- › Optional with left-hand stock and bolt assembly available only with leather combination cocoa and stock color black-brown or dark green

## Easy Custom – A Splash of Color for the Field

Feeling bold? For those that want to leave their mark and an impression, Blaser introduces the new colorful Easy Custom Program.

The Easy Custom Program allows you to choose your favorite stock color (black-brown, dark green, black or savanna) along with exciting new colorful additions to the leather portfolio.

Create the perfect combination that reflects you by including one of our interesting seam options. Be bold. Be yourself.

### Leather Colors:

- > savanna beige / landscape
- > silk
- > modena
- > chalk
- > sport red
- > arancia mira
- > jazz blue
- > dark green
- > verde-ulysses
- > yellowstone

### Contrasting Seams:

- > black
- > red
- > yellow
- > blue
- > orange (neon)

# R8 Monza

Optimized performance comes first – even away from the race track. The R8 Monza not only provides accurate shooting, but also captivates the imagination with its unusual design.

*The R8 Monza with optional scope Blaser 2.8–20x50 iC and mount*

## R8 Monza

- › Ergonomically perfect synthetic stock
- › Black stock
- › Impregnated leather inlays and recoil pad in black with red contrast stitching
- › Black anodized aluminum stock inlay with red lettering
- › Trigger, bolt handle ball and bolt head DLC coated

*Matching Monza rifle sling*

## R8 Carbon Success

The best possible accuracy and suitability for practical hunting is the most important goal in the development of every Blaser rifle. Thus it is no contradiction to utilize materials which, due to their special properties, have long been indispensable in other branches of industry. Carbon fiber, best known from the racing sports, offers an astoundingly high strength at an extremely low weight.

It only stands to reason that this material should be used for what is currently the best thumbhole stock on the market. The joining of carbon fiber with robust and luxurious leather inserts in the pistol grip, fore-end and butt stock results in a never-before-seen combination, one that reflects the best of both worlds in a unique as well as highly accurate hunting rifle.

*The R8 Carbon Success with optional scope  
Blaser 2.8–20x50 iC and mount*

### R8 Carbon Success

- › Ergonomically perfect carbon stock
- › Impregnated leather inlays in cocoa on fore-end, pistol grip and comb
- › Pistol grip cap in carbon
- › Stainless steel brace fitted in stock
- › Rubber recoil pad
- › Optional with left-hand stock and bolt assembly

Sound of Silence: Our Integrated Silencer Solution

## R8 Silence Models

Their construction is designed to protect the hearing of both hunter and dog. At any time, with every shot. Thanks to the even mass distribution over the entire barrel, the R8 Silence models provide the first-class balance and huntability you are used to as with every other R8 model. The outer contour of barrel and silencer jacket boasts a smooth bull barrel design, giving the R8 Silence models their low weight and an extremely attractive overall appearance.

### R8 Ultimate Silence

*The R8 Ultimate Silence with optional scope Blaser 2.8–20x50 iC and mount*

## R8 Rimfire

The .22LR option for the R8 in combination with a newly designed magazine insert and bolt head allows you to intensively train with the rifle you are already used to – and also on shooting ranges that are only open to small bore rifles. An additional advantage: the very low costs for ammunition.

The small bore .22LR kit includes the interchangeable barrel, the magazine insert (capacity 6 cartridges) and the small bore bolt head

## R8 Options

### Blaser Carbon Bipod for R8 Professional and R8 Professional Success

Maximum stability for the perfect shot at a great distance. Ultra-light thanks to the combination of high-strength carbon fiber and aircraft grade aluminum.

### Dual Brake Muzzle Brake\*

The screw-on muzzle brake reduces recoil and muzzle flash as well as preventing muzzle lift. The recoil felt is reduced by 35% to 50%. The muzzle thread for the Dual Brake can be retrofitted.

\*Please note: Muzzle brakes increase the report produced by the shot considerably. The use of hearing protection and safety glasses is vital! Dual Brake and Mag-Na-Port are only possible with single-barrel rifles.

### Muzzle Thread

For the installation of silencers or muzzle brakes. Thread dimensions: M15x1, M17x1 or M18x1 (Jagdmatch barrel contour). Cover included in the scope of delivery.

### R8 Semi Weight Safari Barrel Contour (not shown)

- › Muzzle diameter: 19mm (0.7")
- › Approx. 300g (0.66lb.) heavier than the Standard barrel (depending on barrel length and caliber)
- › Fluted barrel option available

### Kickstop Recoil Reducer

For rifles and combination guns. The stainless steel cylinder is filled with granulated tungsten. It is inserted in the firearm's stock and provides absorption of approximately 20% of felt recoil. The stock weight is increased, optimizing the balance of firearms with heavy barrels.

## R8 Options

### R8 Express Open Sights

For lightning-fast shooting over short distances. The triangular green notch and the interchangeable bead mean that the target can be instantly and precisely acquired, even when it is moving. There is minimal obstruction of the target.

### Atzl Match-Hunt-Trigger

Two trigger pulls, one rifle: With the new Atzl Match-Hunt-Trigger you are all set for both the shooting range and your next hunt. You can choose between the match trigger pull of 250g (0.88lb) and the hunting trigger pull of 650g (1lb 6.9oz) at any time.

### R8 with Fixed Magazine

The majority of R8 models can be supplied without a detachable magazine on request (excluding R8 Baronesse, R8 Custom with steel receiver and R8 Professional Success models).

### R8 Left-Hand Version

Receiver, bolt heads and stocks are optionally available as left-hand versions with a surcharge.

### Optional extras for all R8 Models

- › Wooden ball on the bolt handle
- › Gold-colored bolt head
- › Gold-colored trigger

# BLASER SADDLE MOUNT

Properly Connected.  
Guaranteed.

Blaser's original Saddle Mount has revolutionized the connection between the rifle and the scope. Its consistent accuracy, reliability and precision are legendary and unmatched. Only the original Blaser Saddle Mount secures you a 10-year guarantee for the shooting performance of our rifles.

*Blaser*

Mod K95

# Simple, Flexible and 100% Return to Zero

Every Blaser rifle or combination gun can be fitted with an original Blaser Saddle Mount.

After being zeroed in once, the riflescope can be removed and replaced in just three steps, with no need for tools, as often as desired, with 100% return to zero.

This allows you the flexibility to use different scopes on the same barrel.

Four inconspicuous notches on the chamber end of the barrel secure the one-piece mount without tension. The barrel itself is totally free floating. No further work is required on the firearm, and there is no need for large mount bases that can interfere with your sight picture or the look of the rifle.

**1** The Blaser Saddle Mount is placed in the notches on the barrel with the locking levers open.

**2** No tools are needed to rotate the locking levers into position. This releases the tension on the mount lock on the barrel. To prevent the locking levers interfering with the use of the rifle, they are folded inwards.

**3** The riflescope is properly positioned and ready for zeroing. The Blaser Saddle Mount can be removed and replaced as often as you wish, with no need to re-zero.

# Upon Your Request

Hunting has been mankind's passion since the beginning of time. In the Blaser Custom Shop, we bring together this passion and our craftsmanship to create the firearm of your dreams. There are almost unlimited possibilities to express your personality.

Get inspired!

***Blaser***

*Custom*

## Because We Love What We Do

Ever since, the embellishment of rifles and guns has been a special vocation, our masters have a trained eye for harmonious shapes, precise fitting and the perfect surface finish. Their sensitive hand turns your ideas into reality. Our devotion to perfection is evident in every custom crafted firearm. No firearm ever leaves the Blaser Custom Shop until it is completely flawless, a true work of art.

Details can include fine engravings, gold inlays and a satin or gloss finish framed by stunning wooden stocks. But don't let your imagination stop there. Explore the idea of using carbon fiber, Ruthenium, cowhide or sting ray leather and fossilized mammoth ivory which are all exciting options. Possibilities are almost unlimited in giving your hunting firearm its very own, personal style.

You are the driving force and decision maker. Our role is simply to embrace your vision, guide you and contribute ideas based upon our expertise.

## Made with Heart

Finesse and patience are required, when metal is crafted by hand. In the Blaser Custom Shop we have both.

With a trained eye and a delicate touch, firearms are artfully crafted to perfection. Individual ideas take shape, harmoniously and well-balanced under the care of our master craftsmen.

## Charismatic Artworks – According to Your Ideas

Creativity and imaginative power are essential virtues when it comes to using extraordinary materials or developing new designs. For us, the integration of digital processes and the cautious use of laser technology always come into play when individual artworks are created.

Your individual motif is therefore first digitized by hand. This crucial first step must be developed using the artistic skills of our master engravers. It's where the interpretation of your vision starts to be realized.

### **Technology meets Tradition**

When realizing technical or natural surface structures for the artistic design of certain firearm elements, we use state-of-the-art laser technology. Customer-specific samples can be digitized and their structure can be applied to the different firearm elements: from receiver and barrel to bolt housing and ball. We are always looking for new technological procedures to turn your ideas into reality.

## Admired & Desired

### **R8 Ruthenium – Pure Understatement**

The platinum metal ruthenium is one of the rarest precious metals in the world; and is the namesake for this top-notch custom rifle. The elaborate ruthenium finish of the box and the receiver as well as the DLC (Diamond like Carbon) finishing of the trigger, the bolt and bolt handle ball are not just a visual highlight, but also guarantee protection even under extreme external conditions.

### **R8 Ruthenium**

- › Receiver, trigger guard, magazine base and bolt housing with Ruthenium finish
- › Trigger, bolt handle ball and bolt head with high-gloss finish and DLC (Diamond-Like-Carbon) coating
- › Stock with Bavarian cheek piece and double rabbit
- › Coated openwork pistol grip cap made of steel with ebony inlay
- › Fluted barrel
- › Grade 8 wood with Super-Finish
- › Silver plated R8 lettering
- › Includes rifle case B and leather rifle sling
- › Optional with left-hand stock and bolt assembly

### **R8 Selous – Reminiscence of Africa**

This rifle is named after the magnificent Selous Game Reserve in Tanzania and is only available in big game calibers and with a receiver made of steel.

Beyond that, the special look of this rifle is unique: by heating and cooling in phases of different length, the steel develops a very individual color, which gives each rifle its distinct appearance.

#### **R8 Selous**

- › Blued steel receiver
- › Selous lettering inlaid with gold
- › Gold-colored trigger
- › Bolt handle ball inlaid with gold
- › Safari open sights: express sight, classic ring mount, silver bead
- › Sling swivel with ring around the barrel
- › Safari stock with larger radius at comb and Monte Carlo cheek piece
- › 2.7cm (1.1") safari rubber recoil pad
- › Kickstop
- › Safari fore-end with ebony fore-end tip
- › Grade 7 wood

Compatible with all R8 barrels

*Fig. shows firearm with optional extras*

# R8 Baronesse

## K95 Baronesse

**Technical perfection and the art of engraving complement each other harmoniously.**

Two types of hunting rifles, two different designs. With both based on one essential idea: an elegant appearance combined with a traditional look. These stylish rifles are a dream come true for hunters who are passionate about style, design, reliability and precision

### R8 Baronesse

- › Fully engraved receiver, option of red deer or wild boar motifs on the left-hand side and roe deer or chamois on the right
- › Gold-colored trigger and bolt head
- › Wooden ball on the bolt handle
- › Fluted barrel
- › Stock with Bavarian cheek piece and double rabbet
- › Rubber recoil pad
- › Ebony fore-end tip
- › Grade 8 wood
- › Including rifle case B and leather rifle sling
- › Optional with left-hand stock and bolt assembly

### K95 Baronesse

- › Receiver with long side plates
- › Available with optional animal or fine ornament engraving
- › Gold colored trigger and breech block
- › Octagonal barrel
- › Rubber recoil pad
- › Grade 8 wood
- › Ebony fore-end tip
- › Stock with Bavarian cheek piece and double rabbet shadow line
- › Supplied with type A rifle case and leather rifle sling
- › Optional left-hand stock

Also available as K95 Stutzen Baronesse

## Leather in Its Purest Form

Turning your dream rifle into reality. The choice of possible raw materials is continually becoming wider, because only technical feasibility sets the limits in the Blaser Custom Shop. As a valuable raw material of nature, we more and more often use leather when it comes to the embellishment of hunting rifles.

### Pleasant Feel

The desire for individualization and a new material mix were at the beginning of the idea to use leather. Its properties also converge in other areas of our daily life: from the luxury comfort of fine leather shoes to the soft feel of a steering wheel grip, we enjoy leather.

In order to meet the demanding requirements of hunting, the leather is protected against weather influences with a specially developed impregnation. This gives the leather a similar durability which we expect and recognize in our boots and hunting attire.

### **Unique Patina**

Long term use gives the leather inlays their unique patina. These fine leather appointments are not only limited to use on synthetic stocks. Elegant wood or even carbon fiber stocks can also be stylishly embellished with these fine leathers which gives our rifles a completely new design.

### **One of a Kind**

Soft suede, snake skin, crocodile or undulated sting ray leather are frequently used because of their natural coloration. However, they can easily be recolored to answer to your personal taste. All materials are ethically sourced and accompanied by proper CITES documents for importing and exporting.

### **Personal Dream Rifles**

Thanks to the new raw material, leather, hunting rifles can be created with a dedicated, special theme. Why not combine luxurious crocodile leather on the recoil pad along with a laser textured barrel and receiver design reminiscent of a crocodile's distinctive skin as well?

### **Perfect Fit**

The use of leather is no longer limited to inlays. Now, the entire hunting rifle can be refined with leather. The biggest challenge for the textile expert is to draw an exact three-dimensional draft, that will later fit the hunting rifle perfectly. This draft is then transferred on to the leather and cut out to be an exact match. While one part of the leather coating can be sewn with the machine, the last stitches are always done by hand. Years of experience and the love for the material used are essential in order to transform the stocks into unparalleled works of art.

## Wood: As Precious as any Jewel

The walnut trees Blaser stocks are made from are up to 300 years old. They come from Eastern Anatolia, Aserbaijan and Georgia. There, in the high altitude of the Caucasus region they have grown under extreme climatic conditions over hundreds of years. The result of this extremely slow growth are best wood density and unique grain.

### A Piece of Individuality

Harvesting these ancient trees is a science in itself. The burls that grow with the root are the raw material for the most exquisite stocks. The work however is not done by just harvesting the trees. Expertly digging out the roots is the real challenge. In the on site sawmill, roots and trunk are sawn into so-called "blanks". This work step requires an incredible amount of experience and only then the yield of every single piece of wood becomes obvious.

It is not rare to find stones that have grown into the tree when harvesting and this creates a unique challenge to identify suitable pieces of wood. The subsequent treatment with steam reduces the amount of tannic acid contained in the wood and reliably kills fungi as well as insects at the same time. Afterwards the blanks are dried in a natural climate in special well ventilated storage sheds. A process that can take many months.

### **The Finishing Touch**

After being planed and grinded, all blanks at Blaser are dried again in a special drying storage chamber. Here the blanks are stored for up to five months or until a residual moisture level of 8-9% maximum is finally reached. Only then the final quality control as well as the classification in the Blaser wood grades is done. Before further processing the blanks, they are cut into their future, model-specific rough shape. Their almost final shape is generated by state-of-the-art CNC machines.

Their finishing touch and their complex oil finishing however are done by hand once again. If you would like to select the stock of your dreams by yourself, please do not hesitate to make an appointment at the Blaser Custom Shop!

### **The Blaser Wood Grades**

As the first hunting rifle manufacturer ever to do so, Blaser divides the quality of stock wood into grades. Within the grades 3 to 11 all quality features are considered that determine the value of the stock. From plain heartwood in the middle of the trunk down to the very rare, precious pieces of root wood. The color of the stock wood plays its own, very individual part when it comes to a personal judgement; from honey yellow over brown shades having a tint towards red, up to very dark walnut brown.

Everyone has their own preferences. When it comes to wood as a natural product, it is a good thing to be able to choose an absolutely unique and individual piece from our Blaser Custom Shop.

## Fitted by Hand – with Highest Perfection

From the first meeting in the Custom Shop, to the definition of your firearm's design and features, to the manufacturing of the final components the anticipation builds.

An elaborate engraving takes about half a year of highly focused work until it is completed. If an exclusive leather or a certain metal shall be used, procurement and processing also take time.

When all components of a firearm are finished, they are fitted by hand with great attention to detail. Finally, all of the firearm's components are again subjected to a strict quality control inspection.

Only when the highest requirements are fulfilled, will the firearm be completed and handed over to the customer.

## Express Yourself

Thanks to latest laser technology a wide range of technical and natural surface structures can be realized according to your ideas.

The RAFFIR® technology combines natural burl wood with state-of-the-art resins. Extraordinary and individual effects are created through objects that are encased in the stock. Even luminescent structures are possible.

Combining synthetic and natural materials opens up new dimensions in stock design. Grip inlays made of stingray-, ostrich- or crocodile leather are just as possible as wooden grip inlays.

Add your personal touch and make your hunting firearm an extension of your passions.

## Unique Moments – Preserved for Eternity

This masterpiece created by the Italian engraver Stefano Pedretti takes this K95 to a higher sphere.

Through finest Bulino technique he created a scene of the deer rut where two enormous stags fight for the leading position within the herd.

An engraving of this quality requires months of highly focused work and thus has become a very personal masterpiece.

## In the Face of the Leopard

The leopard's fur structure is presented expressively on this R8's bolt, barrel, receiver, trigger guard and bolt handle.

The natural surface structure of the feline predator's fur is reproduced absolutely authentically thanks to state-of-the-art laser technology.

For a harmonious overall concept the R8 Leopard's stock is made of selected Thuja wood.

A close-up photograph of a Blaser K95 single-shot rifle with a scope, resting on a weathered wooden log. The rifle is positioned diagonally across the frame, with the barrel pointing towards the upper left. The background is a soft-focus forest scene with green foliage and a small plant in the foreground. The lighting is natural, highlighting the textures of the wood and the rifle's components.

# K95

## Your Target: One Shot

Elegant, huntable, accurate – Blaser's K95 single-shot rifle has proven itself in demanding hunting situations for decades. Then, as now, it embodies hunting in its most elemental form. Its harmonious design and compact shape make it a particular pleasure to use wherever you are hunting.

# K95 Ultimate Carbon

The K95 Ultimate combines tradition and technology in a unique way. The twopiece ergonomically designed thumbhole stock ensures a completely relaxed hand position, as well as optimal control for accurate shooting.

The Carbon fiber offers an astoundingly high strength at an extremely low weight – this makes the K95 Ultimate the best choice when stalking long distances through impassable terrain. With the newly developed, modular stock options it can be adjusted to your individual demands.

The K95 Ultimate Carbon with optional Blaser scope 2.8–20x50 iC, mount and recoil absorption system

## K95 Ultimate Carbon

- › Ergonomically optimized carbon thumbhole stock
- › Impregnated leather inlays in cocoa
- › Available options include: adjustable comb, adjustable recoil pad, recoil absorption system

**ic** illumination  
CONTROL

### Adjustable comb

The intuitively operated, multi-level adjustable comb ensures the perfect mount in every situation.

Once the adjustable comb is fitted to your individual body proportions and your optics, the integrated memory function ensures return to the correct comb position for every shot.

### Recoil absorption system

The inserted recoil pad with recoil absorption system makes for a pleasant shooting experience – even with larger calibers.

The internal absorption elements are available in different hardness which can be adjusted to your preferences and produce a noticeably reduced muzzle climb while shooting.

### Adjustable recoil pad

The adjustable length, height and pitch of the recoil pad offers a variety of practical advantages. It can be adjusted quickly and easily for different shooters or, depending on weather, different clothing situations.

For further technical information, see page 172 onwards.

# K95 Ultimate

Robust design and legendary shooting accuracy. Thanks to its ergonomically optimized synthetic thumbhole stock, the K95 Ultimate combines tradition and functionality in a unique way.

*The K95 Ultimate with optional Blaser scope 2.8–20x50 iC and mount*

## K95 Ultimate

- › Ergonomically optimized synthetic thumbhole stock
- › Black-brown synthetic stock with black elastomer inlays
- › Available options include: adjustable comb, adjustable recoil pad, recoil absorption system K95 Ultimate

# K95 Ultimate Leather

*The K95 Ultimate Leather with optional Blaser scope 2.8–20x50 iC, mount and recoil absorption system*

## K95 Ultimate Leather

- As the K95 Ultimate, but includes:
- › Impregnated leather inlays on fore-end, pistol grip and comb

*For further technical information, see page 172 onwards.*

# K95

With a newly designed stock and receiver the tradition of the single-shot rifle will continue into the future. The higher, straighter comb makes for a pleasant shooting experience and underlines the timeless appearance of the K95.

*The K95 with optional Blaser scope 2.8–20x50 iC and mount*

## K95

- › Receiver matt black
- › Round barrel profile
- › Black trigger
- › Rubber recoil pad as standard
- › Grade 4 wood
- › Ebony fore-end tip
- › Stock with Bavarian cheek piece and double rabbet

## K95 Options

### Kickstop recoil reducer

For rifles and combination guns. The stainless steel cylinder is filled with granulated tungsten. It is inserted in the firearm's stock and provides absorption of approximately 20% of felt recoil. The stock weight is increased, optimizing the balance of firearms with heavy barrels.

# F16 & F3

Shotguns Best in Class

# Intuition & Balance

## Best in Class Trigger Characteristics

It is here where the ingenious German engineering comes in. Purely mechanical in design this single selective trigger operates independent of recoil and breaks like glass. In a world measured in milliseconds this is a significant advantage for intuitive shooting. The trigger blade of the F3 and F16 Sporting can be adjusted for a customized length of pull to insure ideal finger placement. The barrel selector is conveniently located in front of the trigger and is marked for identification.

## Blaser IBS®: Inertial Block System

The IBS® system eliminates the chances of fan firing or doubling and is integral to our World Class trigger's reliability.

## Blaser EBS® – Ejection Ball System

Whether or not you hit your target is decided before you even mount your shotgun. Smooth movements controlled

by intuition and precise mechanical operations are the keys to success. The entire process starts when closing the shotgun. Conventional ejector systems cock their ejector springs when the gun is closed, which leads to increased resistance and weak ejection over time. This resistance interferes with the smooth flow of movements and disturbs the shooter's concentration.

The EBS® system activates the ejectors when a shot is fired and cocks them when opening the gun. The ejector springs are always decocked when the gun is stored in order to prevent spring

fatigue. Resistance when closing the gun is always kept to a minimum, whether the ejectors were previously activated or not.

## F3 with Linear Guidance of Firing Pin

The linear guidance of the striker and firing pin allows for the best possible transfer of kinetic energy and thus lightning fast ignition.

## Lowest Profile Receiver

It provides the exceptionally low center of gravity for the F3 and F16, making them extraordinary pointable and dynamic, immediately leading to a better shot.

## Blaser Balancer

When you are swinging and the barrel points exactly where your eye focuses, you can be sure that the weight distribution of your shotgun is perfectly adjusted to your needs. To achieve ideal performance, the bulk of the weight should lay right between your hands.

The overall weight distribution should then be fine-tuned to your personal preference. Two features of the F3 and F16 ensure that this is the case: the balancer and the low position of the bore axis.

The Blaser balancer system makes it possible for the shotguns to be flexibly adapted to every shooter and any shooting style: swing-through, pull-away, maintained-lead or move-mount-shoot.

The Blaser competition balancing system consists of two components. It comprises a stock balancer and barrel balancer. The stock balancer is a threaded rod that can be fitted with one or four moveable weight cylinders. The barrel balancer allows you to add up to an additional 170g to the gun (Scope of delivery: F16 Sporting prepared for barrel balancer weights, F3 including barrel balancer weights).

## Triplex® Bore Design

Three construction characteristics combine to provide optimized muzzle velocity, a homogeneous shot pattern and help dampen recoil:

- Innovative, extremely flat forcing cone. The shot stream passes into the cylindrical barrel as smoothly as possible with minimal deformation and without any dangerous increase in pressure.
- “Overbore” internal diameter of 18.65mm (0.735”).
- 12/76 gauge with additional steel shot proofing.

# Concentration & Safety

## Minimal Strain on the Locking Mechanism

Strain on the locking mechanism during shooting is exceptionally low thanks to the optimized geometry of the low positioned bore axis and the high positioned hinge pin. As a result the F16 and F3 are designed to last a lifetime.

## Solid Locking Wedge

The solid locking wedge combines a generous locking surface in combination with a locking plate at the bottom of the action to provide the highest level of locking safety.

## Optimal Hinge Operation

The exceptionally soft barrel closure also helps the shooter to keep their concentration exclusively focused on the target before taking the shot.

## Strengthened Shot

The F16 and F3 have been designed for the use of steel shot and are officially certified as such. (Magnum proofed with additional steel shot proofing).

## Innovative Monocoque Receiver Design

Design concepts developed in Formula 1 racing were the basics in selecting of materials for the F16. From the unique Gun Metal Grey surface coatings to laser hardening principals developed for cars traveling at 230MPH. Safety and strength are more than words they are a necessity.

## Semi Round Body Action

This gives the F16 its dynamic looks. Less is more was the goal and it could only be achieved through the use of quality materials, craftsmanship and state-of-the-art manufacturing technologies.

F16

# F16

## The New Shotgun Class

Perfection from passion: Have you ever taken a new shotgun in your hands and immediately felt familiar with it? This is exactly the experience most shooters have when taking the F16 in their hands for the first time.

By devising the lowest profile receiver in its class, the F16 is provided with an exceptionally low center of gravity. This leads to an outstanding balance and less felt recoil at the same time making it the perfect companion for both hunters and ambitious clay target shooters.

# F16 Game

Ahead of the game: Its unique pointability makes the F16 Game a perfect hunting companion.

The F16 Game with optional grade 4 wood

<b>Fore-end</b>	English style
<b>Stock length</b>	375mm (14.37") incl. recoil pad
<b>Drop</b>	Standard: 38/56mm (1.50"/2.20") (Game stock) Optional: 38/50mm (1.50"/2") (Sporting stock)
<b>Offset</b>	3/6/8mm (0.12"/0.24"/0.31")
<b>Pitch</b>	84°
<b>Wood grade</b>	Standard: 3 Optional (extra cost): Grade 4 wood
<b>Butt plate</b>	Blaser Comfort recoil pad
<b>Receiver</b>	"Gun Metal Grey" with F16 logo, silver colored
<b>Trigger</b>	Trigger pull 1,650g (3lb. 10 oz.)
<b>Barrel selector</b>	Selection of the preferred shot sequence, conveniently placed in front of the trigger
<b>Gauge</b>	12/76
<b>Barrel</b>	71cm or 76cm (28" or 30")
<b>Sight</b>	Nickel-silver pearl bead 3mm (0.12") 9mm (0.35") Rib, tapered to 7.5mm (0.30")
<b>Chokes</b>	Blaser chokes – flush to muzzle 1/4, 1/2, 3/4 incl. choke wrench (standard). Additional Blaser chokes, flush to muzzle (cylinder up to 1/1) as well as extended Briley Spectrum chokes (Skeet to 5/4) are available at extra cost

<b>Firing</b>	Reinforced firing with additional steel shot test
<b>Balancer</b>	Optional balancer in the stock (extra cost)
<b>Weight</b>	From approx. 3.1kg (6lb. 13 oz.)
<b>Accessories</b>	Incl. ABS travel case Incl. sling swivel for subsequent mounting
	Optional left-hand stock.

Butt stock with adjustable comb (optional)

# F16 Sporting

At home on the shooting range! Thanks to balancer in the butt stock and the possibility to fix balancer weights on the barrel, the F16 Sporting can be balanced individually. In combination with the adjustable trigger blade it is the perfect prerequisite for your competition success.

The F16 Sporting with optional grade 4 wood

<b>Fore-end</b>	English style
<b>Stock length</b>	375mm (14.76") incl. recoil pad
<b>Drop</b>	Standard: 38/50mm (1.50"/2") (Sporting stock) Optional: 38/56mm (1.50"/2.20") (Game stock)
<b>Offset</b>	3/6/8mm (0.12"/0.24"/0.31")
<b>Pitch</b>	84°
<b>Wood grade</b>	Standard: 3 Optional (extra cost): Grade 4 wood
<b>Butt plate</b>	Blaser Comfort recoil pad
<b>Receiver</b>	"Gun Metal Grey" with red F16 logo
<b>Trigger</b>	Length adjustable, trigger pull 1.650g (3lb. 10oz.)
<b>Barrel selector</b>	Selection of the preferred shot sequence, conveniently placed in front of the trigger
<b>Gauge</b>	12/76
<b>Barrel</b>	76cm or 81cm (30" or 32")
<b>Sight</b>	Red bead 3mm (0.12") 9mm Rib, tapered to 7.5mm (0.30")
<b>Chokes</b>	Blaser Chokes – flush to muzzle 1/4, 1/2, 3/4 incl. choke wrench (standard). Additional Blaser chokes, flush to muzzle (cylinder up to 1/1) as well as extended Briley Spectrum chokes (Skeet to 5/4) are available

<b>Firing</b>	Reinforced firing with additional steel shot test
<b>Balancer</b>	Prepared for barrel balancer (weights not included). Balancer in stock
<b>Weight</b>	Approx. 3.4 – 3.8kg (7lb. 8oz. – 8lb. 6oz.)
<b>Accessories</b>	Incl. ABS travel case

Optional left-hand stock.

Length-adjustable trigger blade on the F16 Sporting.

Butt stock with adjustable comb (optional).

The F16 Sporting has a balancer incorporated into the stock and is fitted to allow for optional barrel balancer weights, so the shooter can adjust their shotgun according to their needs.

# F16 Intuition

**Ladies only!** With the lowest profile receiver in its class, the F16 forms the ideal basis for a shotgun that is perfectly tailored to the needs of the huntress – both for hunting and clay shooting.

Thanks to reduced pitch angle and slender pistol grip the optimized Monte Carlo stock rests naturally in the shoulder and insures positive trigger control. Shooting becomes more comfortable. The F16 Intuition versions boost self-confidence and lead to natural intuitive shooting. Huntress and shotgun instantly become one.

The F16 Intuition is available as F16 Game and F16 Sporting.

## F16 Intuition Stock

A newly designed Monte Carlo shape provides the huntress with optimum target acquisition. With a stock length of 350mm, it insures the perfect fit from the first shot. The benefits to the huntress are clear: she can comfortably rest

her face against the stock to get into the optimal shooting position. Due to the shorter stock the distance between the pistol grip and trigger as well as the distance between the butt plate and trigger is reduced. The pistol grip now

boasts finer features to easily accommodate a smaller hand reducing the risk of flinching. Shooting becomes more comfortable. Huntress and shotgun become one.

# F16 Heritage

*F16 Sporting Heritage with leaf arabesques and fine English Scroll.*

## F16 Heritage

Fine leaf arabesques lavishly worked into traditional “Basso relief” adorn the stylish long side plates of the F16 Heritage. This elegant shotgun can be combined upon request with game scenes or fine English

Scroll. Its stock is made of finest selected grade 8 walnut wood that has slowly grown in the high altitude of the Caucasus. The F16 Heritage is available in a Game or Sporting version.

# F16 Grand Luxe

*F16 Sporting Grand Luxe with game scene framed in leaf arabesques: pheasants on the left side, ducks on the right side.*

## F16 Grand Luxe

Elaborate leaf arabesques worked into traditional “Basso Relief” decorate the receiver of the F16 Grand Luxe. Upon request they can be complemented by English Scroll or game scenes.

The selected Caucasian grade 6 walnut wood rounds off its elegant appearance. The F16 Grand Luxe is available in a Game or Sporting version.

# F3

## The Shotgun that Answers to the Highest Demands

In competition the F3's technical superiority will out perform all others. When hunting the F3's outstanding pointability and balance will be no match for any game. Regardless of the setting, the F3 brings new meaning to intuitive shooting through ergonomics and technology.

# F3 Competition

Ideal for a variety of competitive disciplines, including Sporting, Compak Sporting and Olympic Skeet shooting. All competition barrels can be used with the barrel balancer system and are almost identical in terms of weight, balance and swing characteristics. The sporting stock with pistol grip and palm swell encourages a relaxed hand position during target acquisition.

*The F3 Competition with optional grade 7 wood*

## F3 Competition

- › Matt black action, other versions available
- › Competition barrels
- › Sporting stock
- › Fore-end English Style; optional Semi-Beavertail fluted or Schnabel
- › Slip-on rubber recoil pad
- › Barrel and stock balancer
- › HIVIZ® shotgun bead kit
- › Optional left-hand top lever and left-hand stock

Supplied with an interchangeable bead kit

Other options include adjustable comb and adjustable recoil pad

## F3 "Vantage"

The youngest member of the F3 family offers shooters faster target acquisition and noticeably less neck and shoulder strain thanks to a combination of a significantly higher rib and a perfectly coordinated stock. The flat ramp angle also extends the shooter's peripheral vision, regardless of the height of the clay and the angle to the target.

*The F3 "Vantage" with the optional grade 7 wood, optional Semi-Beavertail fluted (under gun)*

### F3 "Vantage"

- › Matt black action, with other versions available
- › "Vantage" barrels
- › Supersport straight stock
- › Fore-end English Style; optional Semi-Beavertail fluted or Schnabel
- › KickEez® rubber recoil pad
- › Barrel and stock balancer
- › Optional left-hand top lever and left-hand stock

Optional Supersport Monte Carlo stock

*For further technical information, see page 200 onwards.*

# F3 Supertrap

The harmonious combination of total length, balance and weight distribution makes the F3 Supertrap the ideal companion for champions, whether as an over/under (OU), Under-Single (USGL) or an F3 Supertrap Combo (OU + USGL) version. Thanks to the large adjustment range of the rib, demanding trap shooters can use the F3 to its full potential and adjust the shot placement by raising or lowering the rib according to their individual requirements.

*The F3 Supertrap Under-Single with optional grade 6 wood*

*The F3 Supertrap over-and-under Standard with optional grade 6 wood*

## F3 Supertrap

- › Matt black action, other versions available
- › Supertrap barrels: OU barrel 81cm (32"); set in the factory to a pattern of 70:30 (sighting plane "figure 8")
- › USGL barrel 86cm (34"); set in the factory to a pattern of 85:15 (sighting plane "figure 8")
- › Supertrap Monte Carlo stock with adjustable comb
- › Fore-end English Style; optional Semi-Beavertail fluted or Schnabel
- › KickEez<sup>®</sup> rubber recoil pad
- › Barrel and stock balancer
- › Mid bead and front bead
- › Optional left-hand top lever and left-hand stock

Over/under barrel balancer

Under-Single barrel balancer

Balancer in the stock

## F3 Supersport

The F3 Supersport is the specialist choice for F.I.T.A.S.C., English and American Sporting shooters and is also becoming an increasingly popular choice for successful Olympic Trap competitors.

*The F3 Supersport with the optional grade 7 wood and fore-end Schnabel*

### F3 Supersport

- › Matt black action, other versions available
- › Fore-end English Style; optional Semi-Beavertail fluted or Schnabel
- › Supersport barrels: OU barrel 76 and 81cm (30" and 32") set in the factory to a pattern 70:30 (sighting plane "figure 8")
- › KickEez® rubber recoil pad
- › Barrel and stock balancer
- › Mid bead and front bead
- › Supersport Monte Carlo stock with adjustable comb
- › Optional left-hand top lever and left-hand stock

Barrel balancer

Balancer in the stock

*For further technical information, see page 200 onwards.*

\* Stated weights are excluding stock balancer weights

# Interchangeable Chokes

The F16 and F3 come equipped with various chokes, depending on the model and design you choose. There is unrestricted steel shot compatibility up to half-choke. A choke wrench is included in delivery. Optional chokes at extra cost: extended, manually-changeable Briley Spectrum chokes.

## Flush to muzzle chokes, can be swapped using a choke wrench

Lead shot choke	Restriction	Notches	Steel shot equivalent
Cylinder	0.000mm	–	Skeet
Skeet	0.125mm	–	¼ choke
¼ choke	0.250mm	I	½ choke
½ choke	0.500mm	II	¾ choke
¾ choke	0.625mm	III	–
Full choke	0.850mm	IV	–

## Extended Briley Spectrum chokes, can be changed by hand

Lead shot choke	Restriction	Color	Steel shot equivalent
Skeet	0.125mm	SK	¼ choke
¼ choke	0.250mm	IC	½ choke
¼ – ½ choke	0.380mm	LM	¾ choke
½ choke	0.500mm	M	Full choke
¾ choke	0.625mm	IM	–
¾ – Full choke	0.750mm	LF	–
Full choke	0.850mm	F	–
Extended Full choke	1.050mm	XF	–

# COMBINATION GUNS

## Everything You Need

Hunting is as varied as the different hunting grounds you go to. Whether you use a large or small caliber, each rifle has its own specific area of application. The same goes for shot – in many cases shooting with shot is the only option due to safety reasons when hunting down game. It is therefore essential to be prepared for any situation.

# O&U Shotgun Rifle BBF 95 / BBF 97

Shotgun and rifle – the classic at Blaser. The barrels can be adjusted to each other by a qualified gunsmith. This means that the Blaser BBF is unbeatable for shotgun slugs.

The BBF97 Luxus with optional scope  
Blaser 2.8-20x50 iC and mount

The BBF97 Prestige

## BBF95 and BBF97

- › Receiver with grained side plates
- › Grade 3 wood
- › Blaser precision triggers
- › Barrels float freely
- › Stock with Bavarian cheek piece
- › Optional left-hand stock

## BBF95 and BBF97 Prestige

- As the BBF95 and BBF97, but includes:
- › Side plates with arabesque engraving

## BBF95 and BBF97 Luxus

- As the BBF95 and BBF97, but includes:
- › Side plates can have an animal or fine arabesque engraving
  - › Grade 4 wood

## Single-lock or double-lock? It's your choice

Combination guns from the 95 model series are fitted with a single-lock and combined guns from the 97 model series with double-locks. This means that there are two strikers and two firing pin springs in the system. Both systems have their benefits.

The advantage of the 95 system is the slightly simpler operation, as only one firing pin spring needs to be cocked. This means that the firearm is automatically decocked after a single shot has been fired and the safety is engaged.

The advantage of the 97 system is that when a second shot is required, it can be released very quickly without having to be recocked. The 97 system is particularly useful for hunters who frequently have the opportunity of firing a second shot quickly.

# Bergstutzen BS 95 / BS 97

Many hunters, particularly those with mixed small game and in mountainous hunting areas, want to be able to carry a single firearm with two different calibers. The upper, smaller barrel of the BS95 or BS97 lies in a carrier tube and can be adjusted precisely to the bottom barrel.

The BS 95 Luxus with optional scope Blaser 2.8-20x50 iC and mount

## Bergstutzen BS 95 and BS 97

- › Receiver with grained side plates
- › Grade 3 wood
- › Blaser precision triggers
- › Barrels float freely
- › Stock with Bavarian cheek piece
- › Optional left-hand stock

## BS 95 and BS 97 Prestige

- As the BS 95 and BS 97, but includes:
- › Side plates with arabesque engraving

## BS 95 and BS 97 Luxus

- As the BS 95 and BS 97, but includes:
- › Side plates can have either an animal or arabesque engraving
  - › Grade 4 wood

## Single-lock or double-lock? It's your choice

Combination guns from the 95 model series are fitted with a single-lock and combined guns from the 97 model series with double-locks. This means that there are two strikers and two firing pin springs in the system. Both systems have their benefits.

The advantage of the 95 system is the slightly simpler operation, as only one firing pin spring needs to be cocked. This means that the firearm is automatically decocked after a shot has been fired.

The advantage of the 97 system is that when a second shot is required, it can be fired very quickly without having to be recocked. The 97 system is particularly useful for hunters who frequently have the opportunity of firing a second shot quickly.

# Double Rifle BB 97

Thanks to free floating and adjustable barrels, the range of applications for the BB 97 goes far beyond driven hunts.

The BB 97 can also be ordered with a single trigger.

*The BB 97 Luxus with optional single trigger, scope Blaser 1-7x28 iC and mount*

## **Double Rifle BB 97**

- › Receiver with grained side plates
- › Grade 3 wood
- › Blaser precision triggers
- › Optional single trigger
- › Barrels float freely
- › Stock with Bavarian cheek piece
- › Optional left-hand stock

## **BB 97 Prestige**

- As the BB 97, but includes:
- › Side plates with arabesque engraving

## **BB 97 Luxus**

- As the BB 97, but includes:
- › Side plates can have either an animal or arabesque engraving
  - › Grade 4 wood

# Bockdrilling BD 14

As hunters, we learn to expect the unexpected, whether in a blind or stalking, so it's understandable that we dream of a firearm that will allow us to take advantage of any situation. With the Bockdrilling BD 14, Blaser has developed the perfect blind and stalking firearm – compromises are finally a thing of the past.

The BD 14 has a double-lock system so that a second shot can be taken without having to recock the firearm. Thanks to the free-floating barrels, the point of impact remains constant even with a quick succession of shots, no matter which barrel was fired first. The extremely strong vertical block lock on the BD 14 helps contribute to the high degree of precision.

The BD 14

## BD 14

- › Steel-grey anodized receiver, optional black anodizing
- › Stock with Bavarian cheek piece
- › Rubber recoil pad
- › Black fore-end tip
- › Grade 3 wood
- › Optional left-hand stock
- › Barrels can be adjusted to each other

## BD 14 Luxus

As the BD 14, but includes:

- › Animal engraving: choose from red deer and roe deer; red deer and fox with duck; wild boar and roe deer
- › Grade 4 wood

The BD 14 Baronesse with optional scope Blaser 2.8-20x50 iC and mount

## BD 14 Baronesse

As the BD 14, but includes:

- › Long side plates with arabesque engraving
- › Titanium-nitrided triggers
- › Engraved black trigger guard
- › Grade 7 wood

For further technical information, see page 218 onwards.

# Drilling D99

The Drilling D99, with its two shotgun barrels and a rifle barrel, is the best all-rounder. It is the ideal firearm for hunting in areas with small and big game animals. The D99 has a double-lock system so that a second shot can be taken with no hesitation and without recocking.

Thanks to the free-floating barrels, the point of impact remains constant even with quick follow-up shots. The extremely strong vertical block lock on the D99 helps contribute to its exceptional accuracy.

The D99

## D99

- › Edge point engraving with small arabesques
- › Black fore-end tip
- › Optional with half-beaver tail fore-end
- › Stock with Bavarian cheek piece
- › Grade 3 wood
- › Optional left-hand stock

The D99 Luxus with optional scope  
Blaser 2.8-20x50 iC and mount

## D99 Luxus

As the D99, but with:

- › Hand-engraved arabesque engraving
- › Grade 4 wood

For further technical information, see page 218 onwards.

# Options

## Kickstop recoil reducer

For rifles and combination guns. The stainless steel cylinder is filled with granulated tungsten. It is inserted in the firearm's stock and provides absorption of approximately 20% of felt recoil. The stock weight is increased, optimizing the balance of firearms with heavy barrels.

## Rubber recoil pad

Minimizes the effect of the recoil on the shoulder, protects the stock and provides a non-slip surface when storing.

# BLASER AMMUNITION

Effective and Accurate

Blaser ammunition is not offered for sale, sold, or distributed in North America.

# 8.5x55 Blaser – Success Redefined Maximum Power for Short Barrels

Rifles with silencers are gaining more and more importance. In order to keep the firearm as compact as possible with a silencer, short barrels are the perfect choice. Especially for this reason, Blaser has developed the caliber 8.5x55. Even with barrel lengths of less than 50cm, it reaches ideal ballistic values that are normally only achievable with use of longer barrels for high-performance calibers.

8.5mm bullet diameter with 10.4g and 11.7g bullet weight, together with a high bullet velocity provides the best possible effect as well as a very long trajectory. These features make the 8.5x55 Blaser a caliber with an incredibly wide field of use; ranging from local hunting territories to hunts for moose or large antelopes.

Ballistic data of barrels with a length of 600mm

Muzzle velocity subject to barrel length

The R8 Ultimate Leather with Blaser  
Over-Barrel silencer and barrel length 600mm.

A barrel shortened by 13cm results in a minimal loss in performance

The R8 Ultimate Leather with Blaser  
Over-Barrel silencer and barrel length 470mm.

CAUTION: Fire or blast hazard and hazard of fragment projection. Keep away from hot surfaces, sparks, open flames and other sources of ignition. No smoking.

# Blaser CDC – Environmentally Responsible: Lead Free

More than 30 years ago, Barnes (today one of the world's most renowned bullet manufacturers) put a lead-free copper hunting bullet on the market. The goal was to provide a bullet with consistently good expansion qualities and – at the same time – improve ballistics.

The Blaser CDC (Controlled Deformation Copper) bullet combines all these desired qualities in the optimum way, including excellent accuracy and superior knock-down effect. CDC is specifically adjusted for light to medium game, meeting the needs of hunters in Central Europe perfectly. CDC is designed and field-tested by Blaser. In order to ensure the highest quality possible, CDC bullets are manufactured by Barnes and loaded by Norma.

Compared with other brands of lead-free bullet, the weight of the Blaser CDC bullet has been only slightly reduced from those containing lead. This has been done deliberately, to ensure the CDC's excellent controlled bullet performance over a wide range

of distances and velocities. Thanks to a heavier weight, CDC bullets offer outstanding penetration and excellent stability.

The CDC's bullet tip reacts immediately on impact due to its special design consisting of an innovative expansion cavern, pressure grooves and a polymer tip. On penetration, CDC forms four separate petals, preventing fragmentation and meat damage.

Thanks to its weight, the CDC projectile provides consistently good deformation over a large range of distances.

 CAUTION: Fire or blast hazard and hazard of fragment projection. Keep away from hot surfaces, sparks, open flames and other sources of ignition. No smoking.

# Blaser CDP – Best Effects with Lead

As a result of the controlled deformation process (CDP) the CDP projectile ensures a powerful shock effect and high penetration force while its weight remains virtually the same.

Despite its relatively low weight, the CDP bullet produces the optimum exit wound while causing minimum meat damage. Upon impact, the CDP bullet mushrooms symmetrically in four directions. Regardless of varying velocity and target resistance, the deformation process always remains controlled. When mushrooming, the diameter of the bullet increases by 2.5 times. This effect has been achieved by accurately calculating the behaviour of the bullet components during the shot.

## Extensive testing over hundreds of shots in the field showed the following results:

- in 78% of cases, the quarry ran less than 20m following a hit
- in 94% of cases, very low meat damage was reported.

The tip of the projectile consists of a soft alloy that reacts dynamically.

Four internal grooves along the length of the bullet, set at 90 degrees, control the symmetrical deformation process.

The increasing thickness of the sleeve towards the rear supports controlled expansion.

The V-shaped closed bridge is robust yet flexible. To a large extent, the forces that affect the projectile in the barrel are absorbed. The bridge gives the projectile reliable protection against decomposition and provides optimal interior ballistics.

The hard rear core promotes penetration performance and ensures that the projectile retains close to 100% of its weight.

## Blaser Magnum – True Power

In cooperation with Norma, Blaser has developed a brand-new and completely original generation of high-performance cartridges. The latest ammunition technology was applied to achieve optimum performance in each caliber group.

### High Accuracy with Good Shooting Characteristics

High precision values in conjunction with notably increased energy and velocity data make the Blaser Magnum calibers your best choice for long-range shooting – whether you are hunting in the mountains, in the savanna or on a plateau.

Thanks to an optimized cartridge geometry, a stable cartridge base and modern powder types as well as the four-groove barrel profiles and adapted twist rates, the Blaser Magnum offers a more comfortable recoil than other Magnum cartridges.

### Four Calibers, Six Loads

The Blaser Magnum calibers are available with Hornady Interlock, Nosler AccuBond, Barnes TSX/TTSX and Blaser CDP bullets. Norma also offers additional loads under its own company label.

The range of Blaser Magnum cartridges from left to right:  
 7mm Magnum with Hornady Interlock bullet; .300 Magnum with TTSX bullet;  
 .300 Magnum with CDP bullet; .338 Magnum with Nosler AccuBond bullet;  
 .338 Magnum with Barnes bullet; .375 Magnum with Barnes bullet

Blaser

8,5 x 51

# Blaser Silencers

Every shot can cause irreparable damage to your hearing. It is therefore advisable to wear suitable hearing protection at all times when shooting. Practical considerations when hunting means that this is not always possible.

Using silencers represents the far better solution. They provide less risk of hearing damage and the pain threshold of 130dB at the ear is rarely reached. Moreover, silencers have a particularly positive effect on the shooting performance.

Besides the muzzle report, a silencer also considerably reduces recoil which is a significant part of achieving better accuracy.

## Blaser On-Barrel Silencer

Blaser's On-Barrel Silencer is designed primarily to meet the requirements and needs of hunters. It is threaded onto the barrel forward of the front sight.

Thanks to the silencer's slim design you are still able to shoot using your open sights. Aerospace grade aluminum alloy combined with titanium insure the Blaser On-Barrel Silencer is one of the lightest on the market and still offers an outstanding service life.

## Versions

Version 6.5 mm  
Version .30  
Version 9.3 mm

## Caliber group

≤ 6.5 mm  
≤ .30 (7.62mm)  
≤ 9.3 mm

## Technical Data

Diameter	42.9 mm (1.69")
Total length	203.1 mm (7.99")
Real extension	188 mm (7.40")
Barrel overhang	15 mm (0.59")
Weight	325 g (0.72 lb) for .30 Caliber
Noise reduction	27 dB (C) for Cal. .308 Win.

Every R8 and K95 can optionally be factory fitted and retro-fitted with the required muzzle thread for the silencer.

Please note all barrels with sights require the front sight to be set back approximately 17mm / 0.67". It is also

suggested to use a thread protector cap when the silencer is not installed.

## Blaser Over-Barrel Silencer

The Blaser Over-Barrel Silencer is the ideal solution when short overall length is required. The combination of a special aluminum alloy and steel ensures it is lightweight while still having a long service life.

It should be taken into account that the Blaser Over-Barrel Silencer can only be mounted on barrels without open sights. For retrofitting a muzzle thread with cover, the front sight must be removed.

Diameter	50 mm (1.97")
Total length	247 mm (9.72")
Real extension	158 mm (6.22")
Barrel overhang	89 mm (3.50")
Weight	410 g (0.90 lb)
Noise reduction	34,5 dB (C) for Cal. .308 Win.

### ABS Hard Case

Safe, comfortable, discreet: the perfect light carrying case for car and aircraft. The double ABS shell provides reliable protection against knocks and bumps for the firearm. Additional features of the case are leather trimmed rounded edges along with a fine velvet interior that is secured with 3 combination locks.

**Type C:** stock length max. 420mm; compartments: 2x Barrel (length ma. 700mm), 2x Scope (up to Ø 56mm), R8 Magazine extra, document compartment and allen t-wrench storage space in lid; with combination lock; LxWxH=84x45x11cm

**Type A** (not shown): Break action / Combined rifles, compartments: 1x barrel (length max. 680mm with forearm removed), stock length max. 420mm, 1x Scope with combination lock; (LxWxH=71x32x10cm)

**Type B** (not shown): for barrels max length 700mm, Integral Silencer (Ø31mm ISD), stock length max. 380mm; compartments: 1x Barrel (length max. 700mm), 1x Scope (up to Ø 58mm), 1x ISD (Ø31mm ISD), 1x Scope (Blaser 1-7x28 iC) or 1x Silencer (Ø50mm x max. length 240mm), 1x additional assembly incl. bolt head, 1x Sling, document compartment and Allen t-wrench storage space in lid; with combination lock; LxWxH=80x35x9cm

### Hunting Travel Trolley

The convenient and hardwearing hunting travel trolley has been used across the globe. It is made of high quality, extremely durable Cordura. The clever pocket and compartment system offers you optimal storage. The whole travel case is a compact, easy-to-carry unit.

External dimensions LxWxH:  
86x38x40cm (33.8"x15"x15.7")

Total volume: approx. 95.5l Weight:  
approx. 6 kg (13 lb 3.6 oz)

### Blaser Weekender

This sturdy carry on bag has ample room for clothing and a multitude of hunting equipment. The combination of brown twill and high-quality leather boasts first-class workmanship and an elegant finish. As well as a zip, the bag also has two belt buckle fasteners. With discreetly embossed Blaser logo on the top.

External dimensions:  
LxWxH: 50x25x29cm  
Total volume: approx 30 l

## Ultimate Expedition Rucksack

Blaser's Ultimate Expedition rucksack combines all the innovative features needed by the hunter. Developed from experience, its fold-out rifle carrying compartment ensures safe transport of rifles while providing direct access at all times. At the same time, its sophisticated carrying system allows ergonomic game transport. Thanks to its well thought-out space division, compression straps, as well as front and top-loading function, you can store all the essentials for your trip. The game carrying sack that is included provides the necessary hygiene when transporting harvested game.

Its low-noise and water-repellent outer material is fully matched in both color and function and designed totally for use in hunting. Sturdy Cordura on the bottom of the rucksack makes it even more resistant to dirt and moisture.

Combined with its many features, the Blaser Ultimate Expedition is your perfect companion for any hunting challenge.

Volume: approx. 43l

Weight: approx. 3.3kg

L x W x H: approx. 31x25x65cm

[www.blaser.de/UltimateRucksack](http://www.blaser.de/UltimateRucksack)

## Blaser Carbon Shooting Stick

Whether it is stalking, driven or mountain hunting – the Blaser Carbon Shooting Stick is the ideal solution for a safe shot even under difficult conditions. It sets new standards in terms of stability, weight, ergonomics and functionality. Thanks to its high-quality materials, such as carbon or fiber-reinforced plastic, and its design which was developed from experience, it gives you stability and security to master every hunting situation.

Thanks to the rotatable “pistol grip” which is set strategically on the front support, you can keep the rifle safely on target over a lateral area of 20 meters at a range of 100 meters. This can be done without having to move the shooting stick itself from the position it is set in. This is an invaluable advantage with crossing game.

Length: 1.24 – 1.98 m (Length adjustment through four screw closures)

Weight: 985 g

Weight incl. bag: 1.307 g

Rifle holder: U-Shape rifle rest  
(magnetic and removable)

Material: Carbon, plastic, elastomer screw closures, foam handles

See more:  
[www.blaser.de/ShootingStick](http://www.blaser.de/ShootingStick)

### **Blaser Gun Covers**

The new Blaser gun covers combine classy loden with elegant cowhide leather or are entirely made of rugged Cordura. They are available for rifles and combination guns in size "short" or "long" and as a sleek shotgun slipbag. The comfortable carrying strap with anti-slip insert and the robust metal fasteners provide optimum transport even with heavy firearms. The rifle cover incl. 2 combination locks, and the shotgun slipbag incl. 1 combination lock.

#### **Rifle cover "long":**

Rifles up to total length of 128cm (50,4") and Blaser rifle scope 4-20x58 iC

#### **Rifle cover "short":**

Rifles up to a total length of 110cm (43,3") and Blaser rifle scope 4-20x58 iC

#### **Shotgun slipbag:**

Shotguns up to a total length of 127-134cm (50"-52,8")

#### **ABS shotgun case**

Safe, comfortable, discreet: the perfect, light carrying case for car and aircraft. The ABS shell reliably protects your shotgun from knocks and bangs. Safe protection for all shotguns with a maximum barrel length of 81cm (32"). Special compartments give you plenty of space for extra chokes, shooting glasses, hearing protection and other accessories. Extra compartment for an exchangeable barrel. Rounded, edges lined in leather with a fine velvet interior. Three combination locks.  
LxWxH: 89x30x12cm (35"x11.8"x4.7")

### Canvas Hunting Rucksack

Made of original hunting linen, robust, low-noise and tear-resistant. The material is 100% cotton, coated and water-repellent. Mounts and straps are made of high-quality cowhide leather. Comes with a folding seat cushion and a game transport bag.

Volume: approx. 35l

WxH: 60x55cm (23.6"x21.6").

### Game Hauler

Helpful, practical strap for recovering game in difficult terrain. The variable rope with swivel snap can also be used for bleeding out in conjunction with the extremely strong stainless steel hook. Includes two bird totes for easy transportation of harvested small game.

### Blaser Folding Game Bag

Folding, extremely robust game bag in waterproof material for easy transportation of harvested game. Large capacity. Adjustable-length handles can be used as grips or practical shoulder straps.

WxHxD: 60x40x40cm (23,6"x15,7"x15,7")

### Cordura Cartridge Pouch

Versatile, durable, handy – the new Blaser cartridge pouch is made of robust Cordura and accommodates up to 12 rifle cartridges. Thanks to its well thought-out design it can be used in different ways. Its flexible material provides maximum comfort when worn on the belt. The magnetic closure allows for fast and silent access to your ammunition. The removable cartridge holder with separate strap and velcro fastener can conveniently be worn on the arm or can be attached to the stock of your rifle. With premium cowhide leather inserts.

### Blaser Rifle Slings

Non-slip, elastic and adjustable in length, whether it's the finest cowhide, elegant loden and leather or rugged Neoprene, thanks to the wide soft shoulder pad the Blaser rifle sling provides you the best carrying comfort. For optimal handling, it features the proven Blaser quick-release fastener and an integrated cartridge carrier for two additional rifle cartridges.

#### Blaser Rifle Sling "Leather"

Made of fine cowhide leather.

#### Blaser Rifle Sling "Neoprene®"

Made of Neoprene® and available in anthracite or dark green (not shown).

The rifle sling in dark green is also available as a tracking version with practical tracking clasp on the buttstock. Suitable only for "Tracking" rifle models.

#### Blaser Rifle Sling "Loden/Leather"

Made of fine cowhide leather and loden, with a particularly wide shoulder pad this sling is perfectly suitable as a rifle rest for the R8 Silence model.

### Blaser Carbon BiPod

The Blaser Carbon BiPod is the perfect assistant for ensuring a certain hit when shooting lying on the ground. Just before the shot it can be taken out of the pocket in not time and inserted effortlessly in the holder provided in the Blaser Carbon BiPod forearm tip. For a secure support the legs of the BiPods lock in place when in final position and can be unlocked only by a push of the button. Thanks to the lengthwise adjustment of the legs up to 30cm useful in nearly every terrain. Available for all R8 Professional and R8 Ultimate models.

### Blaser Silencer Cover

The Blaser silencer cover boasts an elegant loden design with leather trims giving every rifle with a mounted silencer a harmonious overall appearance. At the same time, it avoids disturbing noises when carrying the firearm on the hunt. The Neoprene insulation significantly reduces the danger of burns even with intense heat.

Large (for Blaser Over Barrel)

Ø47-52mm, 245mm length

Small (for Blaser On-Barrel)

Ø38-45mm, 195mm length

Material: Neoprene, loden imitation (60% wool, 40% polyester), leather inlays, PU

### Blaser Shooting Pillow

Whether in a high seat or on a shooting range: The Blaser shooting pillow is your perfect support for accurate shooting. Thanks to the low-noise outer material and a filling of plastic granulate, it is not only particularly lightweight, but also provides a safe rifle rest.

# BLASER OUTFITS

Fashion for Active Hunting  
and Functional Lifestyle

Our clothing line provides you with functional hunting wear and elegant fashion that is practical for any hunting situation, terrain or season. Designed for everyday challenges, whether you're heading out on a weekend getaway with family or on your next hunting expedition, Blaser Outfits exceeds your needs. In addition, it is our mission to ideally source all materials in a responsible and sustainable way. Ultimately bringing to you traditional style with cutting-edge textile fabrics to create the perfect balance of character and comfort.

# Versatile Quick-Change Artist

The Blaser Outfits Fleece CAMO reversible jacket combines soft fleece on the one side with robust CAMO on the other side. The fleece exterior is water-repellent, windproof and breathable. Eye-catching are its noble trimmings on the elbows, chest, pockets and wind flap as well as the stand-up collar with the CAMO BLAZE-colored decorative strip.

The CAMO BLAZE colored side of the reversible jacket has a sturdy appearance. Thanks to the Teflon lamination, it is waterproof, windproof and breathable and comes with sealed waterproof seams. The PRIMALOFT padding keeps you comfortably warm.

## Super soft, Super Practical, Super Light

Looks like fine suede, but performs on the highest level! The elegant combination of the modular Suede Jacket Light Mark and the Suede Trousers Light Markus is quiet and gives you extreme comfort. The light RAMTEX outer material is water and dirt repellent. The RAMBRANE membrane makes both garments waterproof, windproof and breathable. When it gets colder, you can combine the Primaloft Modular Jacket Ingo with the Suede Jacket Light Mark easily with a zipper.

# Blaser Outfits Function Symbolism

## RAM WIND-LOCK

Protection from hypothermia is of great importance on the hunt, when phases of extreme physical activity alternate with ones of motionless waiting. **RAM WIND-LOCK** provides highly effective, breathable protection from the wind.

## RAMBRANE

**RAMBRANE** is the highly effective functional membrane, specially developed for the hunt and for outdoor wildlife observation. It is waterproof, windproof, fully breathable and extremely tough and makes almost no noise. It regulates the climate on the skin, keeping it dry, even under severely wet conditions, together with extreme physical exertion. During phases of less activity, it provides thermal insulation.

## RAMTEX

**RAMTEX** combines a sophisticated appearance with a character both robust, yet light. It appears as a decorative, reinforcing element in high-quality outdoor textiles and possesses the optical allure of suede leather.

## TeflonEcoElite™-Finish

The **Teflon EcoElite™ finish** is the sustainable further development of the classic Teflon finish. The impregnation is water-repellent, preserves the breathability of the outer fabric and thus offers utmost wearing comfort.

## PRIMALOFT®

Besides providing perfect thermal insulation, **PRIMALOFT®** is very quiet and water-repellent. Thanks to its low volume, it dries quickly and is thermally efficient.

The new **PRIMALOFT® ThermoPlume** insulation has the look and feel of real down. The silky soft, particularly lightweight tufts of fibre plumes provide excellent thermal properties. In wet cold the **PRIMALOFT® ThermoPlume** insulation plays to its strengths: it is water-repellent and thus also perfectly suitable for bad weather.

## ELASTIC

All Blaser Outfits featuring this icon have been designed for active hunting. They follow every of your movements and optimally adapt to the shape of your body.

## PREMIUM DOWN FILLING

All of our garments featuring this icon contain down fillings that correspond to the RDS. The Responsible Down Standard aims to ensure that down and feathers come from animals that have not been subjected to an unnecessary harm.

# Namibia

## Sney Rivier Lodge

Hunting fever can affect everyone: whether you are carrying a camera, binoculars or a rifle, being near wild game will send your pulse racing!

Experience the unique flair of Sney Rivier Lodge, which is just a two hour drive from Windhoek airport. In a breathtaking landscape, you can hunt on more than 20 game species, exclusively while stalking on foot. Thanks to a wide range of leisure activities, non-hunting partners will surely also enjoy the stay.

Situated in the landscape at the base of the Khoma Highlands, Sney Rivier Lodge enjoys a unique ambience. The architecture and design of the lodge is inspired by nature and hunting. The boundaries between inside and outside are blurred. Within view of the main house and the guest chalets is a watering hole where game can be observed all day long.

The lodge is the ideal destination for both the experienced African hunter as well as for those hunting on the continent for the first time. The trip will be an unforgettable experience for the rest of the family, too. From the generous breakfast buffet to delicious dinners, the chefs are always able to surprise with a combination of traditional African and modern international cuisine.

Sney Rivier Lodge pampers you with the highest levels of luxury, while being in the middle of the Namibian bush. The lodge was rebuilt in 2009 based on the concept of combining exclusivity with thrilling hunting in the wild.

Hunting challenges are guaranteed to be found on the 40,000 hectares of hunting grounds, be it tracking wild game and stalking to within range of your quarry or sitting in a hide on one of the countless rocky hills. Our hunting guides and trackers are masters at helping you, the hunter, succeed. As excellent connoisseurs of flora and fauna, they are able to show you some of the most extraordinary natural wonders in Namibia.

You will be treated to the most amazing spectacles during every season of the year and at any time of day. Every stalk is worthwhile, every stalk will bring its own surprises. Hunting is done exclusively on foot.

Endless plains and a varied landscape always impress visitors from Europe, as Namibia is only sparsely populated and largely untouched. It counts among the most bio-diverse countries on the planet.

What could be more beautiful than bringing the hunting day to a close beside a campfire enjoying your favorite beverage and bite to eat. Find yourself reminiscing about the days adventure while being pampered by our friendly attentive staff. At least until the drums call you to another highlight: the dinner, where a wide variety of game cuisine is featured.

# Hungary

## Europe's Hunting Paradise

Hungary offers a unique variety of hunting opportunities with red deer, roe deer, mouflon, fallow deer and wild boar all available. The country's exceptional game stocks and its hospitable people attract numerous visitors who come to enjoy Hungary's large selection of national hunting areas and comfortable hunting lodges.

Hungary is a fantastic country to hunt roe deer, which can be found in both the east and the west. Strong bucks are mainly found in eastern Hungary, where you can choose between stalking and high seat hunting. In western Hungary, with its extensive hunting areas, there is also excellent roe buck hunting to be had.

Since the start of the 20<sup>th</sup> century, Hungary has also been renowned for its classic small game hunting (driven or stalking). Hunters from across the globe visit the Hungarian lowlands in the east of the country every year.

# Hungary

## Red Deer Rut

Nowhere else in the world you can traditionally hunt on such enormous stags as during their fascinating rut. The noblest of our game species is nurtured with great care here in Hungary where its natural habitat is still spacious enough. For most hunters the red deer rut is the biggest highlight of their hunting year. Especially in our Hungarian national hunting areas rangers work towards the rut the whole year through and thus make hunting on all classes possible.

## Driven Hunts

Experience the famous and perfectly organized driven hunts in the hunting areas of Hungary which are extremely rich in game. Not only big boars, but also the many different game species and the large hunting bags attract numerous hunters every year again to go hunting in highly traditional Hungary.

# Hungary

## Mouflon and Fallow Deer

Hunting mature mouflon rams in the indigenous and hilly oak and beech forests of Hungary is particularly exciting.

Hungary is world-renowned for being one of the best hunting countries for big fallow stags: from interesting stags to be shot over abnormal stags to world record class.

# Sambia

## A Hunting Jewel

The Game Reserve lies in the world-famous Luangwa Valley and stretches from the North Luangwa National Park to the Luangwa River.

The area covers 200 square kilometres of Miombo woodland, savannah and rugged mountains.

Due to the varied habitats, an astonishing variety of species can be found in Nyaminga, including: leopard, buffalo, Chobe bushbuck, crocodile, elephant, grysbok, hippo, kudu, oribi, puku and Cookson gnu.

# Cameroon

## For Connoisseurs and Specialists

Hunting in the rainforest and in the savanna: All safaris are run on a one-to-one basis, and each hunting guest is escorted by a professional hunter with their own individual hunting vehicle and a team of trackers and bearers.

The first and last day of your scheduled trip are usually spent travelling, so for a 16-day safari, you can enjoy 14 full hunting days.

We offer safaris in five camps: Mayo Oldiri, Mayo Nduell, Djibao, Mayo Vaimba and Rey Bouba.

# Tanzania

## In Hemingway's Footsteps

A story of incomparable encounters: Tanzania is without doubt one of the most famous and exclusive safari destinations in Africa. Inyonga East, Kilombero Valley, Maasailand and Selous are the perfect examples of what Tanzania has to offer: unparalleled variety of wildlife and breathtaking views.

## South Africa

### Africa's Diversity

We have hunting opportunities in several different areas, allowing us to tailor-make safaris according to your needs!

Safaris are run in South Africa throughout the year, with the best hunting opportunities between April and October.

Around 40 different species of game can be hunted throughout the country, and each safari is carefully planned by us to suit your wishes. Safaris in South Africa are suitable for the whole family and for the non-hunters in the party, there are a variety of interesting photographic tours.

## Mozambique

### Buffalo Fever in the Zambezi Delta

Mozambique, in southern Africa, offers you the chance to experience wilderness unchanged for millennia. This is one of the greatest hunting countries on the globe: There are areas where no trophies have been taken for 16 years.

The hunting area is part of the Marromeu complex and lies in the centre of Mozambique. It borders the mighty Zambezi river and has an area of approximately 200,000 hectares.

# Zimbabwe

## In Colonial Style

Hunting in Zimbabwe is done with our partner in the Matetsi region in the west of the country. These areas are the Kazuma/Pandamasuie Forest area which borders the Kazuma Pan and the Zambezi National Park.

Other hunting areas are near the Fuller Forest and further south in the Ngamo forest areas. None of the areas are fenced, so the game is all free-range, and they vary in size from 30,000 to just over 102,000 hectares.

The hunting areas named here are known for their very good game populations, with mature trophies for big game and plains game.

The hunting season runs from April to October; the most popular period for hunting is from June to August.

# Mauritius

## Hunting on the Island of Your Dreams

Experience a dream holiday on the Indian Ocean and exciting hunting: If you suggest Mauritius as a destination, you'll find it won't be too difficult to persuade your partner to come with you for a hunting holiday. After all, where else in the world can you combine a relaxed beach holiday with hunting?

White sandy beaches, a crystal clear sea, exclusive hotels under palm trees and spectacular nature make Mauritius a prime destination. Only very few hunters realize there are amazing hunting opportunities in this magical place. Rusa deer, part of the crested deer family, and wild pigs were introduced by the first sailors to the islands as a source of meat. Today, these two species are controlled by hunting. Hunting, deep-sea fishing and beach holiday: the perfect, varied combination.

# Australia

## The Fascination of Down Under

Hunting is a special experience in Australia, and will surprise even the most experienced and well-travelled hunters. Along with water buffalo, which our partner specialises in, you can also hunt banteng and wild boar.

The hunting takes place in the best and most remote area of Arnhem Land, where Australia's nature and wilderness are untouched. Accommodation is in comfortable tented camps near the hunting areas.

# New Zealand

## At the Other End of the World

This truly is one of the most impressive hunting areas in one of the most beautiful countries in the world. Exceptional examples of game species and fantastic landscapes have established New Zealand as one of the destinations for the globetrotting hunter.

Conscientious management and a limited number of hunts ensures the highest quality of this outfit and helps to preserve it from season to season.

Tours and packages are tailored individually to each hunter or group and can contain other summer and winter activities. Whether you like sightseeing, a helicopter flight to a private boat with an overnight stay deep in the heart of the fjords, or a day of heli-skiing in the southern mountains – Minaret Station can satisfy any wish you might have.

Your accommodation is a comfortable lodge in the hunting areas, from which you have magnificent panoramic views across the beautiful landscape. The area is mountainous and the town is named after Lake Wanaka, the fourth largest inland lake in New Zealand.

# Argentina

## In the Land of the Gauchos

Argentina is one of the top destinations for hunting and fishing worldwide. With its varied climatic zones and regions, it offers many opportunities for foreign hunters.

The plains in the Buenos Aires province, the Patagonian mountains and the La Pampa province provide a large range of local and exotic game species.

The seasons are the reverse of our European dates: the red deer rut takes place from March to April, which is the main hunting season. Other game species can be hunted from March to November.

Species include red deer, buffalo, fallow deer, blackbuck, four-horned sheep, axis deer, peccary, mouflon, Pampa goat, puma, wild boar, wild sheep and of course small game.

# Canada

## Every Hunter's Dream

Who hasn't dreamed of following in the footsteps of Jack London and hunting in the north of Canada? There are crystal-clear lakes and rivers, the lonely and endless expanses and the stunning colors of the Indian summer, which see the start of the hunting season in early autumn.

You'll stay in remote cabins, where you'll forget time and the worries of everyday life.

While hunting you'll find your breath taken away by the beauty, and be surprised by the huge moose bulls that appear as if from nowhere.

Canada's northern provinces of British Columbia, Yukon and the Northwest Territories have been spared from the effects of civilisation, making them the ideal terrain for a hunting trip. The far north offers you the original and genuine wilderness of Canada.

The north of Canada offers you much more than just moose for hunting. August is ideal for a very demanding Dall sheep hunt, or to pursue snow goats. The stalks for old caribou bulls starts in the high valleys in September, while the moose rut starts in the middle of that month. There is always the chance that a wolf might present itself, which gives each hunting day the possibility of a chance encounter.

In the Arctic spring between the start of March and the middle of May, there is the opportunity to hunt Polar bears on Baffin Island. Hunting on the “eternal ice” is one of the most extraordinary hunting experiences of them all.

Blaser Safaris organizes hunts in British Columbia, Yukon, Northwest Territories, Nunavut and Newfoundland.

# Alaska

## Rough Coasts & Strong Bears

A successful hunt is only possible with plenty of opportunity, and more bears mean more opportunities. Admiralty Island, situated in the middle of the inside passage of Alaska's wild coast, boasts the largest density of brown bears per mile.

Enjoy the natural beauty of Alaska against a stunning backdrop. It is not uncommon to see whales, eagles, seals, sea lions and a number of other animals. All trips include fishing and you will be treated to a special delicacy during your trip if it's available: fresh Alaskan crab and prawns.

A superbly equipped yacht provides you with comfortable accommodation, and you'll be travelling along the most remote stretches of coastline, using a rubber dingy to approach the areas that have the greatest promise for success.

The chance of bagging a really substantial coastal brown bear is unusually high here, and there is also the possibility of hunting wolves and black bears.

# Vancouver Island

## Wilderness & Civilisation

Vancouver Island boasts a unique combination of stunning coastal landscapes, rain forests, fjords, mountains, and the metropolitan flair of British Columbia's capital, Victoria. This is one of the key attractions of hunting in one of Western Canada's most spectacular regions.

Spring is one of the best times to hunt black bears. Numbers on Vancouver Island are high, so that there is always a good chance to bag a substantial animal. Hunts are exclusively by stalking from boats and on foot and feeding areas are avoided. Due to the mild climate, hunting starts at the beginning of April.

# Greenland

## Welcome to the Ice Age

Hunt on musk oxes and feel set back in prehistory. Greenland is the largest island in the world and is blessed with vast, unspoiled hunting grounds on a scale that many can only dream about.

Depending on the weather, four hunting days are normally enough to guarantee success. An autumn hunt is highly recommended and the season runs from the end of August to the start of October when temperatures hover around 0°C and are still bearable.

If, however, you want to experience the fascinating world of eternal ice and are not put off by temperatures below -30°C, hunting in March and April can make your long-held dream come true.

# North Canada

## Nunavut – North of the Arctic Circle

In the nearly two million square kilometers of Nunavut territory in the Canadian North, it is possible to experience one of the most pristine and breathtaking hunts. Those who have traveled the land of the midnight sun, north of the Arctic Circle, using sled dogs have gained insight into the ancient hunting culture of the Inuit and are changed forever. It is one of our planet's last real hunting adventures. The commercial hunt for caribou, musk ox, polar bear and walrus furthermore represents one of the Inuit's few sources of income all the while managed under government regulations and hunting quotas to ensure absolute sustainability. Regardless of where you hunt now this will prove to be one of the most unique hunting expeditions of your life; experience the high north.

# Sweden

## Vast Country in the North

Sweden abounds with traditional game that will give visiting hunters a very special experience. Moose, black grouse and capercaillie are among the first species that spring to mind.

The methods of hunting are no less fascinating, with dogs playing an important role on both group and individual expeditions.

The sparsely populated hunting areas mean that you really do experience the feeling of wilderness. Hunting here takes place in groups using dogs. Due to the size and wild nature of Sweden's hunting areas, a certain level of physical fitness is required.

# Siberia

## Russian Treasures

Our Russian partner's sporting area boasts a rich ecosystem and covers 150,000 hectares, making it ideally suited for hunting. Roebuck stalking is a particular speciality, with the rut lasting from the middle of August to mid-September.

Accommodation is in a well-equipped hunting lodge with a view of the lake, which is a mere two minutes' walk away. Guests can enjoy WiFi, a jacuzzi, and sauna.

# British Isles

## Moors, Heather and Hills

### Scotland

Hunting red deer in the Scottish Highlands is an almost legendary experience. With their deep valleys, steep slopes, crystal-clear rivers and lochs, the Highlands of Scotland have qualities of solitude and remoteness that are found almost nowhere else in Europe. Here you can stalk red deer all day long, and trophy fees are not high. Memorable hunts are experienced by the skill and fitness of the hunter and his guide rather than the size of his wallet.

### **England**

The rolling fields of rural England provide a magnificent backdrop to some excellent stalking. Roe bucks are in season from the beginning of April, and chances of getting a fine example are particularly high in the south of the country. The prime time is August, when their rut begins. One of the attractive things about English deer hunting is that most of it is done by stalking.

### **Ireland**

Ireland is known as the “Emerald Isle”, due to the lush green nature of its wild romantic countryside. Hunting sika deer here is a very special experience. During the rut from the end of September, you can hear the shrill whistles of the “black devils” almost all day long in the remote high valleys. This gives you a wonderful sense of freedom from worldly cares as you set off in search of sika, which can be very large here. Stalking wild goats also presents a very exciting yet cost-effective way of hunting in Ireland.

# Spain

## In the Land of the Ibex

Four renowned regions – four different types of ibex: Spain has a very long hunting tradition and especially good stocks of game.

Hunting for ibex is its crowning glory – and there are four different sub-species on the Iberian Peninsula. The Gredos ibex is found in the Sierra de Gredos, which lies around 200 km west of Madrid. It is the most well-known of the four species. The others are the Beceite ibex, from the Beceite mountains north of Valencia; the Sierra Nevada ibex from Andalusia; and the Ronda ibex from the Ronda mountains in Andalusia. All four species are highly desirable trophies.

Spain is known for its wild, open mountain landscapes and old, tranquil villages nestled on their slopes. Importantly, its pleasant and temperate climate is also ideal for hunting. The hunting season for all four ibex species runs from October to the end of May. Hunting during the rut from the middle of November to the middle of December is highly recommended, or from April when bucks group together in small packs.

Along with ibex, Spain also offers opportunities for combined hunts, having good stocks of red and fallow deer, chamois and aoudad sheep in its various regions.

# Romania

## The Pearl of Eastern Europe

Romania has huge potential as a destination for passionate hunters – all the hunting takes place in unspoiled countryside. Species include red and roe deer, wild boar and chamois. In addition, our guests enjoy excellent accommodation and service.

From the Carpathian Mountains to the Danube Delta – all types of habitats can be found: high alpine terrain, hills, plains, lakes, as well as marshes along the Danube and the Danube Deltas.

The landscapes are impressive and are very sparsely populated. You can stalk for days in many of the mountain areas and only see a few other people.

The quarry's habitats are indigenous and partly untouched forests. In Romania, hunting, nature and game are combined together to give you an unforgettable experience.

# Austria

## For the Whole Family

Climbing from the flat country to hunt in the mountains is not the only aspect of hunting in Austria that holds a special thrill. To be able to spend the whole day stalking chamois in the spectacular Alpine scenery is a thoroughly enjoyable change for most hunters, who can only hunt in this type of terrain in the twilight hours at home, if at all. What's more, there are few places outside the beautiful Austrian Alps where you can combine hunting with a family holiday with just a few hours' driving.

Whether you choose to start your hunt from a cosy guesthouse, a holiday apartment or a stylish hunting lodge, you will always be impressed by Austrian hospitality and the knowledge and experience of your hunting guide.

## Feathered Game Hunting Worldwide

A large variety of species and beautiful countrysides make our feathered game hunting destinations all over the world an unforgettable experience. Feel well taken care of: Our partners know the best hunting areas and the optimal hunting season. Look forward to country-specific hospitality and the exchange of experiences with other hunters in the relaxed atmosphere of our comfortable accommodations.
